

Corporate 1000™ Format Change Form

HID's Corporate 1000 Format is a 35-bit card format that is developed specifically for use by individual end-user organizations. Organizations must be qualified and formally enrolled and accepted by HID Global Corporation.

To ensure the security of your card format, you may authorize which HID System Provider(s) may purchase your Corporate 1000 cards on your behalf. This information should be entered in "Table 1: Add or Remove HID System Providers Who Can Purchase and Manage Cards on your behalf" below.

Use this form to communicate all authorization changes concerning your Corporate 1000 Format. HID recommends that each end-user maintain an original copy of this form listing all changes. Changes made on this form will not alter any of the original terms and conditions established between us in the Corporate 1000 Format Request & Authorization Form.
