

DigiOn24

DigiOn24 manufactures and develops RFID encoding solutions for use in the plastic card printer marketplace and in the access control and inventory management of critical, valuable items requiring "Track and Trace" visibility and reporting.

Our "who, when, what, how many" ID-CAB solution manages and records inventory receipts and issuance for items ranging from card printer materials such as ribbons, security laminates and blank card stocks to evidence control, hospital dispensing materials, and specialty tools and armaments.

Product Information:

D24 In-Line Proximity Encoders

DigiOn24 designs and manufactures OEM and unique field upgradeable contactless encoder kits (13.56Mhz) with HID Proximity, HID iCLASS® and MIFARE encoding capabilities for a broad range of the world's most popular card printers.

Access control card issuance and batch encoding can now be done in one easy process within the card printer.

The ID-CAB Family

The ID-CAB Security Cabinet family utilizes HID Proximity and iCLASS readers for physical access control in multi-user application.

DigiOn24's ID-CAB Inventory/Security Management Solution allows user definition of Multi-level access restrictions and reports all access and inventory receipt/removal events with operation ID and time and date reporting.

The ID-CAB solution provides both physical access control and inventory management for securing critical and high value items.

ACCESS solutions.
