

System Partners Supporting HADP iCLASS® Readers

Lenel's OnGuard® software supports HADP iCLASS® Readers. By using the HADP protocol to communicate with the iCLASS reader, Lenel's OnGuard software increases system functionality by providing the following additional features to access control systems:

- ▶ Real-time clock display on all iCLASS LCD readers
- ▶ Supervised communications between panel and reader
- ▶ Intruder-specific behavior extended to LCD and non-LCD readers
- ▶ Third-party plug-in for time-and-attendance systems
- ▶ Up to 7 hot keys and hot key combinations execute user-defined macros
- ▶ Display of up to 8 user-defined strings for hot keys and welcome messaging
- ▶ Display of status and prompting – shows door state (locked/unlocked)
