

I25 kHz Proximity Readers Top Ten List

Reasons to Choose HID Indala-brand I25 kHz Proximity Readers

- 1. The Industry's Most Secure Proximity Readers.** Exclusive Indala FlexSecur® Password-Protected Security, between card and reader, screens out unauthorized cards before sending card data to the host system.
- 2. Superior Format Control for the Most Application Choices.** With formats up to 172 bits, cards can be programmed in Wiegand, Magstripe, or custom formats.
- 3. Expansive Product Portfolio Meets Every Proximity Reader Requirement.** The HID Indala-brand Proximity portfolio includes classic, mullion/slim, wallswitch, mid-range, long-range, and heavy-duty keypad readers for every application.
- 4. Indoor / Outdoor Flexibility.** All readers are fully potted and have weatherproof electronics assemblies, making them suitable for internal and external applications.
- 5. Easy Installation.** Readers easily mount on a door mullion or single-gang electrical box.
- 6. Audio Tone Programming Flexibility.** Independently controllable audio tone can be tied to LED function or separately controlled.
- 7. Heavy-Duty Keypad Reader Features Vandal-Resistant Construction.** Rugged construction of fully-potted PC/ABS Copolymer material is virtually indestructible for a longer life and better value for the end user.
- 8. Available in Several Bezel Choices for Design Flexibility.** Stylish readers are available in mullion-mount and wallswitch in many attractive, "snap-on" bezel styles and colors. A reader with keypad is available for increased security.
- 9. Compatible with Any Control Panel.** Wiegand or Clock & Data output easily interfaces with most existing access-control panels.
- 10. Unbeatable Warranty and Technical Support.** Customers can select HID Indala-brand I25 kHz Proximity Readers with confidence because HID offers a lifetime product warranty and global Technical Support.
