

# HID Integrale™ for eVisa

HID Integrale is a suite of easy-to-integrate software modules designed to handle all the necessary steps of managing the whole identity lifecycle.

HID Integrale has a proven history of upgrade integration and new implementations. It has been developed to encourage the involvement of local integrators.

## INTEGRALE FOR EVisa

HID Integrale covers the full range of functionality required to manage the application, issuance and use of eVisas. It fully supports the lifecycle of the visa, whether physical or digital, enabling online and in-person processing. It is designed to support the appropriate standards including ICAO VDS.

Integrale supports all HID and leading third-party hardware to enable the application process and printing of physical visa stickers. It allows easy integration into existing online solutions providing full transparency of processing status to the applicant.

HID Integrale offers simplified key distribution to eGate hardware technologies and border management solutions for easy visa verification, enhancing border security and traveler processing times.

HID Integrale for eVisa manages the following processes in the visa lifecycle:

### APPLICATION

- Application profile creation
- Form validation and capture
- Payment processing
- Online portal
- Automated Application validation with role-based approvals as necessary

### PROCESS STATUS

- Application lifecycle
- Application status checking through online portal

### ASSESSMENT

- Visa eligibility
- Visa approvals

### ISSUANCE

- 2D / QR code / PDF generation
- Visa sticker printing
- Mobile visa

### INSPECTION

- Automated quality control with manual inspection as necessary
- Key management and key distribution

### REVOCACTION

- Expiry
- Visa revocation by special authorization

### EXTENSION

- Extension request and processing

---

## INTEGRATION

---

Simple front-end integration, with push or pull options, file transfer (.xml or flat file transfer), database retrieval scripts and RESTful API.

Can integrate with Active Directory for user identification and authentication.

Integrator usually provides own platform hardware.

TECHNICAL FEATURES	TECHNICAL REQUIREMENTS
Quick workflow configuration/design tools	Can be implemented as:
Web portal with dynamically generated HTML5 UI	Native Apache web service with SQL database
Automated installation of hardware drivers	VM HyperVisor (others by agreement)
JDBC for external databases	VM using Kubernetes docker containers
SOAP/REST API connectivity	Appropriate network architecture to separate public-facing portal and pre-enrollment services
OAuth authentication	
TLS v1.2 security and above	

- ▶ License cost based on scale and capacity of use.
- ▶ Professional services costs based on extent of use cases and setup required.
- ▶ Additional pricing for biometric hardware and client licenses.
- ▶ Integrator can use own licensed platform and database architecture.
