

# HID® Livescan Universal Cabinet

Purpose-built livescan to meet your enrollment, booking and identity verification requirements

Fingerprinting suspects is a daily requirement for law enforcement personnel. It calls for rapid, high quality capture and biographical data input for quick identification and background checks through inquiries to local or remote AFIS databases.

HID Livescan Universal Cabinet accommodates all FBI certified forensic-quality HID Crossmatch L Scan™ palm scanners and HID Guardian™ tenprint readers. All user control elements are arranged ergonomically to make the job of booking officers as easy and safe as possible. The large flat screen display with optional touch screen functionality is located in an optimal position and displays the captured fingerprints in full resolution.

The workspace surrounding the scanner provides additional area for placing documents or connecting

additional input devices, such as signature capture devices. Foot switch controls are conveniently located at both front corners.

Capturing all prints and textual data is an intuitive process that takes just a few minutes. The optional camera mounting bracket allows convenient fixed installation of a video or still camera to capture mug shot and scar, mark and tattoo (SMT) images. In addition, a flexible mount is offered for securing a HID Crossmatch I Scan™ 3 iris scanner.

The HID Livescan Universal Cabinet was designed to deliver optimum performance and reliability in an easy to use configuration whether processing cooperative or uncooperative applicants.

#### KEY BENEFITS:

- Ergonomic design, tailored to the needs of booking officers
- Convenient layout of all user control elements and consumables
- Locked physical protection for scanner, monitor, keyboard and PC
- Long life, industrial-grade kiosk designed for harsh environments
