NOTICE OF DISCONTINUED PART NUMBERS:

AC Series Controller

HID Global is committed to providing the highest quality physical access control solutions to our customers. As a product and solution provider, it is important to efficiently manage HID Global's product portfolio including how customers buy our products in the market to enable easy and efficient selection of the right solution for each application.

The evolving market dynamics necessitate a change to HID Global's product strategy. With this change HID has decided to discontinue the AC Series controller. Customers looking for enhanced controller functionality will have an option to either use other HID controller platforms or contact Impro Technologies S.A, an Assa Abloy Group Company, for scalable access controllers sharing the AC Series platform. The approach HID has taken will provide customers with a product that delivers enhanced controller functionality for a more complete turnkey solution that includes an embedded application and software system application compatible with existing AC Series hardware.

For developer customers looking to explore available options with other [HID controller platforms](#) (HID Mercury™ and HID Aero™ Controllers), contact your HID Global Sales representative. For customers who want to explore Impro Technologies, please visit <https://www.impro.net/contact-us/>.

SUMMARY OF AFFECTED PART NUMBERS BEING DISCONTINUED

Part Number	Description
ACW2-XN	NETWORKED CONTROLLER W/ EMBEDDED WEBSERVER, WIEGAND MODULE, PSU AND METAL ENCLOSURE
