Announcement Regarding Credentials Marking

As a part of our commitment to continuous enhancements of world-class products and solutions, HID Global is transitioning to the most innovative card marking technology available.

Effective immediately, HID Global is moving from ink jet card marking to the new laser engraving card marking technology for all Genuine HID® cards, fobs and authentication tokens. This state-of-the-art laser engraving technology will result in a more appealing look and feel and reduce the ecological footprint of card production.

All relevant orders in the United States and Canada are affected immediately.

Key benefits:
Marking quality and durability of the cards will be enhanced and more consistent
New engraving technology reflects HID Global’s commitment to sustainability by eliminating the use of solvents
Improved Proof of Authenticity since engraved markings cannot be removed or modified.

The enhanced design will be available at no additional charge. The laser-engraving surcharge for Genuine HID Proximity and Contactless Credentials will be removed in November.

Depending on the fulfillment center, customers may receive either inkjet or laser marked cards during the transition period of October 2014 – June 2016. All ID1 cards (Clamshell Cards included), key fobs (including Microtags, Keytags and Microprox) and authentication tokens will have the enhanced laser engraving design immediately.

Notes:
The numbering scheme and part number will not change. Please contact your sales representative to see the new design and get sample cards.
Due to the 3D nature of laser engraved markings, printing over these markings is not recommended as it may impact print quality.
For all relevant Credentials ordered and/or shipped out of North America, the laser-etched version supersedes all ink jet card part numbers.
For further details on the printing areas, please contact HID Global.
Please contact HID Customer Service or Sales Representative if you have additional questions regarding this notice.
Credentials

200/210 - iCLASS Card Ordering Guide

The 200/210 iCLASS contactless smart card offers read/write capability. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 The external card number is placed in the bottom right-hand corner on the back of the card.
4 For Laser Engraved external numbers, consult factory for lead times and cost.
5 Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
6 The ability to add a horizontal slot punch requires a different iCLASS antenna design. Users can expect a read range reduction of approximately 20% if they order options B or H for the Slot Punch.
7 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
8 The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
202/212 - Combination Card (iCLASS/Prox) Ordering Guide

The iCLASS Prox contactless smart card offers read/write and proximity (HID Prox, Indala, HITAG1 or 2) capability in a single card. Add new applications while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**

| 202 Standard PVC | 212 Composite 40% Polyester / PVC* |

* HITAG based cards are not available with composite or as embeddable cards. Those cards are only available with iCLASS 32k memory size.

**iCLASS Memory Size and Allocation (Check One)**

- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 1 - 16k Bits (2k Bytes) with 2 Application Areas
- 2 - 16k Bits (2k Bytes) with 16 Application Areas
- 3 - 32k Bits (4k Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4k Bytes) Application areas 16k/16+16k/1

**iCLASS Programming (Check One)**

- B - Both iCLASS and Prox Technology programmed. Specify Programming Information
- P - iCLASS Programmed, Prox technology blank. Specify Programming Information
- C - iCLASS configured field programmable, Prox technology blank. Specify Programming information.
- A - iCLASS configured field programmable, Prox technology programmed. Specify Programming Information.
- K - iCLASS Programmed, HITAG1 blank. Specify Programming Information.
- M - iCLASS Programmed, HITAG2 blank. Specify Programming Information.
- R - iCLASS configured field programmable, HITAG1 blank.
- I - iCLASS configured field programmable, HITAG2 blank.

**Front Packaging (Check One)**

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number

**Back Packaging (Check One)**

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number
- 1 - Plain White with Gloss Finish with Magnetic Stripe
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number
- D - Glossy White with Debitek Mag Stripe

**iCLASS Card Numbering (Check One)**

- M - Sequential Matching Internal/External (Inkjetted)
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)
- R - Random Internal/Non-Matching Sequential External (Inkjetted)
- A - Sequential Matching Internal/External (Laser Engraved)
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)

**Slot Punch (Check One)**

- H - Horizontal slot punch
- V - Vertical Slot Punch
- N - No Slot Punch
- C - No Slot Punch - Horizontal Slottable Punch compatible (Printed location of Vertical and Horizontal slot punch will remain)

**125 kHz Card Numbering (Check One)**

- M - Sequential Matching Internal/External (Inkjetted)
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)
- R - Random Internal/Non-Matching Sequential External (Inkjetted)
- A - Sequential Matching Internal/External (Laser Engraved)
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)

**Option - Custom Artwork**

(Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from the above selections. Example: 2022BGGNM

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The external card number is placed in the bottom right-hand corner for iCLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.
4. For Laser Engraved external numbers, consult factory for lead times and cost.
5. Cards are provided with an optional slot punch at no additional charge.
6. HITAG combination cards are only available with iCLASS 32k Bits. Some video imaging printers cannot accommodate pre-slot punched cards.
7. H slot punch option is not yet supported on iCLASS 16k or 32k memory options.
8. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
9. The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
205 - iCLASS Key Ordering Guide

The iCLASS contactless smart Key offers read/write capability. Attach to a key ring or badge clip for convenient use.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**205 Base Model**

**iCLASS Memory Size and Allocation (Check One)**
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 1 - 16k Bits (2k Bytes) with 2 Application Areas
- 2 - 16k Bits (2k Bytes) with 16 Application Areas
- 3 - 32k Bits (4k Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4k Bytes) Application areas 16k/16+16k/1

**Programming (Check One)**
- C - Configured, Non-Programmed iCLASS. Programming Information Not Required.
- P - Programmed iCLASS. Specify Programming Information.

**Front Packaging**
- N - iCLASS Key II - Black with blue insert. Includes HID Standard Artwork

**Back Packaging**
- N - None

**Key Numbering**
- M - Sequential Matching Internal/External (Inkjetted)
- N - No External Key Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)
- R - Random Internal/Non-Matching Sequential External (Inkjetted)
- A - Sequential Matching Internal/External (Engraved)
- B - Sequential Internal/Sequential Non-Matching External (Engraved)
- C - Random Internal/Non-Matching Sequential External (Engraved)

**Additional Options**
- N - None

Enter your final card options from the above selections. Example: 2052PNNMN

</tbody>
</table>

1 The external key number is placed on the back of the key.
2 For Laser Engraved external numbers, consult factory for lead times and cost.
3 Key Ring sold separately (Part Number: 57-0002-02).
4 Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.
206 - iCLASS Tag Ordering Guide

The iCLASS contactless smart Tag offers read/write capability. iCLASS enable existing credentials or non-metallic devices such as cell phones or PDAs by adhering the iCLASS Tag.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

---

### iCLASS Memory Size and Allocation (Check One)

- **0** - 2k Bits (256 Bytes) with 2 Application Areas
- **1** - 16k Bits (2k Bytes) with 2 Application Areas
- **2** - 16k Bits (2k Bytes) with 16 Application Areas

</thead>
</table>

<table>
<thead>
<tr>
<th>Internal Card # Start</th>
<th>Stop</th>
<th>External Card # Start</th>
<th>Stop</th>
</tr>
</thead>
</table>

PIN:
- **Sequential**: Start #, Stop
- **Random**: Length, Stop

Special Instructions:

1. The external tag number is placed on the back of the tag.
2. For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3. The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.
4. Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
208 - iCLASS Clamshell Card Ordering Guide

The iCLASS contactless smart card offers read/write capability.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### 208 Base Mode

#### iCLASS Memory Size and Allocation (Check One)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 1 - 16k Bits (2k Bytes) with 2 Application Areas
- 2 - 16k Bits (2k Bytes) with 16 Application Areas
- 3 - 32k Bits (4k Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4k Bytes) Application areas 16k/16+16k/1

#### Programming (Check One)
- C - Configured, Non-Programmed iCLASS. Programming Information Not Required.
- P - Programmed iCLASS. Specify Programming Information.

#### Front Packaging (Check One)
- M - Plain White Vinyl with Matte Finish
- G - Plain White with Gloss Finish
- A - iCLASS Clamshell - Adhesive Front
- C - Custom Artwork - Specify Custom Artwork Number

#### Back Packaging (Check One)
- S - Base with Molded HID Logo
- C - Custom Artwork - Specify Custom Artwork Number

#### Card Numbering (Check One)
- M - Sequential Matching Internal/External (Inkjetted)
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)
- R - Random Internal/Non-Matching Sequential External (Inkjetted)

#### Slot Punch (Check One)
- V - Vertical Slot Punch

#### Option - Custom Artwork
(Specify Artwork Number – Refer to the Custom Artwork Forms for new Artwork)

Enter your final card options from check boxes above. Example: 2080PGSMV

---

1 The part numbers for non-adhesive labels to be used with the iCLASS Clamshell with the adhesive front are 1324GGN31 without slot and 1324GGV31 with slot.
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
3 The external card number is placed in the top left-hand corner on the back of the card. HID logo molded into base on back.
4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
232/242 - iCLASS/Other HF 13.56 MHz - Combination Card Ordering Guide

The iCLASS with MIFARE or MIFARE DESFire contactless smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. Add new applications while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

For MIFARE Classic: This credential is only delivered with MIFARE Classic UID on 4 Bytes long only (32 Bit). It is not available with 7 bytes UID for Classic, only for DESFire EV1.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

---

### Base Model

- 232 Standard PVC
- 242 Composite 40% Polyester / PVC *

### iCLASS Memory Size and Allocation (Check One)

- 0 - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE CLASSIC 1K)
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1

### Card Programming (Check One)

- B - Programmed iCLASS & 2nd Technology. Specify Programming Information.
- P - Programmed iCLASS only not 2nd Technology. Specify Programming Information.
- C - Configured, Non-Programmed iCLASS. Non-programmed 2nd Technology. Programming Information Not Required.

### 2nd High Frequency Technology (Check One)

- M - MIFARE 1K Bytes (only available with iCLASS 2k bits)
- N - MIFARE 4K Bytes
- K - MIFARE DESFire EV1 8K Bytes

### Front Packaging (Check One)

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number1

### Back Packaging (Check One)

- G - Plain White with Gloss Finish2
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number1
- 1 - Plain White with Gloss Finish with Magnetic Stripe2
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number1

### iCLASS Card Numbering3 (Check One)

- M - Sequential Matching Internal/External (Inkjetted)6
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)6
- R - Random Internal/Non-Matching Sequential External (Inkjetted)6
- A - Sequential Matching Internal/External (Laser Engraved)4
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)4
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)4

### Slot Punch5 (Check One)

- N - No Slot Punch

### 2nd High Frequency Technology Card Numbering3 (Check One)

- M - Sequential Matching Internal/External (Inkjetted)6
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)6
- R - Random Internal/Non-Matching Sequential External (Inkjetted)6
- A - Sequential Matching Internal/External (Laser Engraved)4
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)4
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)4
- W - UID (CSN) HEX numbering only (Engraved) 4: 7 bytes UID
- X - UID (CSN) Decimal numbering only (Engraved) 4: 7 bytes UID

### Option - Custom Artwork1

- (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from the above selections. Example: 2324PNGGNNN

---

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The external card number is placed in the bottom right-hand corner for iCLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.
4. For Laser Engraved external numbers, consult factory for lead times and cost.
5. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
6. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

* The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
**272/282 - MIFARE Classic/DESFire EV1 - Combination Card Ordering Guide**

The MIFARE + DESFire contactless card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

This credential is only delivered with MIFARE Classic UID on 4 Bytes long only (32 Bit). It is not available with 7 bytes UID for Classic, only for DESFire EV1.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

</tbody>
</table>

1 The external tag number is placed on the back of the tag.
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3 The Tag is not for use on cards that use full insertion or tractor feed type readers.
4 Includes a permanent Unique MIFARE 32 Bit serial number. When printed the number is encoded MSB (most significant byte) -> LSB (least significant byte).
5 Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.
6 * Up to 1.14in (29mm) read range in free air.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the Tag will work in every situation. Functional and non-functional Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

* Actual read range performance affected by mounting location, environment and the tags tuned resonant frequency.
**1450/1456 - MIFARE DESFire EV1 Card Ordering Form Guide**

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### 13.56 MHz Card Programming Information

- **Bit Numbers** (example: 26 bit)
- **Format Number** (example: H10301)
- **Facility Code**
  - (Custom Formats) Site Code ________, City Code ________.
  - OEM Code ____________.
- **Internal Card No. Start** ____________, **Stop** ____________.
- **External Card No. Start** ____________, **Stop** ____________.
- **Special Instructions:**

For Contact Smart Chip selection, refer to Logical Access How to Order guide. Standard configuration does not include a contact smart chip module.

---

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The external card number is placed in the bottom right-hand corner on the back of the card on Proximity Format Programming only. Permanent Unique MIFARE 56 Bit serial # cannot be printed on cards.
4. For Laser Engraved external numbers, consult factory for lead times and cost.
5. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
6. The composite construction is recommended for all cards with over-laminate applied.

1451/1457 - Combination (MIFARE DESFire EV1 Solution/PROX) Card Ordering Guide

The MIFARE DESFire contactless smart card offers read/write and proximity (HID Prox, HITAG1) capability in a single card. Add new applications while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**
- 1451 Standard PVC
- 1457 Composite 40% Polyester / PVC

*HITAG based cards are not available with composite or as an embeddable cards

**MIFARE DESFire EV1 Memory Size**
- C - 8K Bytes MIFARE DESFire EV1

**MIFARE DESFire Programming (Check One)**
- L - Programmed, (125 kHz only)², Specify Programming Information.
- N - Non-Programmed (125 kHz & 13.56 MHz)³, Programming Information Not Required.
- S - Custom Programmed, (13.56 MHz only)⁴, Prox Configured Specify Programming Information.
- R - Custom Programmed, (125 kHz and Custom 13.56 MHz)²-⁶, Specify Programming Information.
- F - Non-Programmed (HITAG1 & 13.56 MHz)⁵, Programming Information Not Required.
- G - Custom Programmed, (13.56 MHz only)², HITAG1 Configured only. Specify Programming Information for MIFARE DESFire.

**Front Packaging (Check One)**
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number¹

**Back Packaging (Check One)**
- G - Plain White with Gloss Finish²
- 1 - Plain White with Gloss Finish with Magnetic Stripe²
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number¹,²
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number¹,²

Bit Numbers  
Format Number  
Facility Code  
(Custom Formats) Site Code  
OEM Code  
Internal Card No. Start  
External Card No. Start  
Special Instructions:

\(^1\) The external tag number is placed on the back of the tag.

\(^2\) For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.

\(^3\) The Tag is not for use on cards that use full insertion or tractor feed type readers.

\(^4\) Includes a permanent Unique MIFARE DESFire 56 Bit Serial number.

\(^5\) Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the Tag will work in every situation. Functional and non-functional Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
155/165 - LEGIC Card Ordering Form Guide

The 155/165 LEGIC® contactless smart card offers read/write capability. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Artwork Checklist

Company Name: _______ PO No. _______ Date: _______

Quantity: _______ Card/Key/Tag and Artwork File No. _______

Minimum order quantity for Custom Artwork is 500 cards per order. Some Custom Artworks may be higher. Minimum order quantity for Custom Artwork Tags/Keys is 10,000 tags per order.

This form, accompanied with the “Custom Artwork placement and Inkjet Location Form” MUST be filled out, SIGNED and returned to HID so that your order can be processed.

Credential Type: Standard PVC Cards or Keys/Tags

- 200 - iCLASS Card
- 206 - iCLASS Tag
- 1431/1441 - HID Proximity & MIFARE
- 1450 - MIFARE DESFire
- 1454 - MIFARE DESFire Keyfob

- 202 - iCLASS Prox Card
- 208 - iCLASS Clamshell Card
- 1434/1444 - MIFARE Keyfob
- 1451 - MIFARE DESFire & Proximity
- 1455 - MIFARE DESFire Tag

Credential Type: Composite PVC/Polyester Cards (Additional fee and longer lead-time)

- 210 - iCLASS Card
- 1436/1446 - MIFARE
- 1457 - MIFARE DESFire & Proximity

- 212 - iCLASS Prox Card
- 1437/1447 - HID Proximity & MIFARE
- 214 - iCLASS Wiegand
- 1456 - MIFARE DESFire

Artwork Placement, Font Styles and Colors:

- Artwork Placement on Front Side of card
- Artwork Placement on Back Side of card
- Font Style(s):
- Front Side Colors:
- Back Side Colors:

Do you plan to print over or around the custom artwork with a dye sublimation printer? □ Yes □ No

“Surface” □ or “Laminated” □ Lithographic Printing (Refer to the “Anti-Counterfeiting Descriptions” page in this guide for details)

Card Options:

- Slot Punch ²⁄₅: □ Yes □ No □ Horizontal □ Vertical
- Signature Panel: □ Yes □ No □ Size:
- Front Card Finish: □ Gloss □ Matte
- Back Card Finish: □ Gloss □ Matte
- Magnetic Stripe Coercivity: □ HID Standard (4000 OE) □ (2750 OE)
- Magnetic Stripe Type: □ Standard 3 Track □ Debitk 1/8” □ Other:

Anti-Counterfeiting Options:

- Invisible Ink: □ Red □ Blue □ Green
- Micro-fine Print: □ Yes □ No
- Hologram ³: □ Surface

Notes:

³ Standard Composite Card is 40% Polyester and 60% PVC.
² Some cards will have printed “indicators” on the back of the card to show the vertical slot punch location.
² Some cards will have a small HID logo in HID and reference number, custom artwork file number, and external number (optional) printed on the card.
⁴ Do not order slot punched cards for use in dye sublimation printers. Slot edge may damage the printer ribbon. Slot should be punched after dye sublimation printing.
⁵ Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering
⁶ Surface Holograms cannot be placed over internal electronics.
⁷ Representation, Warranty and Indemnity. Customer represents and warrants to HID that it owns, controls, or otherwise has the full and unrestricted right to use the custom artwork provided to HID for use in connection with this Custom Artwork Checklist Form (the “Custom Artwork”) and to authorize and license HID to use and apply the Custom Artwork to the cards in the manner provided in this Custom Artwork Checklist Form. Customer agrees to indemnify HID and hold it harmless from and against any claims, liabilities, losses and/or expenses (including reasonable attorney fees and costs of suit) arising out of the use by HID of the Custom Artwork in the manner provided by this Custom Artwork Checklist Form or by any custom artwork proofs approved by the Customer.
⁸ HID does not recommend placing custom graphics on either side of the Contact Smart Chip area.

Name: ___________________ Signature: ___________________ Date: ___________________
Electronic Artwork Checklist

File Submission & Preparation

This document gives digital artwork specifications from our press department. Use these guidelines and your project should go smoothly through the pre-press department.

☐ MEDIA
Submit files via Email or on CD. Compressed files should be self extracting. Submitted media will not be returned to the customer. FTP site available upon request.

☐ PLATFORM: MS WINDOWS®, Macintosh®
Projects that are set up in any of the major applications (listed below under “Graphic Applications”) generally translate to Macintosh® smoothly. Save your final file with pictures embedded, outlined fonts and EPS Vector editable file.

☐ FONTS
Use Type 1 fonts and include screen and printer fonts on disk. Type may be converted to paths or outlines, but we cannot make copy changes to text submitted in this form. In addition, converted type loses the benefits of PostScript font definitions; hence, type quality may suffer. This is more noticeable in small type (-18 point).

☐ PLACED GRAPHICS
All placed graphics, saved as TIFF or EPS should be included in their native program. If a Photoshop image is placed in a Quark document, we need the Photoshop image to produce the job. Sizing, cropping, rotation, etc., should all be done to the element in its native program and placed in Quark. Color images should be converted from RGB to CMYK. Special colors should be designated using PMS or provide color sample to be matched. Resolution of color images, B&W halftones, or duotones should be 300 dpi.

☐ GRAPHIC APPLICATIONS (latest version)
Adobe Photoshop® - Adobe Illustrator® - QuarkXpress®

☐ BITMAPS AND TRACING
Scanned line art converted to bitmaps should have a resolution of 1200 - 2400 dpi. Lower resolutions will result in jagged curves. Many programs can convert (trace) bitmaps to vector drawings. Smoothing a traced image can be time consuming, but once completed yields a resolution independent graphic that will provide crisp reproduction for all future uses. We can provide this service for you at our regular file intervention rate. Minimum required DPI (dots per inch) is 300.

☐ BLEEDS
Incorporate 0.125” of overwork for all bleed images. Any portion of the image that extends to the edge of the product is considered a bleed. Minimum required size with bleed is 2.227” x 3.477” for standard card size file.

☐ MARGINS
Elements that do not bleed should be at least 0.125” from the edge.
Anti-Counterfeiting Descriptions

Laminated Lithographic Printing
High resolution (>3600 dpi) offset printing technology yields photographic quality images. Laminated printing places the ink layer under a rigid clear plastic overlay which protects the printed image from abrasion and allows you to re-print over the existing artwork on the card. The cards are compatible with all Photo ID printing methods: dye-sub, reverse transfer and resin transfer.

Surface Hologram
Holograms are one of the most recognizable anti-counterfeiting devices on the market. The optically variable image cannot be duplicated with standard printing. Surface holograms are applied via hot stamping to the exterior of the card surface. This style of application is common to all financial transaction cards.

Embedded Hologram
Embedded holograms are positioned under the rigid clear outer layer of the card surface. Unlike surface holograms, embedded holograms are amenable to dye sublimation – allowing the entire card surface to be personalized. This application style furthers the effectiveness of the anti-counterfeiting feature by requiring expensive specialized equipment during manufacture.

OVI (Optical Variable Ink)
Color-shifting inks reflect various wavelengths in white light differently, depending on the angle of incidence to the surface. An unaided eye observes this effect as a change of color while the viewing angle is changed. This anti-counterfeiting method is commonly used on currency and travel documents.

Invisible Ultra-Violet (UV) Fluorescing Images
Common on credit card, currency and travel documents, invisible ink images provide a covert anti-counterfeiting mechanism. Though blue/violet fluorescing ink is readily available and inexpensive, red, green, yellow and orange fluorescing pigments remain difficult to acquire. This covert anti-counterfeiting device remains popular because of its relatively easy implementation in the field.

Micro-fine Printing
Very small spot color printing that exploits the limitations of inkjet, toner based (laser) and dye sublimation printers. Counterfeit reproductions can be determined with a handheld magnification tool.

Guilloche Printing
Fine line interlocking spot color patterns that are extremely difficult to scan and reproduce. These design elements are often multicolor and are commonly used on currency and travel documents.

Composite Formulations
Composite formulations are designed for durable applications and for use in dye sublimation printers that employ re-transfer technology and/or polyester laminate patches. Composite cards will minimize the warping caused by such processes. These formulations derive their strength from combining biaxial oriented polyester (OPET) with traditional Polyvinyl Chloride (PVC).
Custom Card Artwork Placement and Inkjet Location Guides

Standard PVC and Composite PVC/Polyester Cards

<table>
<thead>
<tr>
<th>Company Name:</th>
<th>PO No.</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quantity:</td>
<td>Card and Artwork File No.</td>
<td></td>
</tr>
</tbody>
</table>

1. External Number:
   - Standard Location: The standard external # location is shown on the template below. The external # can only be printed on the back of the card. The external # will be printed in the standard location, unless otherwise specified.
   - Custom Location: Indicate the desired external # location by writing "12345" on the appropriate template. The external # can only be printed on the back of the card.

2. An Artwork File Number:
The artwork is placed on each card. The standard location is indicated by the "CCCCC". The standard location for the custom artwork number is on the back side of the card. Indicate/incorporate the artwork number on the artwork.
   If there will be front side printing only, the custom artwork number will be placed on the printed side, opposite the standard location.

3. Artwork Placement:
Indicate the placement of your artwork on the template below. Custom artwork must clear the slot punch locations and edges by a min. of 0.125".

4. Magnetic Stripe (Optional):
If the location of the magnetic stripe is custom (other than standard) and/or if other types of magnetic stripes are to be added to the card (for example Debitek stripe), indicate the locations of the magnetic stripe(s) on the template.
   - Standard Location
   - Custom Location

Card Artwork Templates

Notes:
1 External # location reads in the direction as shown. External # character height is approximately 0.1".
2 Cards will have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 A standard custom artwork file number is printed on the back side of the card. Front side printing of this same number is an option.
4 Slot punch location “indicators” will appear on the back side of the card only.
5 Do not order slot punched cards for use in dye sublimation printers. Slot edge may damage the printer ribbon. Slot should be punched after dye sublimation printing.
6 Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.

1. External Number:

☐ Standard Location: The standard external # location is shown on the template below. The external # can only be printed on the back of the card. The external # will be printed in the standard location, unless otherwise specified.

☐ Custom Location: Indicate the desired external # location by writing "12345" on the appropriate template. The external # can only be printed on the back of the card.

2. Artwork Placement:

Indicate the placement of your artwork on the template below. Custom artwork must clear the slot punch location and edges by a min. of 0.125”

Card Artwork Templates

---

Notes:
1. All iCLASS Clamshell cards have a molded HID logo on the back side (as indicated) as well as a beveled edge all the way around the card. Custom artwork graphics need to clear the molded logo and bevel by a minimum of 0.125”
2. External # location reads in the direction as shown. External # character height is approximately 0.1”
3. There is no custom artwork file number on the iCLASS Clamshell.

## Legacy iCLASS Readers

iCLASS SE has superseded the majority of legacy iCLASS reader functionality. The remaining specialty models and applications continue to exist on the legacy iCLASS line until an SE replacement is made available.

*Revision numbers and availability are subject to change without notice. Consult factory for availability.

1 Configuration Setting Options are as follows (Factory or Field Configurable):

00 = Beep on, LED normally red, reader flashes green on tag read
01 = Beep off, LED normally red, reader flashes green on tag read
02 = Beep on, LED normally off, reader flashes green on tag read
03 = Beep off, LED normally off, reader flashes green on tag read
04 = Beep on, LED normally red, host must flash green
05 = Beep off, LED normally red, host must flash green
06 = Beep on, LED normally off, host must flash red and/or green
07 = Beep off, LED normally off, host must flash red and/or green

2 iCLASS Security options (Factory or Field Configurable)

0 = Standard; protects access and biometric applications (Reads/Enrolls all iCLASS cards with unique keys diversified from HID master key)
1 = Elite; protects access and biometric applications (Reads/Enrolls only iCLASS cards with site-specific Elite key; consult factory for availability)
C = Standard with Open Collector Tamper enabled
D = Elite with Open Collector Tamper enabled

3 MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the “iCLASS Reader Wiegand Output Configuration Guide” for more details.

(SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

0 = 32 bit
1 = 32 bit reverse (Same as 6055A and 6055BXX0011)
2 = 26 bit
3 = 34 bit
4 = 40 bit
5 = 37 bit
6 = 56 bit

4 Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration setting options:

00 = Buffer one key, no parity, 4 bit message
05 = Buffer one key, no parity, 8 bit message (Dorado)
06 = Buffer two keys and add parity
10 = Buffer six keys and add parity
11 = Buffer one key and add parity
14 = Buffer one to five keys (Standard 26 bit output)
19 = Buffer four keys and add parity
20 = Single Key buffering
23 = Buffer one to 11 keys

4 In addition to RKLB57 reader only (6180BKT), this part provides additional enrollment capabilities and multi-lingual support. Reader/Enroller is field configurable for one of the following behaviors: reader/enroller, reader-only or enroller-only, and field configurable for one of 10 languages (see datasheet for more information). This product replaces CP575 fingerprint template enroller (no longer available).

- 07 = Beep off, LED normally off, host must flash red and/or green
- 08 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)
- 09 = Custom options (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)
- 10 = Standard with Open Collector Tamper enabled
- 11 = Custom with Open Collector Tamper enabled

‡iCLASS Security Options (Factory or Field Configurable): See Application Note Number 28 for additional information on Key Management.

- 0 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)
- 1 = Custom options (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)
- C = Standard with Open Collector Tamper enabled
- D = Custom with Open Collector Tamper enabled

§MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the “iCLASS Reader Wiegand Output Configuration Guide” for more details. (SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

- 0 = 32 bit
- 1 = 32 bit reverse (Same as 6055A and 6055BXX011)
- 2 = 26 bit
- 3 = 34 bit
- 4 = 40 bit
- 5 = 37 bit
- 6 = 56 bit
- Z = CSN Suppressed

Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration setting options:

- 00 = Buffer one key, no parity, 4 bit message
- 09 = Buffer one key, add compliment, 8 bit message (Dorado)
- 10 = Buffer six keys and add parity
- 11 = Buffer one key and add parity
- 14 = Buffer one to five keys (Standard 26 bit output)
- 19 = Buffer four keys and add parity
- 20 = Single Key buffering
- 23 = Buffer one to 11 keys

Contact Factory for pricing, availability, and minimum order quantity.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

iCLASS Programming Platform

HID Global's iCLASS Programming Platform allows the programming of a configured iCLASS card through a FARGO® HDP printer, increasing the flexibility of programming options for customers. Through this platform, the HID Access Control Application is programmed directly to a card with unique facility codes and card numbers. This tool allows a dealer or integrator to support multiple customers with a stock of configured cards, programming the cards only when the customer wishes. For the dealer or integrator, increase flexibility offering fully programmed iCLASS cards at a moment’s notice.

End users benefit from this platform by maintaining control over their facility codes and card numbers, printing identification badges within their own facility. Use the iCLASS Programming Platform to replace lost badges on the spot instead of having to experience any delays from re-ordering an iCLASS card from their local dealer or integrator.

Components of the iCLASS Programming Platform

- Configured iCLASS Credentials
- Encoder
  - iCLASS Programming Platform Encoder installed within a Fargo HDP Printer
- iCLASS Programming Platform Smart Card containing a specific facility code and the number of credential credits purchased
- Fargo HDP 5000 or HDPii Printer
- Asure ID Card Personalization Software (Enterprise Version)

Configured iCLASS Credentials

Configured iCLASS Credentials come with all your standard card body options, including PVC and Composite makeup, from 2k to 32k in size. A configured iCLASS Credential has the Access Control Application loaded with the application lay-out defined, but does not contain specific facility codes or card numbers. These are added through the iCLASS Programming Platform.

Encoder

The iCLASS Programming Platform Encoder is a specialized version of an HID encoder that installs directly to the HDP Printer. This encoder communicates with the iCLASS Programming Platform Smart Card and Asure ID Card Personalization Software to program cards with the appropriate facility code, card number and other data. In a single pass, program this card data, and enable a personalized photo, background image or other security features through the Fargo printer.

Smart Card with Facility Code and Credential Credits

Order the iCLASS Programming Platform Smart Card with a specific facility code and required number of credential credits. When inserting this smart card into an external contact smart card reader (OMNIKEY readers offer several options), the iCLASS Programming Platform Smart Card communicates with the iCLASS Programming Platform Encoder allowing the programming of a configured iCLASS Credential with the appropriate facility code and other information from Asure ID.

FARGO HDP Printers and Asure ID are products from HID Global. Go to [www.hidglobal.com > Solutions > Fargo Printers](http://www.hidglobal.com) to find your local Authorized Integrator.
iCLASS Programming Platform Ordering Guide

The iCLASS Programming Platform consists of configured cards, an encoder and smart cards used in combination with an HDP printer and Asure ID software. When completing this order, ensure discussing all choices with the user.

Configured iCLASS Programming Platform Cards

Ensure checking each required option with the appropriate choice to fulfill a completed order.

### Base Model
- **200 Standard PVC**
- **210 Composite 40% Polyester / PVC** *

### iCLASS Memory Size and Allocation (Check One)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 1 - 16k Bits (2k Bytes) with 2 Application Areas
- 2 - 16k Bits (2k Bytes) with 16 Application Areas
- 3 - 32k Bits (4k Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4k Bytes) Application areas 16k/16+16k/1

### Programming (Check One)
- **C** - Configured, Non-Programmed iCLASS. Programming Information Not Required.

### Front Packaging (Check One)
- **G** - Plain White with Gloss Finish

### Back Packaging (Check One)
- **G** - Plain White with Gloss Finish

### Card Numbering* (Check One)
- **N** - No External Card Numbering

### Slot Punch (Check One)
- **N** - No Slot Punch (Printed location of vertical slot punch will remain)

Enter your final card options from checked boxes above. Example: 2001CGGNN

<table>
<thead>
<tr>
<th>Final Part Number</th>
</tr>
</thead>
</table>

* Cards ordered with plain white front and back packaging still have a small HID logo and reference number printed in the lower left-hand corner

* The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.

### iCLASS Programming Platform Encoder
- **089182** H5K-SDI-ENCODER – contains docking station for insertion into the HDP Printer bay two (2)
- **089181** H5K-SDI-ENCODER – for insertion into the HDP Printer bay zero (0)

### iCLASS Programming Platform Smart Card

Customers should choose VCI-SCCC if they wish to use any card number contained within the range permitted by the format number selected.

For example, format number H10301 allows for 65,535 card numbers and customers who select VCI-SCCC use any of those numbers.

VCI-SCCF restricts the card number to the next in the series. If the customer has previously ordered and used card numbers 1 – 50, the next set of numbers start at 51. Using VCI-SCCF prevents duplication of card numbers within the facility code and format range.

#### Facility Code:

Corporate 1000 Format Request & Authorization Form

Corporate 1000® is a 35-bit card format that is developed specifically for use by individual end-user organizations. Organizations must qualify, formally enroll and be accepted by HID Global Corporation.

The Corporate 1000 Format is offered to large, multi-location, and end-user organizations which use HID access control readers and cards. In this program, the end-user has the flexibility to choose any access control hardware/software platform and any HID System Provider. As the end-user utilizing the Corporate 1000 Program, fill in your company information in TABLE 1. Ensure all fields are complete for the primary and secondary (if desired) authorized contacts within your company.

Table 1: Your Company’s Primary and Secondary Contacts

Card numbers available within the Corporate 1000 format are 0 – 1,048,575.

Indicate the card number in which your first order should start: Enter start number here.

All card numbers following this number will be “blocked” from use. If you do not specify a card start number, your first order will start at one (1). Should you require assistance, contact your systems provider or HID directly.

Added card security:
- Invisible Ink
- Advantage OVD
- Hologram
- Micro-fine Printing
- Signature Panel

Once accepted into the Corporate 1000 Program, HID shall grant a royalty free license to use the Corporate 1000 Format within your organization. Please sign below to enroll in this program and to confirm your acceptance of the License Agreement.

ACCEPTANCE OF HID CREDENTIAL PROGRAM LICENSE AGREEMENT

The undersigned party hereby accepts and agrees to be bound by the terms and conditions of the HID Credential Program. License Agreement is located at www.hidglobal.com/pdfs/credential_license.pdf, pursuant to which a license is granted to the undersigned party authorizing the use of certain credential formats in connection with participation by the undersigned in the HID Corporate 1000 Program.

Dated: ___________________________  Authorized Signature: X

Company Name: ____________________  Contact Name: ____________________  Title: ____________________

To ensure the security of your card format, authorize any HID System Provider to purchase and manage your Corporate 1000 cards on your behalf. Enter authorized HID System Provider information in Table 2, and HID System Installers in Table 3.

Use this form to communicate all authorization concerning your Corporate 1000 format. It is recommended for each end-user to maintain an original copy of this form listing all authorizations.

Issued Corporate 1000 Format No.: ______________ Entered by HID Global after approval.
The iCLASS Elite/Custom Format program includes a credential format and custom authentication key. Use any format, including the HID Corporate 1000 format. Corporate 1000 is a 35-bit card format available for qualified end-users by formal enrollment and acceptance by HID Global. A custom authentication key provides increased security. HID assigns the key to guarantee uniqueness, and programs the site-specific readers and credentials.

With the iCLASS Elite/Custom Format program, the end-user has the flexibility to choose any access control hardware/software platform, or any HID System Provider. As the iCLASS Elite/Custom Format program end-user, enter your company information in the table below. Ensure all fields are complete for the primary and secondary (if desired) authorized contacts within your company.

Enter the program features:

35-Bit Credential Format, if different, enter: ____________

Custom Authentication Key

Once accepted into the iCLASS Elite Program/Custom Format, HID shall grant a royalty free license to use the iCLASS Elite/Custom Format Program within your organization. Please sign below to enroll in this program and your acceptance of the License Agreement.

### ACCEPTANCE OF HID CREDENTIAL PROGRAM LICENSE AGREEMENT

The undersigned party hereby accepts and agrees to be bound by the terms and conditions of the HID Credential Program. License Agreement is located at [www.hidglobal.com/pdfs/credential_license.pdf](http://www.hidglobal.com/pdfs/credential_license.pdf), pursuant to which a license is granted to the undersigned party authorizing the use of certain credential formats in connection with participation by the undersigned in the HID iCLASS Elite/Custom Format Program.
