

HID Global COVID Pass Verifier

THE COVID PASS VERIFIER

Our COVID Pass Verifier authenticates a COVID certificate's QR code instantly, and in any orientation. Decoding the information contained within the code, it delivers clear audio and visual feedback that the holder's COVID certificate is genuine and that they are vaccinated against or have tested negative for COVID-19. The COVID Pass Verifier supports the EU Digital COVID Certificate for the European Union member countries as well as COVID certificates of over 20 non-EU member countries such as the United Kingdom.

Our COVID Pass Verifier has built-in OCR reading to allow passports or any ICAO 9303 identity document to be read. When enabled, this functionality allows a crossmatch to be made between the COVID certificate holder and an ID document.

When an ID document match is not required, we can perform a QR code read and authentication of the EU Digital COVID Certificate.

TYPICAL APPLICATIONS

- Corporate/Enterprise for visitor or employee building access
- Entertainment venues, including sports stadia, concert venues and casinos
- Hospitality, including hotels and wedding venues
- Retail

THE EU DIGITAL COVID CERTIFICATE

The EU Digital COVID Certificate is proof that a person has either:

- Been vaccinated against COVID-19
- Received a negative test result or
- Recovered from COVID-19

Key features of the certificate:

- Digital and/or paper format
- QR code included
- Written in national language and English
- Safe and secure
- Valid in all EU countries

HID Global's COVID Pass Verifier is compatible with GDPR and data is only read for validation purposes and is never stored.
