ACCELERATION OF TECHNOLOGY ADOPTION:

- Remote access
- Remote monitoring
- Video conferencing tools
- Smart devices
- Widespread internet usage

WIDER SERVICES:

- Better access to healthcare
- Reduced waiting time
- Chronic disease prevention

COMPLIANCE WITH LOCAL REGULATIONS:

- HIPAA
- PHI
- GDPR
- Hospital Future Act (KHZG)

How HID Helps Digitize MODERN HOSPITALS

My workday begins as I arrive at the hospital, where my contactless card allows me to enter any location I need to access.

I can easily read updated information on my patients from any secure workstation in the building.

A new patient tells me their symptoms while a colleague securely prints a patient's records or forms for my review.

Controlled substances are secure in the pharmacy and require my ID authentication to access and provide for patients.

I am able to read my new patient's records on a tablet or mobile phone and determine a diagnosis without fear of misinformation or incorrect records.

I am able to spend less time with IT and more time delivering quality care for my patients.
