

Facial Recognition

ELEVATING THE EMPLOYEE EXPERIENCE

1

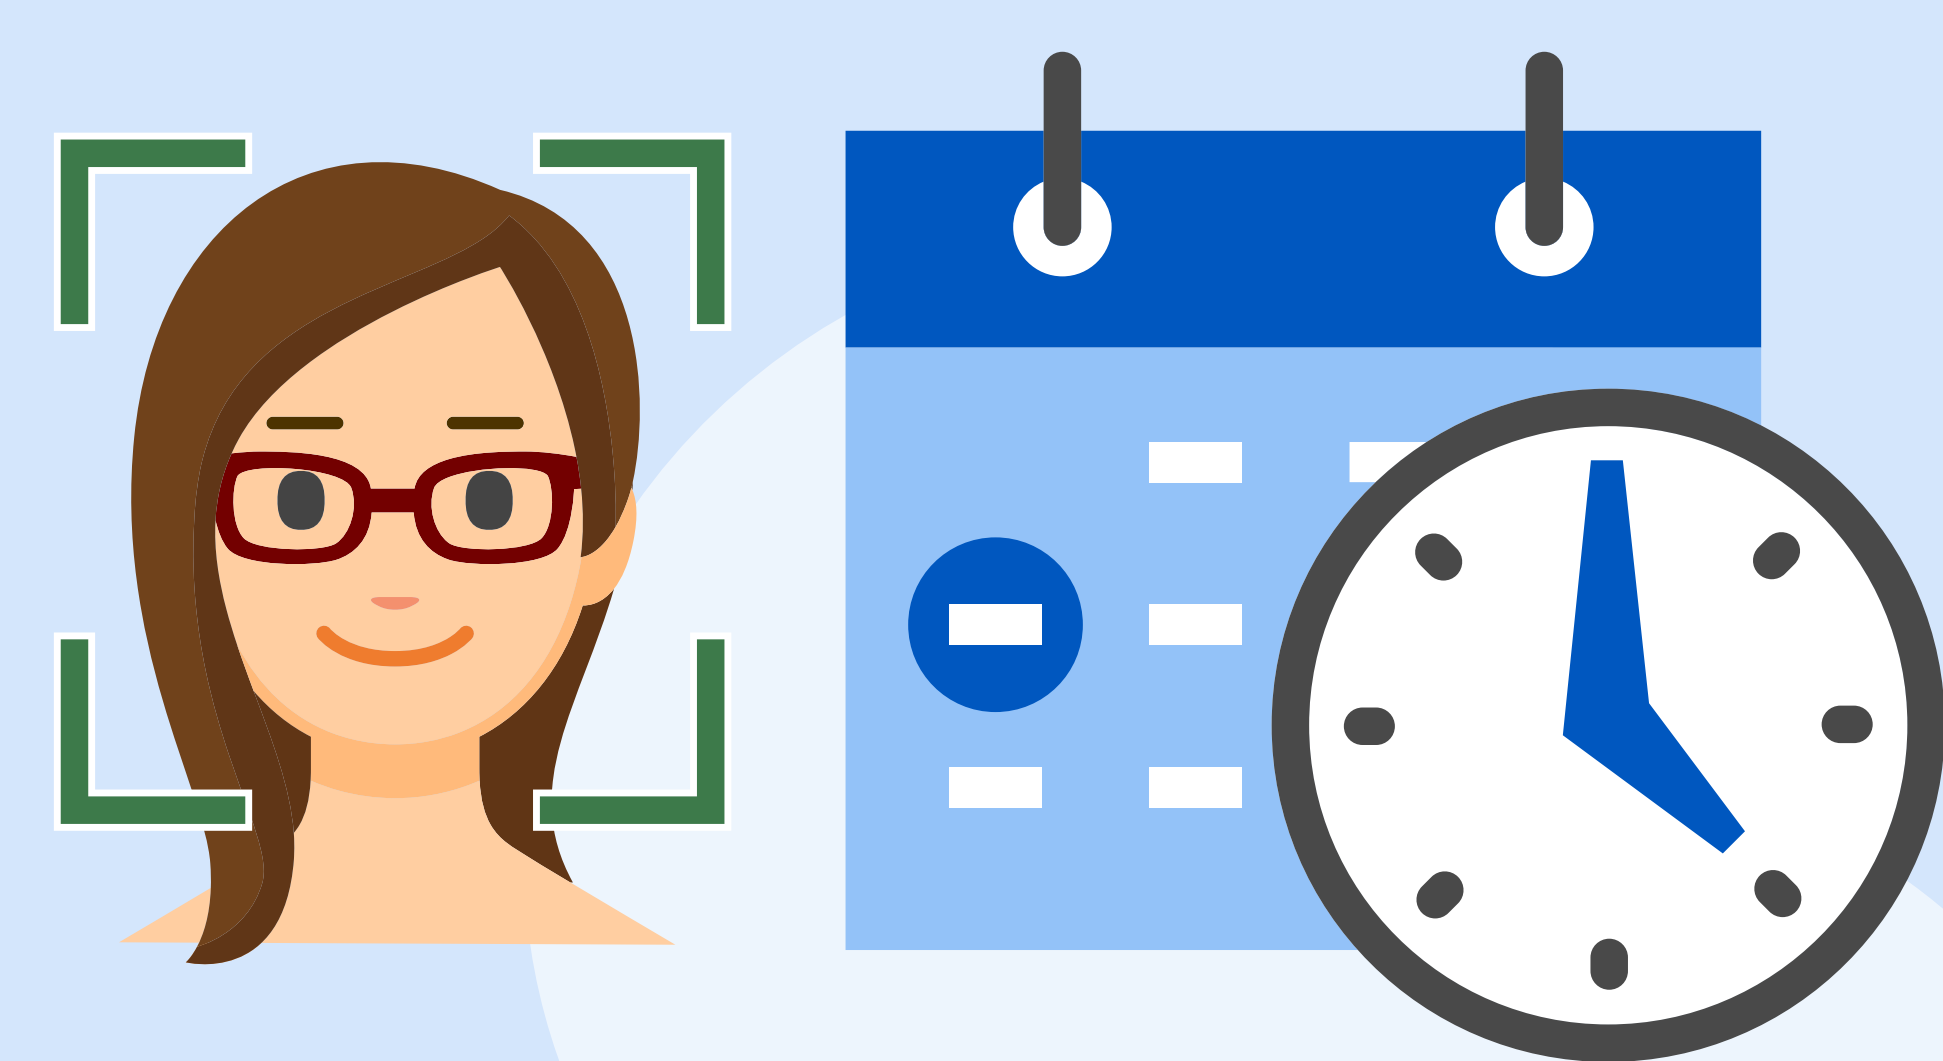

Employee Enrollment

Employees can enroll into the company's database utilizing just their faces and a government-issued ID.

2

Time and Attendance

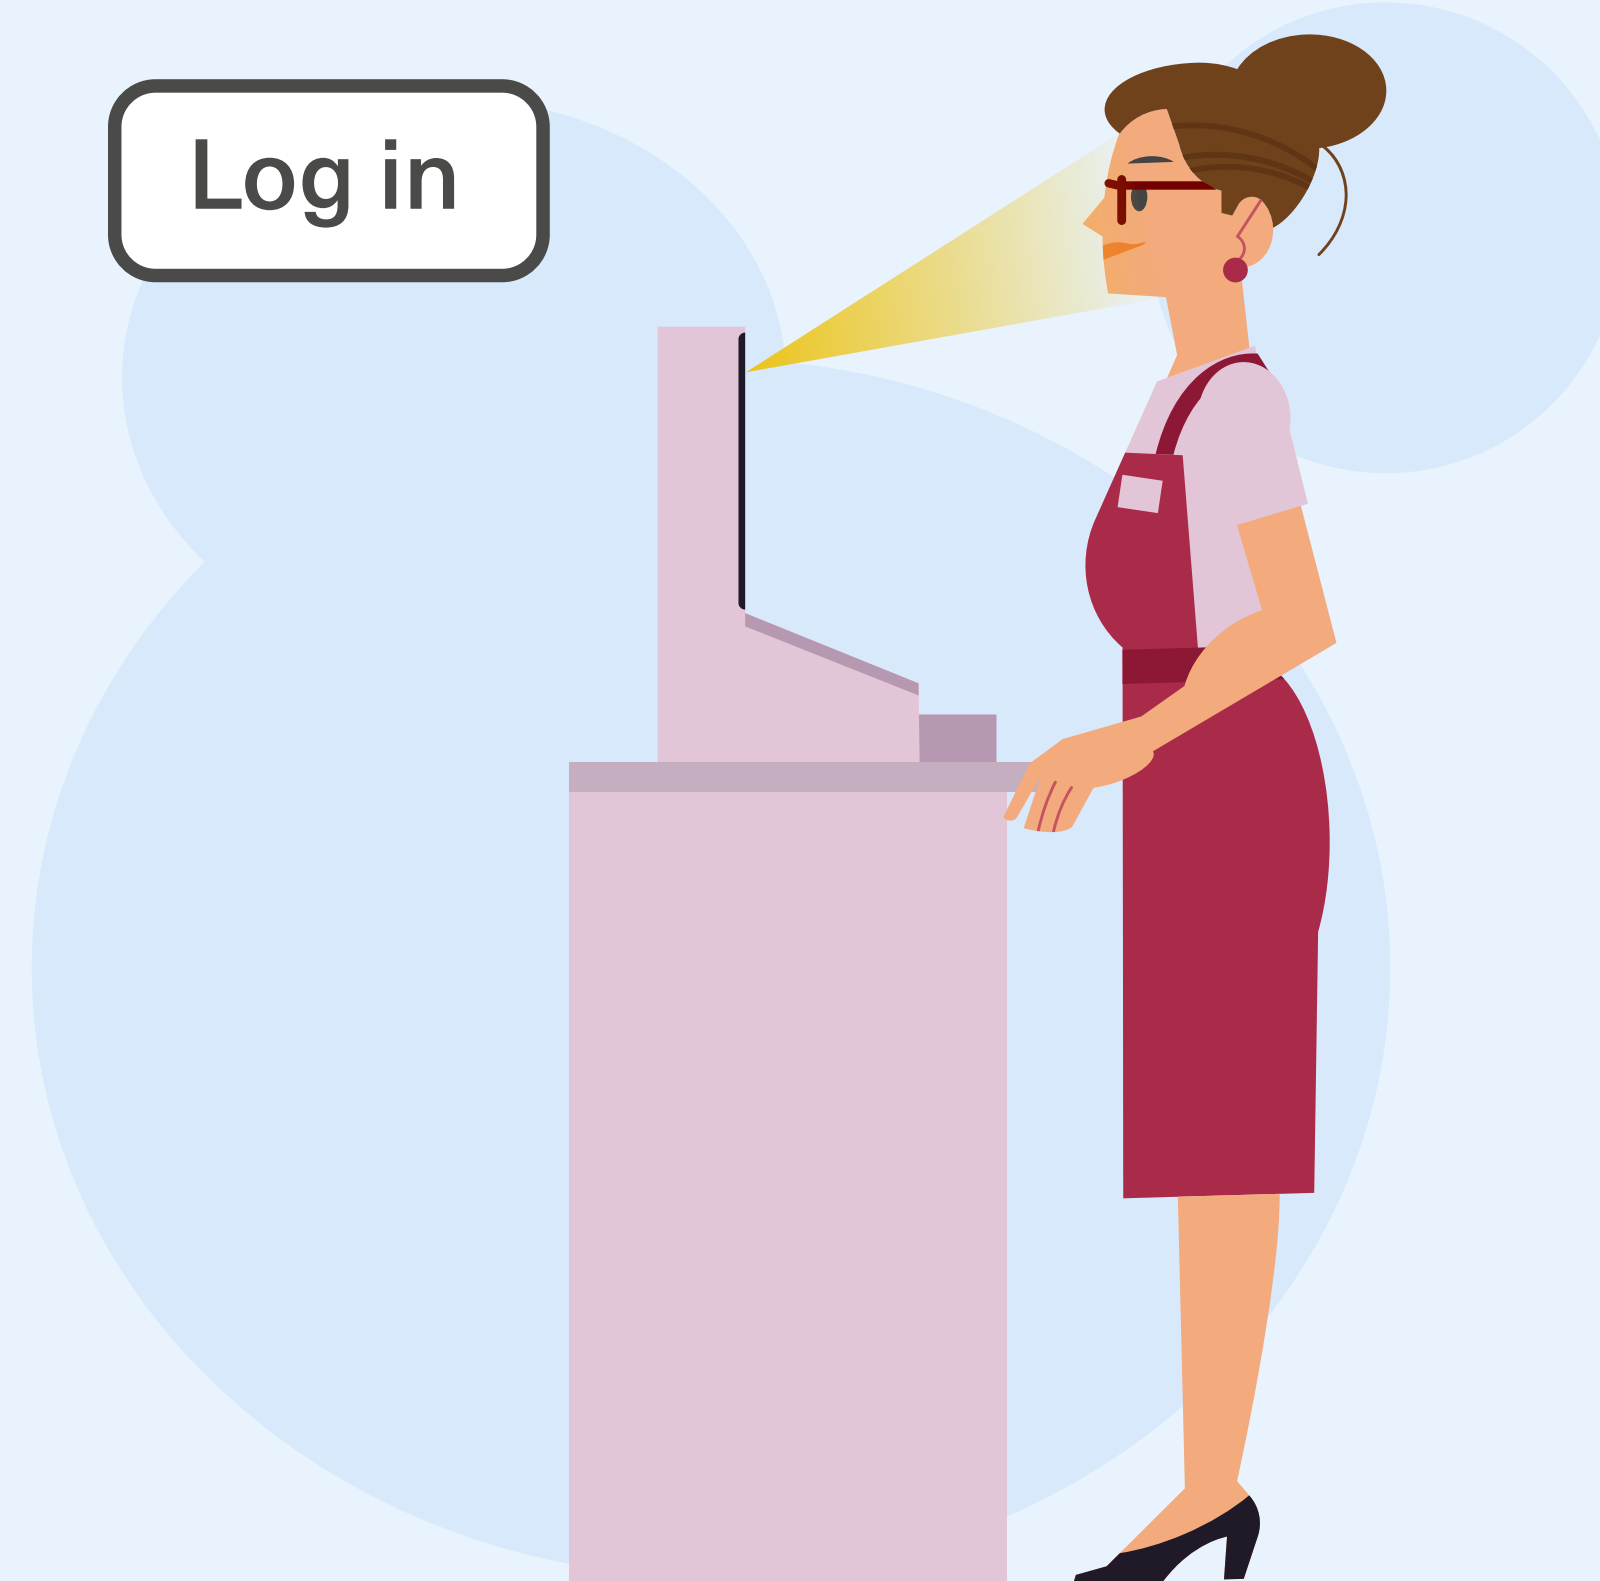

Employees can use their faces to clock in and out for automatic attendance tracking.

3

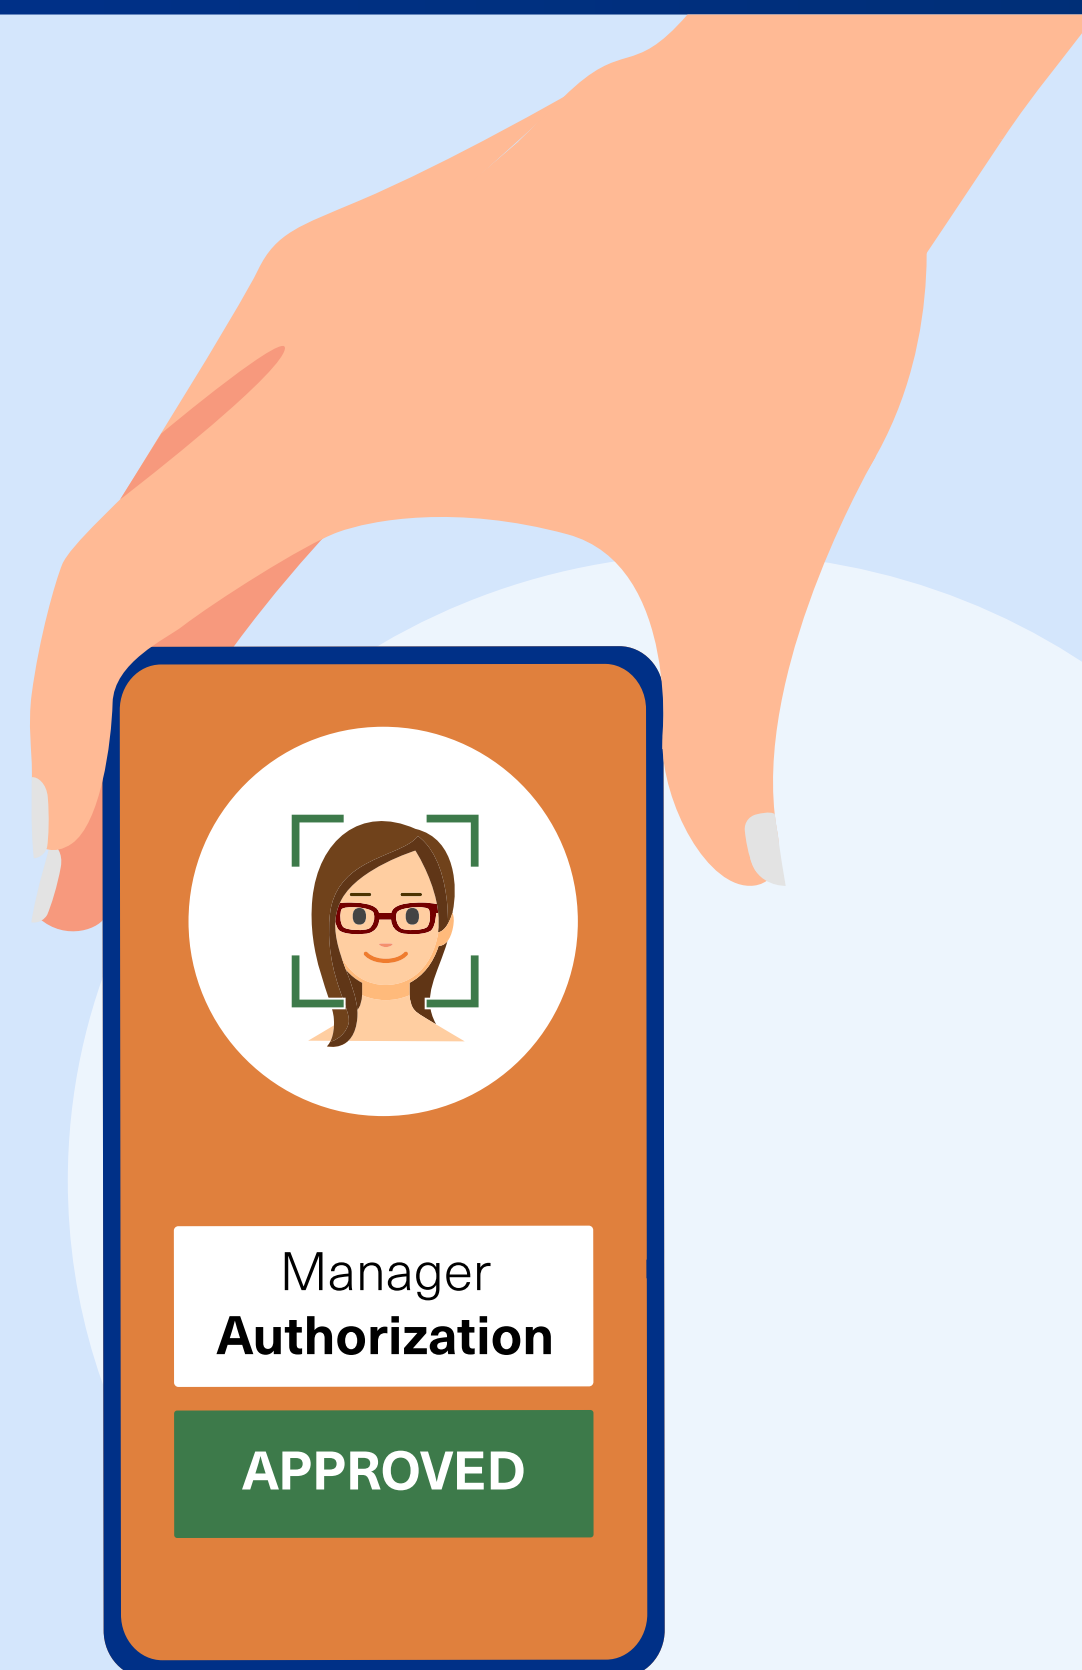

POS Terminal Log-In

Store associates can use their faces to log in to the POS terminal quickly and seamlessly.

4

Manager Overrides

Store managers can securely authorize overrides, returns and voids – anywhere in the store via a mobile device or at the POS terminal.

5

Till Transfer

Cashiers can seamlessly change shifts using just their faces, resulting in shorter customer wait times.

How Facial Recognition Benefits You and Your Employees

- Improves workplace security and efficiency
- Automates employee attendance tracking, ensuring accurate pay and compliance to labor laws
- Simplifies POS terminal log-in without having to enter long usernames and passwords
- Enables a touchless experience for a more hygienic working environment
- Speeds checkout with fast and seamless till transfer and manager overrides
- Faster checkout improves the customer experience, resulting in greater employee job satisfaction
- Boosts employee morale and reduces employee turnover
