RP9000 BGR Printer
For Check-in and Boarding Gates

SIMPLE AND RELIABLE RECEIPT PRINTING

The RP9000 boarding gate receipt printer provides a simple and reliable means to print receipts at airport check-in and boarding gates. It can be used to facilitate seat assignment for passengers boarding with 2D barcoded boarding passes on home-printed documents or electronic media. In addition, it can be used to offer frequent flyer points receipts. As a plug-and-play accessory to the HID Global's range of boarding gate readers, the RP9000 is simple to deploy.

LOW-COST CHECK-IN PRINTER

The RP9000 printer, via its USB interface, can also be employed as a low-cost check-in printer. Using a supplied USB driver, boarding passes can be easily printed using Windows' spooler mechanism.

MAXIMIZES THROUGHPUT

The compact design incorporates a large 90mm diameter paper roll, providing 92 meters of paper which minimizes operational disruption caused by roll changes.

ACCESSORIES

The quick release bracket for the RP9000 BGR printer provides a simple means to secure the printer to counter-tops or podiums, preventing it from being damaged or stolen and acting as a simple but effective deterrent to agents relocating the hardware.
APPLICATIONS

- Printing boarding passes at check-in desk
- Seat assignment for passengers with electronic or home-printed documents
- Seat assignment changes at the gate
- Frequent flyer points receipts

FEATURES:

- Passenger Experience - Simplifies passenger boarding saving time
- Big Capacity - 92-meter paper roll capacity with greater than 1100 passengers between changes
- Easy Operation - Compact and rugged design with fast, quiet operation
- Simple Integration - 'Plug and play' with HID Global's boarding gate reader
- Saves Time - Eliminates 'cutting and sorting'
