

## Simple Verifier

The ultimate age verification tool

### RELIABLE AGE VERIFICATION WITH JUST ONE CLICK

The simple verifier is a small, cost-effective yet secure verification tool dedicated to confirming a citizen's age on a HID goID™ mobile identity. Thanks to its convenient and simple design, the verifier is easily operated with a single hand, allowing users a true mobile verification experience.

#### Easy on-the-go verification

Thanks to its light weight and small size, the simple verifier fits in any pocket—or even on a keyring. Because the device serves only one function—reading the age of the mobile ID holder—verification is quick and efficient. Fast-moving environments such as bars or clubs can quickly verify a customer's age to ensure legal entry or alcohol service.

#### One-click authentication

Verification with the simple verifier can be performed with a single click. Thanks to BLE®\* technology, there is no need to scan or tap the holder's device. The simple verifier generates a random code and securely transfers it to the goID mobile ID. The verifier then confirms the ID holder's age by comparing the code on the verifier with the one on the phone.

#### Trusted verification process

During verification between the simple verifier and the goID mobile ID, cryptographic security protects the data of the mobile ID holder and ensures the integrity and confidentiality of the data. In other words, data on the goID mobile ID cannot be altered during the verification process, enabling maximal reliability of the mobile ID and of the verification process itself.

#### Easy verifier management

The simple verifier is managed by an intuitive verifier management app. The management app provides all the tools required to manage one or more verifiers at the same time. The managing smartphone establishes a BLE® connection with the verifiers to easily enable version updates, monitor battery status, and activate or disable verifier units.

\*Standard 4.0 Low Energy (LE)

## SPECIFICATIONS

<b>Product Name</b>	<b>Simple Verifier</b>
<b>Housing</b>	
<b>Dimensions</b>	1.77" X 1.53" X 0.44" (45 X 38 X 11 mm)
<b>Weight</b>	30 g (1.01 oz)
<b>Communication</b>	
<b>Bluetooth®</b>	Standard 4.0 Low Energy (LE)
<b>Human interface</b>	
<b>Display</b>	Up to 8 numerical characters
<b>Keypad</b>	1 button
<b>Battery</b>	
<b>Battery change</b>	Self-changeable
<b>Operating Condition</b>	
<b>Operating Temperature</b>	14°-113° F (-10° to 45°C); 85% rH non-condensing
<b>Storage Temperature</b>	14° -122° F (-10° to 50°C); 90% rH non-condensing

## VERIFIER MANAGEMENT APP

<b>Operating System</b>	Android
<b>Communication</b>	
<b>Bluetooth®</b>	Standard 4.0 Low Energy (LE)
