Flexible Solutions For Every Program

GOVERNMENT ID SOLUTIONS
GOVERNMENT ID PROGRAMS

Advanced Solutions, Custom Combinations

Selecting the right government identification solution is a complex task that is further complicated by the need to customize solutions for widely differing requirements and risk profiles. HID Global provides an unparalleled breadth and depth of services, solutions and expertise across all aspects of the government identification market. HID provides the industry’s widest range of secure, flexible and uniquely differentiated offerings, from card manufacturing skills and market-leading products to customizable, in-house technologies and expert professional services. Backed by decades of experience, HID Global has forged trusted relationships with governments, partners and service providers worldwide.

From streamlined projects to highly complex ID programs, HID meets the most demanding requirements for security, quality, and effective program execution.

Uniquely positioned
HID Global’s Government ID Solutions enable the delivery of government services, protect citizens and secure borders. As the only company with leadership in four key ID product segments — e-documents, readers, personalization solutions and credential issuance systems and the professional services to support them — Genuine HID solutions are relied upon in major programs including national ID, foreign resident/worker ID, passport programs, driver’s license and vehicle registration programs.

From component supply to integrated solutions delivery, HID Global participates in the world’s most prestigious government ID projects including 27 e-passport programs and 49 national ID/e-ID programs. HID’s reader technology is used by five of the world’s major document reader suppliers, and is deployed in government projects internationally.

Unmatched breadth and depth of offerings
- Data capture and card management solutions
- State-of-the-art credentials, printers and readers
- e-Document components (e-passport inlays, prelaminates)
- LaserCard® Optical Security Media

WHY GENUINE HID?
- Broadest portfolio of interoperable secure identity solutions
- Customer references from major governments worldwide
- Global partner network
- Modular, flexible approach

EXPERTISE IN:
- Citizen ID/voter registration
- Foreign/permanent resident ID
- e-Passports and readers
- Driver license & vehicle registration
- Health applications

**Government-to-citizen ID focus**

HID Global designs and manufactures individual technologies and integrated solutions tailored to specific program needs. HID’s broad portfolio of interoperable, in-house technologies and components facilitates program implementation and reduces the risks associated with integrating systems from multiple suppliers.

End-to-end control over engineering, manufacturing and quality ensures an integrated, cost-effective approach.

**Proven in the field**

- Over one billion transponders deployed
- More than 120 million ID1/ID3 contactless e-passport/e-ID components provided
- Over 30 million high security cards delivered

**Partnering with you, start to finish**

HID Global offers flexible Professional Services to design, secure and deliver tailored solutions for government ID projects. HID’s technical and program expertise allows us to provide government customers a single component or an entire system — from enablement and enrollment, through card issuance, authentication and management. Throughout the process, HID Global works with select partners to deliver optimum results.

**Genuine HID**

With Genuine HID, customers benefit from the broadest product line of trusted, fully interoperable secure identity solutions in the market. Genuine HID solutions are designed and built in ISO 9001 certified facilities; include worldwide agency certifications; and are backed by global product warranties. Supported by industry-leading expertise and the strongest delivery and response platform available, Genuine HID solutions reinforce the long-standing trust that when customers purchase from HID Global, they are investing with absolute confidence.
