

# Future-Ready Identity and Access Management

## **SMART, CONNECTED ID BADGING AND PROVISIONING USING HID® SAFE™ WITH HID® FARGO® CONNECT™**

Smart Onboarding provided by HID SAFE with HID FARGO Connect is moving healthcare organizations forward by automating the manual, human error prone process of issuing and provisioning ID cards. HID SAFE with FARGO Connect—a web-based or on-prem solution—is helping healthcare organizations reduce costs, minimize complexity and mitigate risks in managing physical access and credentials in hospitals and clinics. Discover how to simplify the complex badging—with HID SAFE's integrated, future-ready identity management solution.

[hidglobal.com](https://hidglobal.com)

When it comes to identity management, most organizations only focus on their employees, but there are many other people moving within a healthcare organization on any given day—each with different identities and access rights. Using a central, automated and integrated badging system helps healthcare organizations to reduce the costs and risks associated with managing the physical access of your employees and contractors. In addition, using a web-based issuance and provisioning solution offers flexibility, efficient workflows and a holistic view of your security.

## SECURE REMOTE ISSUANCE

Safely and securely send print jobs to remote locations without having to keep printers in a locked room when using HID SAFE with HID FARGO Connect. This saves time and money by eliminating shipping costs while also providing advanced visibility of consumable levels so you are always ready.

## STREAMLINED, EFFICIENT WORKFLOWS

These efficiencies allow you to design, create and print employee and contractor badges from anywhere, using any device without having to download or install software.

## A HOLISTIC VIEW OF YOUR HEALTHCARE ECOSYSTEM

HID SAFE with FARGO Connect makes identity management easier for users and administrators by offering pre-defined rules and workflow, approvals and audits for highly secure areas and a centralized location to assign access and access levels. Having a holistic view of who is moving within a hospital or clinic helps mitigate risk and manages the lifecycle identity from issuance to termination.

The Future of ID badging and providing is using HID SAFE with FARGO Connect—a single, web-based solution to manage the identity lifecycles of any identity that moves within a healthcare environment.

**Smart healthcare organizations know that you should not have to use one system to manage credentials and another to print ID cards.**
