

# PEOPLE, PLACES & THINGS

## PEOPLE

Daniel Venson is always up for a challenge. Whether it's the physical challenge of striving to perfect his martial arts practice or the countless opportunities for innovation that come from working in a cutting-edge manufacturing field, the thrill of conquering problems propels Daniel.

## PLACES

As an open campus with uncontrolled access, Cervantes High School had many daily, unauthorized visitors coming onto the school grounds. Likewise, the campus had experienced a worrisome rise in thefts.

## THINGS

HID<sup>®</sup> FARGO<sup>®</sup> Connect creates a new approach for ID issuance that replaces the old paradigm of standalone printers tied to a dedicated PC workstation. For the first time ever, ID cards can be issued from anywhere and from any device via a web interface in a trusted environment.

## DANIEL VENSON

Operations Project Manager - Austin, Texas

Daniel Venson is always up for a challenge. Whether it's the physical challenge of striving to perfect his martial arts practice or the countless opportunities for innovation that come from working in a cutting-edge manufacturing field, the thrill of conquering problems propels Daniel.

Daniel, Operations Project Manager at HID Global in Austin, Texas, began his career in Industrial Engineering. With an eye for detail, the inclination to innovate, and a knack for people, moving into management was a natural fit.

Now, at HID Global Daniel leads a top-tier team that ensures efficiency and drives the implementation of new processes for HID Global's manufacturing operations. He is drawn to the way the work tests his skills and he credits the study of martial arts for providing a blueprint for life.

"But nothing motivates me as much as my daughters. I want to be the role model they deserve," says Daniel. Daniel is a leader and an innovator at HID, a role model. He combines his technical background with

creative problem solving to lead a small team that makes a big impact.

"I like to tell people that it feels like being a small business owner," says Daniel. "I work for a larger company, but everyone's voice is heard and makes an impact. Everyone is empowered and everyone has a stake in what we do."

The challenges and victories motivate Daniel, but he applauds the culture of care at HID. The top-down belief in personal and family time, and supporting rest that reinvigorates creativity. For Daniel, that R&R comes on boat trips with his family and enjoying Texas outdoors.

"I'm not just working to pay for boat gas though," says Daniel. "I'm part of a team of stars who work on projects that push and challenge me. Facing challenges shapes who I am and I'm proud of my work."

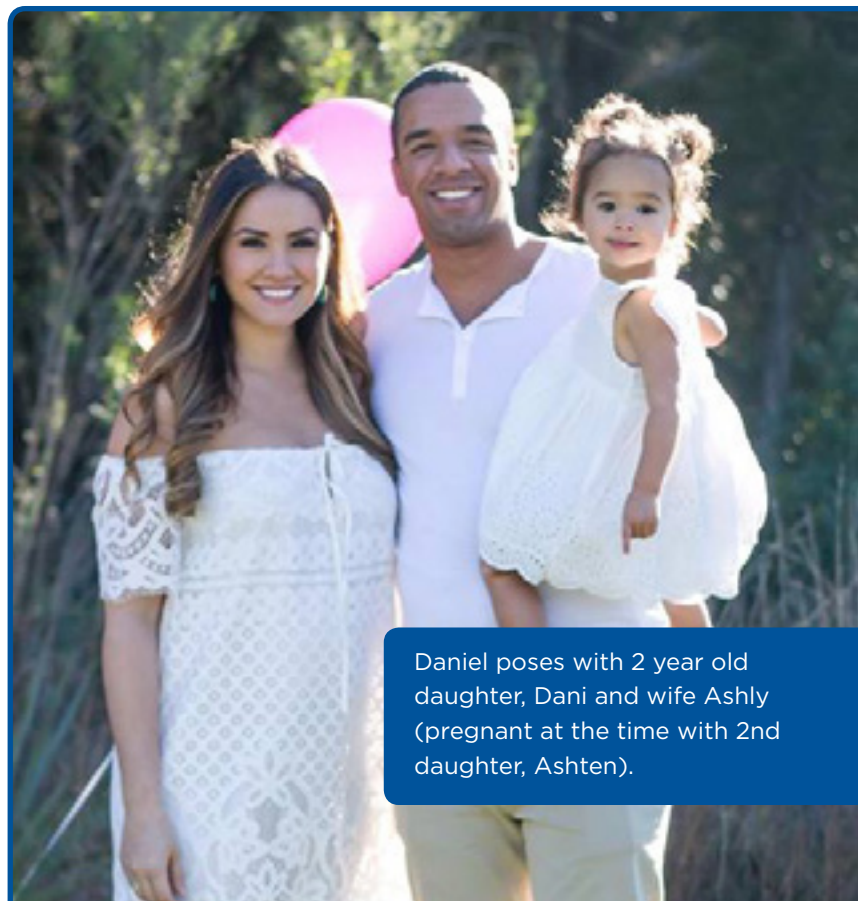

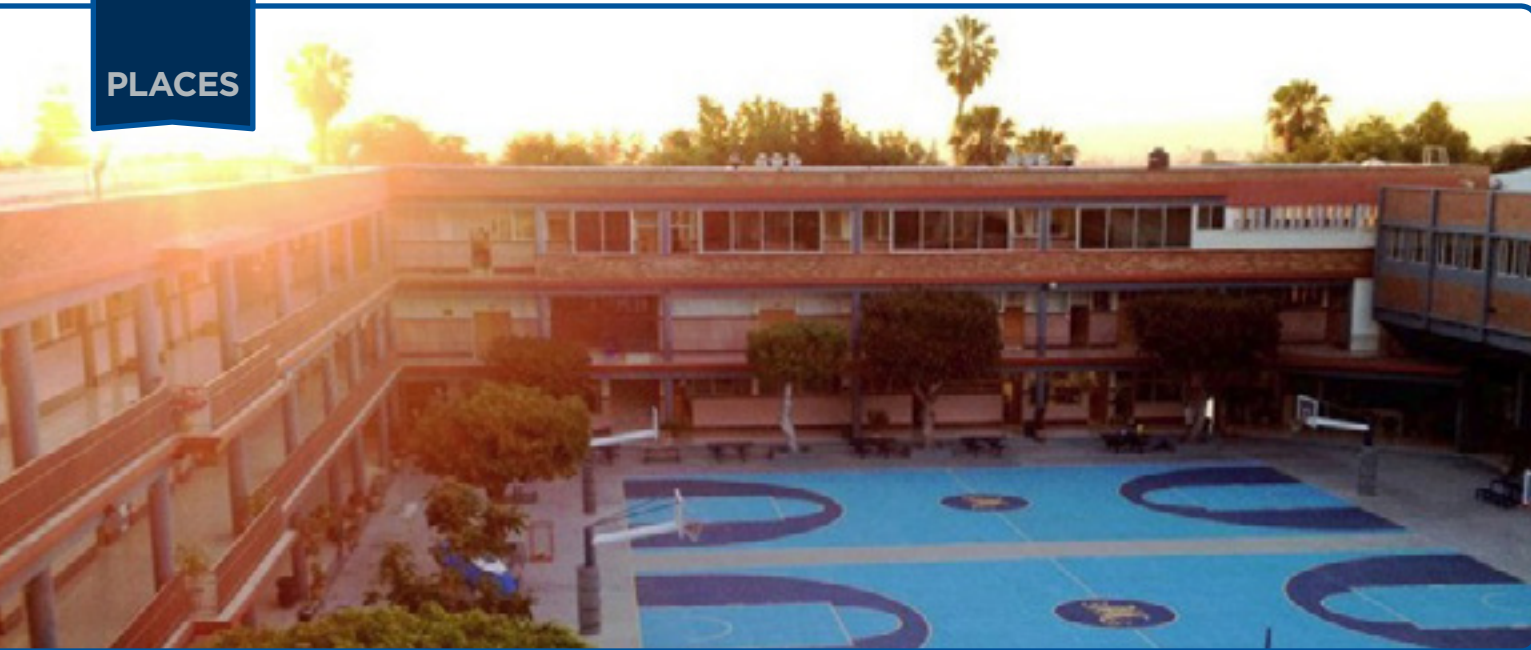

Daniel seen here with his prize catch, a 115 pound striped marlin caught off the coast of Cabo San Lucas, Mexico.

Daniel trained with the founder of Brazilian Jiu Jitsu's grandson - Kayron Gracie.

Daniel poses with 2 year old daughter, Dani and wife Ashly (pregnant at the time with 2nd daughter, Ashten).

# CERVANTES HIGH SCHOOL

Guadalajara, Mexico

## **HID Global Helps Create a Safer Learning Environment for Students, Faculty and Staff for High School in Mexico.**

As an open campus with uncontrolled access, Cervantes High School had many daily, unauthorized visitors coming onto the school grounds. Likewise, the campus had experienced a worrisome rise in thefts. None of the entrances to the institution were controlled and anyone could easily enter and walk around the premises, including people who did not belong there. It had become increasingly urgent that the administration be able to control all school access and keep a real-time record of staff, students and visitors on campus.

Taking advantage of a major modernization program, Cervantes High School implemented the HID Mobile Access® solution at school entrance turnstiles to better protect what had previously been an open campus with uncontrolled access, and provide a convenient way to carry campus IDs on mobile phones. The school has issued approximately 1,500 Mobile IDs,

along with the same number of Seos® cards to offer users the freedom of using either their phones or smart cards to quickly and easily gain access to any campus entrance point. Both options feature strong cryptographic security to minimize any possibilities of ID cloning or fraud.

“Being able to present campus IDs using their mobile phones has been particularly attractive to students because of its convenience and novelty,” said Marist Brother Alejandro González González, Principal with Cervantes High School, Guadalajara. The system has not created any bottlenecks at school entrances, and the administrative process has proven to be very simple. In addition to creating a safer and more easily accessible campus, HID Mobile Access has made the Cervantes community proud to be at the forefront of technology developments. The solution is so effective and easy to use that the school is now exploring opportunities to use their Mobile IDs and Seos cards for controlling access to classrooms, as well.

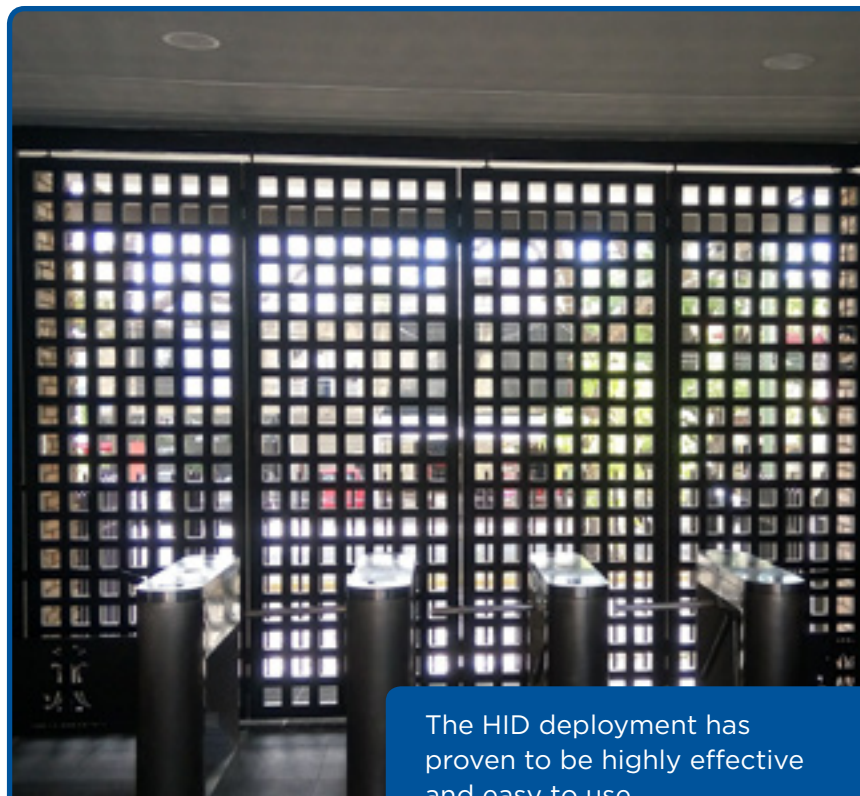

“We are very pleased that innovative HID technology has made the Cervantes community feel safer and proud to be at the forefront of exciting new campus innovations, said Harm Radstaak, Vice President and Managing Director of Physical Access Control Solutions with HID Global.

Cervantes School has now issued approximately 1,500 each of the Mobile IDs and Seos cards.

The HID deployment has proven to be highly effective and easy to use.

# HID FARGO CONNECT

## **HID Global Unveils the World’s First Cloud-Based Personalization and Issuance Solution for Cards and Printers**

September 26, 2017 --HID Global introduced HID® FARGO® Connect, the industry’s first cloud-based solution that simplifies and streamlines the issuance of ID cards and credentials.

HID FARGO Connect creates a new approach for ID issuance that replaces the old paradigm of standalone printers tied to a dedicated PC workstation. For the first time ever, ID cards can be issued from anywhere and from any device via a web interface in a trusted environment. HID FARGO Connect allows you to remotely monitor and manage your consumables helping you to avoid out of stock issues and better manage your replenishment processes.

“HID FARGO Connect is the biggest innovation that the ID card issuance industry has seen in more than a decade, and with it, HID is changing the way cards and credentials are issued forever,”

said Craig Sandness, Vice President and Managing Director of Secure Issuance with HID Global.

Among the first to use HID FARGO Connect is Kent State University. The process of issuing student IDs to thousands of people during orientation has been simplified and streamlined through its shift to a cloud-based approach with HID FARGO Connect. The student experience has significantly improved, aligning with the university’s students-first priority.

“As one responsible for issuing thousands of IDs at our Kent Campus and at our other sites, I see HID FARGO Connect as providing us a next-generation platform for producing cards for our students that impacts them in only positive ways,” said Michael O’Karma, Office Systems Coordinator for Flashcard Operations, Kent State University. “The advantage to the students is that they do not have to wait in line any longer, and the advantage to us in the administrative office is that we can provide a better service that’s more cost-effective and efficient.”

Kent State University shares their experience using HID Fargo Connect
