

# EPCS Multifactor Authentication

Healthcare providers can benefit from the convenience of HID's solution for approval and submission of e-prescriptions.

### Turning Products Into Solutions

HID Professional Services can help healthcare providers with implementing a convenient prescription submission process that complies with DEA regulations for Electronic Prescriptions for Controlled Substances (EPCS) issuance.

Qualified healthcare provider personnel can benefit from integrating HID solution components, within their electronic prescription submission process. This specific solution enables strong authentication of an employee's identity using multifactor authentication to the Electronic Medical Record (EMR) database prior to submitting a prescription for a controlled substance. This solution offers different modes of authentication: Public Key Infrastructure (PKI), One Time Password (OTP) or Biometric authentication using best in class Lumidigm fingerprint sensors.

The HID EPCS Multifactor Authentication solution helps healthcare providers by increasing convenience and reducing security risks.

HID Professional Services™ are sold and delivered through the HID Advantage Partner™ network, together with other Genuine HID® products and solutions. Our goal is to deliver complete solutions that are fully operational and deployed according to best practices, on-schedule and on-budget.

### HID Solution Components

HID Component	Customer Benefits
<b>EMR Plugin and ActivID® Appliance</b>	Allow users to strongly assert their identity using One-Time Password (OTP), PKI or biometric authentication.
<b>IdenTrust® Certificates and ActivID® CMS</b>	Achieve strong identity proofing and compliance with the well-known digital authentication guideline NIST 800-63 Level of Assurance (LOA) 3 and higher.
