

Instant Issuance Solutions for Financial Cards

HID® TRISM™ Financial Instant Issuance
In-branch instant issuance and activation

HID® TRISM™ Financial Instant Issuance

Elevate your card to the top of your customer's wallet

Enhance your customer's experience and strengthen customer loyalty

HID® TRISM™ Financial Instant Issuance from HID Global is an end-to-end Financial Instant Issuance (Fii) solution that enables immediate in-branch activation of payment cards. Customers have come to demand instant access in today's fast-paced world, particularly in the financial sector. With Fii, customers can walk into your bank or credit union branch and instantly receive debit and/or credit cards on site that are already activated for immediate use—enhancing your customers' overall experience while giving your institution a measurable advantage over competitors. What's more, because financial card instant issuance happens face-to-face right in your branch, you gain new opportunities to cross-sell additional financial services and strengthen customer loyalty.

Instantly gain wallet share and increase interchange revenue

More often than not, when customers apply for a debit or credit card, they are in the frame of mind to use it during that application process. HID TRISM Financial Instant Issuance capitalizes on that desire and provides your institution with instant customer "wallet share." Because customers receive and can use their cards immediately with an instant issuance model, activation, usage rate, and interchange revenue outpace central issuance models dramatically. Studies prove that, on average, instantly issued financial cards are used within two hours or less of activation.

Moreover, instant issuance simultaneously drives ongoing revenue by increasing the number of transactions and the interchange revenue for the financial institution issuing the card.

Deliver real-time customer satisfaction

HID TRISM Financial Instant Issuance (Fii) includes a complete software package that runs on your local branch's network and integrates with a wide variety of account processors (APs) and electronic funds transfers (EFTs). Seamless integration eliminates the need for dual key entry and enables real-time card activation—allowing tellers and associates to place ready-to-use debit and credit cards into the hands of customers within minutes.

Flexible licensing programs

HID Global also offers flexible buying and licensing options for today's discerning institutions, including "pay as you go" (Pay-per-Click) or annual licensing fee (ALF) options. Regardless of how you implement your Fii program, with HID TRISM Financial Instant Issuance, you'll have the freedom to choose the licensing model that works best for your institution.

A complete solution

HID TRISM Financial Instant Issuance from HID Global® is a complete solution that includes software, card printers, an HSM, PIN pads, consumables and professional services for program management, implementation, training and ongoing support—all of which can be customized to meet the unique needs of your institution.
