

HID® Identity Verification Service

AN INTUITIVE AND INTELLIGENT SOLUTION THAT CAN BE CUSTOMIZED IN MINUTES AND INTEGRATED IN DAYS

HID Global offers an identity verification solution that improves general security and user-experience, while helping further the organization's compliance to new directives and regulations. The solution runs a suite of advanced technical checks against every customer submission to ensure that identities are thoroughly authenticated and verified. Your business is protected from fraudulent identities that have been tampered with or forged, as you offer customers a more user-friendly onboarding experience.

HERE IS HOW IT WORKS

Components of a streamlined onboarding process.

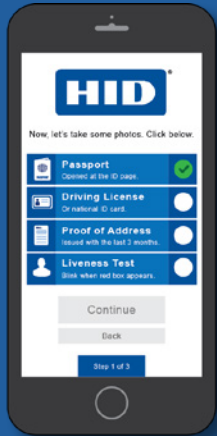

This versatile and highly secure solution allows organizations of all sizes to quickly and securely build a digital onboarding journey, providing:

- **A frictionless user experience** that drastically reduces customer abandonment rates
- **Rapid implementation** thanks to pre-built architecture and cloud-based delivery
- **Low total cost of ownership (TCO)** through streamlined integration and an all-inclusive pricing model
- **Built-in compliance** with eKYC requirements from governmental bodies around the world
- **Higher assurance and better matching** through AI-powered technology and trusted database vetting
- **Peace of mind** from choosing a solution provided by a world leader in identity card and passport manufacturing

KEY FEATURES

- Deployed either through SDK integration or standalone application
- Possibility for white labeling on back-office application and mobile application
- Electronic address verification places an individual at a validated physical address
- Passive liveness detection for more efficient identity fraud prevention. No movement or blinking needed for a smoother user experience.
- 50-point biometric facial comparison
- Supports 4500+ documents across 200+ countries
- Document verification offers a full suite of validations, including tampering and check forgery
- Comprehensive Customer Due Diligence report generated
- Customer’s personal information auto-populated in app
- GDPR-compliant and ISO 27001 certified cloud solution

Easy to implement and simple to use

- Deploy the best **digital onboarding** user experience for your customers
- Ease KYC/AML **compliance**
- Reduce identity takeover and account creation **frauds**
