Multi-Technology
13.56 MHz Contactless and 125 kHz Proximity Cards and Readers
13.56 MHz MIFARE® and DESFire® Contactless Cards and Readers
HID Global is focused on creating customer value as the trusted source for products, services and know-how related to the delivery of secure identity.
With our unique card technology read selection feature, customers have endless card management flexibility, with security and simplicity. The multiCLASS® reader is the ultimate migration tool.

multiCLASS multi-technology card readers combine 125 kHz proximity, magnetic stripe technology and iCLASS 13.56 MHz contactless smart card and reader technologies into a single reader. They are designed for customers who are upgrading their current card system from 125 kHz HID, Indala or AWID Prox and magnetic stripe to HID iCLASS credentials or cards. Readers can also read ISO 14443A MIFARE/DESFire CSN’s, FeliCa IDm’s and FIPS 201 credential formats. The multiCLASS line provides a clear multi-technology migration path for the large installed bases of HID, Indala, AWID and magnetic stripe customers.

All multiCLASS access control readers have been approved by U.S. General Services Administration (GSA) as Transparent Contactless Readers for their FIPS 201 Approved Products List, allowing an agency’s access control system to function properly during the transition from current card technology to the new FIPS 201 card requirements.

Recognized and honored by Access Control & Security Systems magazine as one of the Top 20 new products for 2006, the RP40 multiCLASS card reader reflects the highest level technology innovation in the security industry. multiCLASS comes with a lifetime warranty, and is now available from HID’s network of distributors, OEMs, and system integrators worldwide. Only the RP40 provides true iCLASS security, the ease of Prox (HID Prox, Indala Proximity or AWID), the power of smart cards and the confidence of choosing HID, the worldwide leader in access control.
