

KEY CONSIDERATIONS FOR THE NEW ERA OF WORKPLACE SAFETY, SECURITY AND BUSINESS CONTINUITY

As organizations are entering a new era of the workplace, different security strategies are required to maintain user safety, business continuity and regulatory compliance. Read on to learn about how these strategies can be implemented to keep organizations safe and secure.

Contactless Access Control & Authentication

Create a plan to minimize physical touchpoints for users accessing facilities and applications and reduce the need to physically touch readers or cards

Rapid Onboarding

Use on-prem or in the cloud emergency badging for contractors, new hires and rehires for a streamlined and secure process

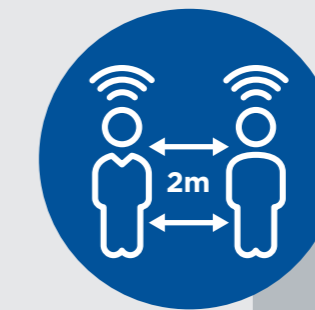

Managing Visitors & Contractors

Issue visitor credentials over the air to reduce or completely remove person-to-person contact both at visitor check-in and check-out

Workplace Density

Optimize the workplace, refine office layouts, manage office density and the flow of occupants throughout a building with IoT solutions

Automated Employee Social Distancing & Contact Tracing

Implement social distancing and contact tracing protocols with tools that are digitized to help modify employee behavior and swiftly perform contact tracing procedures

Risk-Based Authentication

Use risk-based and context-based authentication methods and biometrics to prevent breach and fraud

Actionable, Real-Time Analytics

Enable quantifiable accountability and gain real-time data insight into historical employee interactions and hand hygiene validation to prevent further spread of illness

Password-less Access

Provide access to enterprise resources using high assurance digital credentials

Secure Remote Working

Use advanced security options for remote workers that include one-time passwords, mobile-based push, smartcards, USB keys and biometrics

Office Workflow & Optimization

Utilize occupancy data at the room and floor level to comply with occupancy guidelines and create alerts to comply with social distancing requirements

HID Global is invested in helping customers take the necessary steps and implement solutions that create a safe, secure workplace while also maintaining business continuity.
