Understanding HID Global Readers

What should I know about security keysets?

iCLASS SE® readers and iCLASS Seos™/iCLASS SE credentials offer two keyset security schemes, HID Elite™ and Standard.

The **HID Elite Security Program** supports a unique keyset on a per site/company basis.

The keyset governs a variety of keys, including:

- **Media (credential) keys** for iCLASS SE, SIO-encoded iCLASS, MIFARE Classic® (SIO®) and MIFARE DESFire EV1® (SIO) credentials
- **SIO authenticity and privacy keys** (media independent)
- **Configuration programming keys** (for programming reader configuration, also media independent)

When utilizing HID’s standard key set for the above keys, all standard keyed credentials work with all standard keyed readers. Additionally, any Standard Security configuration card configures a Standard Security reader (only accomplished during the first five (5) seconds after reader powers-up). Conversely, when utilizing the HID Elite program, only site/company specific HID Elite credentials and programming cards work with matching readers.

The **Standard Security Program** provides universal keysets that offer maximized compatibility by keying readers and cards with matching security for use in the general population. This allows for maximized compatibility because readers and cards are not keyed on a per site/company basis but rather all keyed the same. This offers the advantage to the integrator as a standard stock of readers and cards will interoperate for a variety of sites/companies, rather than needing different stocks of readers and cards for each individual site. iCLASS SE readers provide two Standard Security Keysets that offer compatibility with the following credentials:

How can I order HID Elite configured readers?

- Direct customers of HID must be authorized to purchase components with HID Elite keys. If you are not authorized, you must have the key owner authorize you through the Authorization form. See [http://www.hidglobal.com/services/secure-identity/credential-programs/iclass-elite-and-se-elite](http://www.hidglobal.com/services/secure-identity/credential-programs/iclass-elite-and-se-elite).
- Ensure the HID Elite flag is set in the part number (of readers, credentials and programming cards).
- All Purchase Orders for HID Elite components must be ordered with the HID Elite reference number (starts with ICE or MOB).

How can I check the status of my order?

- To check order status, go to: [https://orderstatus.hidglobal.com/WebOrderStatus/](https://orderstatus.hidglobal.com/WebOrderStatus/)
Selecting the Right Reader

In order to make sure our customers benefit from the latest and most secure technology, based on their needs and current situation, HID Global offers a reader product guidance. Follow the suggested route below based on your current credential population, to see what reader solution is recommended by HID Global.

START

Credentials already issued/deployed?

YES

NO

iCLASS Seos and/or HID Prox cards only?

YES

NO

Magnetic stripe cards?

YES

NO

FIPS 201 standard cards (PIV, CIV, CAC, TWIC etc.)?

YES

NO

HID Global recommends:

iCLASS SE - Seos Profile readers

Simplest configuration as well as best-in-class security and privacy protection.

HID Global recommends:

iCLASS SE Magnetic Stripe readers

Backwards compatible with magnetic stripe cards, future capable to support newer credential technologies.

HID Global recommends:

pivCLASS readers

Support for FIPS 201 standard cards (PIV, CIV, CAC, TWIC etc.).

HID Global recommends:

iCLASS SE - Standard Profile readers

Broad compatibility with legacy and new credential technologies, including iCLASS Seos, iCLASS SE, iCLASS and Indala Prox.
iCLASS SE Readers

Note: See Selecting the Right Reader on page 6 for guidance.

iCLASS SE Reader - Seos Profile with Bluetooth Option

Application: Designed to instill confidence with best-in-class security and privacy protection.

Technologies Supported: iCLASS Seos, HID Prox, and HID Mobile Access® Mobile IDs via NFC and/or Bluetooth Smart.

1. Select one option from each of the following sections to construct part number:

Reader Model (Select one model)

- 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
- 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
- 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting and keypad input.

125 KHz Credential Support (Select one option)

- N - No 125 KHz support
- P - Support for HID Prox

13.56 MHz and Bluetooth credential support (Select one option)

- S - Supports iCLASS Seos cards, and Mobile IDs via NFC
- B - Supports iCLASS Seos cards, and Mobile IDs via NFC and Bluetooth Smart.

Controller Communication

- N - Wiegand

Wiring Connection (Select one option)

- N - Pigtail
- T - Terminal strip

Color

- K - Black

Keyset (Select one option)

- 2 - Standard and Mobile-Ready - supports iCLASS Seos credentials with standard keys. Prepared to support HID Mobile Access, but lacks the personalized configuration to read an organization's specific Mobile IDs. This configuration can be ordered at any time but will require field activation after the organization has completed registration for HID Mobile Access.
- E - HID Elite and Mobile-Enabled - supports iCLASS Seos credentials and Mobile IDs. Fully activated and personalized to support an organization's specific Mobile IDs. These readers can only be ordered after the organization has completed registration for either HID Elite or HID Mobile Access. If HID Elite reference (ICE) is given at time of order, only iCLASS Seos credentials with HID Elite keys are supported. If Mobile Reference (MOB) is given at time of order, only iCLASS Seos credentials with standard keys are supported.

Configuration Settings

- 0000 - Standard configuration. All iCLASS SE Readers - Seos Profile ship with the following standard configuration:
  - LED normally red, LED flashes green and beeps on card read
  - Keypad output is 4-bit (if keypad reader)

Non-standard configuration can be applied at time of installation using the configuration card accessories listed on next page.
2. Enter the numbers/letters from the selections above into the table below.

The resulting “Final Part Number” is used when ordering reader.

<table>
<thead>
<tr>
<th>Reader Model</th>
<th>125 KHz</th>
<th>13.56 MHz</th>

<tr>
<td>Example</td>
<td>920 N</td>
<td>S N</td>
<td>N T E K</td>
<td>2 0000</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Final Part Number</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>E K</td>
<td></td>
<td>0000</td>
</tr>
</tbody>
</table>

3. Place an order.

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: http://www.hidglobal.com/customer-service

Need credentials? Credentials supported by this reader model includes (depending on options chosen above):

- Mobile IDs
- iCLASS Seos
- iCLASS Seos + Prox

### iCLASS SE Reader - Seos Profile Configuration Cards

</tr>
</tbody>
</table>

Note: The above configuration cards are only intended for use with iCLASS SE Reader - Seos profile.
iCLASS SE Reader - Standard Profile with Bluetooth Option

**Application:** Designed to ensure compatibility with legacy credentials and capability to support the future.

**Technologies Supported:** Wide variety of contactless credentials including HID Mobile Access Mobile IDs via NFC and/or Bluetooth Smart.

1. Select one option from each of the following sections:

**Reader Model** (select one model)

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>900</td>
<td>Model R10 - Designed for door applications requiring a small footprint card reader.</td>
</tr>
<tr>
<td>910</td>
<td>Model R15 - Designed for door applications requiring a mullion style mounting.</td>
</tr>
<tr>
<td>920</td>
<td>Model R40 - Designed for door applications requiring standard wall switch mounting.</td>
</tr>
<tr>
<td>921</td>
<td>Model RK40 - Designed for door applications requiring standard wall switch mounting and keypad input.</td>
</tr>
</tbody>
</table>

**125 KHz Credential Support** (Select one option)

- N - No 125 KHz support
- P - Support for HID Prox, AWID and EM4102 (32 bits)

**13.56 MHz and Bluetooth Credential Support**

- M - Support for HID Mobile Access Mobile IDs via NFC and Bluetooth Smart - reader equipped with Bluetooth Smart module. Also supports iCLASS Seos, iCLASS SE, iCLASS SR, iCLASS, MIFARE Classic (SIO), MIFARE DESFire EV1 (SIO) and ISO 14443 UID.

**Controller Communication** (Select one option)

- N - Wiegand
- C - Clock & Data
- P - OSDP

**Wiring Connection** (Select one option)

- N - Pigtail
- T - Terminal strip

**Color**

- K - Black

**Keyset** (Select one option)

- M - Mobile-Ready: Prepared to support HID Mobile Access, but lacks the personalized configuration to read an organization's specific Mobile IDs. This configuration can be ordered at any time but will require field activation after the organization has completed registration for HID Mobile Access.

- E - Mobile-Enabled: Fully activated and personalized to support an organization's specific Mobile IDs. These readers can only be ordered after the organization has completed registration for either HID Elite or HID Mobile Access. If HID Elite reference (ICE) is given at time of order, only iCLASS Seos credentials with HID Elite keys are supported. If Mobile Reference (MOB) is given at time of order, only iCLASS Seos credentials with standard keys are supported.
Configuration Setting (Select one option)
Standard configuration: All iCLASS SE Readers - Standard Profile with Bluetooth Smart ship with the following features

- Controller Communication = N - Wiegand, or P - OSDP
- LED normally red, LED flashes green and beeps on card read
- Keypad output is 4-bit (if keypad reader)

This configuration is represented by the following standard configuration setting extensions listed.

<table>
<thead>
<tr>

* Not available on model 940.
** Consult your regional technical support representative for specific configurations.

**Controller Communication (Select one option)**

- **N** - Wiegand
- **C** - Clock & Data
- **P** - OSDP

**Wiring Connection (Select one option)**

- **N** - Pigtail (Not available on models 940 or 95A)
- **T** - Terminal strip

**Color (Select one option)**

- **K** - Black
- **W** - White. Only available on 95A model.
- **G** - Gray. Only available on 95A model.
Keyset (Select one option)

- 0 - Standard v1 - Supports credentials with default HID keys, including iCLASS and iCLASS SR.
- 2 - Standard v2 - Supports credentials with default HID keys, not including iCLASS and iCLASS SR.
- E - HID Elite - Supports credentials with HID Elite keys and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

Configuration Setting

- 0000 - Standard configuration:
  - 13.56MHz Credential Support = T - Maximum Compatibility
  - Controller Communication = N - Wiegand
  - Keyset = 0 - Standard v1 or E - HID Elite
  - LED normally red, LED flashes green and beeps on card read
  - Keypad output is 4-bit (if keypad reader)

- xxxx - Non-Standard configuration: ANY other options selected above requires a Non-Standard 4 digit extension. To order non-standard configuration options, use the Select tab on the iCLASS SE Configuration spreadsheet at the following link [www.hidglobal.com/node/19914](http://www.hidglobal.com/node/19914). Your HID Global Support or Sales representative can help you determine your final configuration.

2. Enter the numbers/letters from the selections above into the following table:

   The resulting “Final Part Number” is used when ordering reader.

Readers and Credentials How To Order Guide, PLT-02630, A.0

iCLASS SE Reader - Magnetic Stripe

Application: Designed to ensure compatibility with legacy credentials and capability to support the future.

Technologies Supported: Magnetic stripe cards and a wide variety of contactless credentials including HID Mobile Access Mobile IDs via NFC.

1. Select one option from each of the following sections:

Reader Model (select one model)

- 922 - Model RM40 - Designed for door applications requiring standard wall switch mounting.
- 925 - Model RMK40 - Designed for door applications requiring standard wall switch mounting. Supports keypad input.

125 KHz Credential Support (Select one option)

- N - No 125 KHz support
- P - Support for HID Prox, AWID and EM4102 (32 bit)

13.56 MHz credential support (Select one option)

* Consult your regional technical support representative for specific configurations.

Controller Communication (Select one option)

- N - Wiegand
- C - Clock & Data
- P - OSDP

Wiring Connection (Select one option)

- N - Pigtail
- T - Terminal strip

Color

- K - Black

iCLASS Support/Keyset (Select one option)

- 0 - Standard v1 - Reads credentials with default HID keys including standard iCLASS and/or iCLASS SR.
- 2 - Standard v2 - Reads credentials with default HID keys not including standard iCLASS and/or iCLASS SR.
- E - HID Elite - Reads credentials with HID Elite keys and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

Configuration Settings

To determine configuration options, use the Select tab on the iCLASS SE Configuration Guide spreadsheet at the following link: www.hidglobal.com/node/19914. Your HID Global Support or Sales representative can help you determine your final configuration.
2. Enter the numbers/letters from the selections above into the table below.
The resulting “Final Part Number” is used when ordering reader.

<table>
<thead>
<tr>

3. Place an order.
To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: www.hidglobal.com/customer-service

Need credentials? Credentials supported by this reader model include (depending on options chosen above):

- Mobile IDs
- iCLASS Seos
- iCLASS SE
- iCLASS
- HID Prox
- MIFARE DESFire EV1
- MIFARE Classic
pivCLASS Reader - FIPS 201 Strong Authentication

Application: Designed for applications that leverage the pivCLASS® Authentication Module (PAM) to validate FIPS 201 credential certificates for the highest level of security.

Technologies Supported: FIPS 201 credentials such as PIV, CIV, TWIC, CAC, and FRAC, and a wide variety of other contactless credentials.

1. Select one option from each section below:

Reader Model (select one model)

- [ ] 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
- [ ] 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
- [ ] 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting. Supports keypad input.
- [ ] 923 - Model RKCL40 - Designed for door applications requiring standard wall switch mounting. Featuring a contact slot, LCD display, and keypad.
- [ ] 924 - Model RKCLB40 - Designed for door applications requiring standard wall switch mounting. Featuring a contact slot, LCD display, biometric sensor, and keypad.

125 KHz Credential Support (Select one option)

- [ ] N - No 125 KHz support
- [ ] P - Support for HID Prox, AWID and EM4102 (32 bit) (not available on model RKCLB40)

13.56 MHz credential support (Select one option)

- [x] H - Contactless. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. This option is only available for models R10, R40 and RK40.
- [ ] P - Contactless + Contact. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. FIPS 201 type cards can be read using either the contact or contactless card interface (RKCL40). This option is only available for models RKCL40, and RKCLB40.

Controller Communication (Select one option)

- [x] R - RS485 FDX. Full duplex is required when connecting a pivCLASS reader to a PAM.

Controller Connection (Select one option)

- [ ] N - Pigtail
- [ ] T - Terminal strip

Color

- [x] K - Black

Keyset (Select one option)

- [ ] 0 - Standard v1 - Reads credentials with default HID keys including standard iCLASS and/or iCLASS SR.
- [ ] E - HID Elite - Reads credentials with HID Elite keys and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

Configuration Setting (Select one option)

Configuration setting extension for these reader models are depending on the reader model and 125KHz support chosen above, please select from list below:

<table>
<thead>
<tr>
<th>Reader Model</th>

3. Place an order.

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: [www.hidglobal.com/customer-service](http://www.hidglobal.com/customer-service)

Need credentials? Credentials supported by this reader model includes (depending on options chosen above):

- Mobile IDs
- iCLASS Seos
- iCLASS SE
- iCLASS
- HID Prox
- MIFARE DESFire EV1
- MIFARE Classic
pivCLASS Reader - Wiegand or OSDP

Application: Designed to support FIPS 201 credentials and communicate to traditional intelligent controller using Wiegand or OSDP protocol

Technologies Supported: FIPS 201 credentials such as PIV, CIV, TWIC, CAC, and FRAC and a wide variety of contactless credentials

1. Select one option from each section below:
   Reader Model (select one model)

   □ 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
   □ 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
   □ 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting.
   □ 923 - RKCL40 - Combination, contact plus contactless reader with keypad and LCD.

125 KHz Credential Support (Select one option)
□ N - No 125 KHz support
□ P - Support for HID Prox, AWID and EM4102 (32 bit)

13.56 MHz credential support (Select one option)
□ H - Contactless. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. This option is only available for models R10, R40 and RK
□ P - Contactless + Contact. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. FIPS 201 type cards can be read using either the contact or contactless card interface. This option is only available for model RKCL40.

Controller Communication (Select one option)
□ R - Wiegand; Configurable to support RS-485 full duplex for communication with pivCLASS Authentication Module (PAM)
□ P - Wiegand or OSDP via RS-485 half duplex; selectable through configuration. Not available for model with RKCL40.

Controller Connection (Select one option)
□ N - Pigtail
□ T - Terminal strip

Color
□ K - Black

iCLASS Support/Keyset (Select one option)
□ 0 - Standard v1 - Reads credentials with default HID keys including standard iCLASS and/or iCLASS SR.
□ E - HID Elite - Reads credentials with HID keys and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

Configuration Setting
Obtaining individual pivCLASS reader configuration settings requires the use of the online Configuration Guide.

2. Enter the numbers/letters from the selections above into the table below.

The resulting “Final Part Number” is used when ordering reader.

<table>
<thead>
<tr>
<th>Reader Model</th>
<th>125 KHz</th>

3. Place an order.

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: http://www.hidglobal.com/customer-service

Need credentials? This reader could support (depending on options chosen above) the following credentials:

- iCLASS Seos
- iCLASS
- HID Prox
- MIFARE DESFire EV1
- MIFARE Classic
iCLASS SE U90 - UHF Long Range Reader

Application: Designed for vehicle access control installations which require long range authentication and high throughput
Technologies Supported: Ultra High Frequency (UHF) EPC GEN 2

1. Select one option from each section below to construct part number:

3. **Place an order.**

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: [http://www.hidglobal.com/customer-service](http://www.hidglobal.com/customer-service).

Need credentials? This reader supports the following credentials:

- UHF cards
- UHF + iCLASS cards
iCLASS SE Reader Accessories

Programming Cards

Use these cards for customer reader configuration. Readers may be reconfigured to a target configuration by applying the correct target configuration. Use the following link to access the iCLASS SE Configuration Worksheet [www.hidglobal.com/node/19914](http://www.hidglobal.com/node/19914) to determine the exact configuration required. Apply changes to the reader security using programming cards. Contact HID Technical Support ([www.hidglobal.com/support](http://www.hidglobal.com/support)) to ensure selecting the proper settings.

</tbody>
</table>

¹ Configuration Settings
All standard readers ship with the following features - 13.56MHz interpreter “T” enabled, Wiegand “N” enabled, and Standard-1 “0” security keys enabled. ANY other option selected requires a specific configuration EXTENSION. To order non-standard configuration options, use the following link to access the iCLASS SE Configuration Worksheet [https://www.hidglobal.com/node/19914](https://www.hidglobal.com/node/19914). Your HID Global Support or Sales representative can help you determine your final configuration.

Standard configuration includes: LED normally Red + Reader beeps / flashes LED green on card read + Intelligent Power Management = Off + Keypad Output is 4-bit (if keypad reader)

Note: Reader configuration cards change settings in an additive fashion. Configuration card settings only overwrite old settings for the options selected. Reader settings that have not been selected for the configuration retain their original values.

To reset reader settings to factory defaults, use a factory default configuration card first, then apply the new configuration with the provided reader configuration card.

² Keys
Specify HID Elite “E” or Standard-1/Standard-2 “0” based upon keys ALREADY LOADED in the reader that needs to be configured.

³ HID Elite Upgrade and Downgrade Cards
Reader admin keys and reader credential keys must both be changed to upgrade or downgrade to or from HID Elite. A separate card is required for reader admin keys and reader credential keys. To complete an HID Elite upgrade or downgrade a Reader Configuration Card with specific configuration extension may also be required to modify configuration options other than HID Elite keys, for example modification of 125 kHz or 13.56 MHz interpreters.

⁴ Keys
Specify HID Elite “E” based upon HID Elite keys TO BE LOADED in the reader that needs to be configured.
## Accessories

The following provides accessories that can be ordered separately for your iCLASS SE and multiCLASS SE readers.

*Revision numbers and availability are subject to change without notice. Consult factory for availability.

1 Configuration Setting Options are as follows (Factory or Field Configurable):

- 00 = Beep on, LED normally red, reader flashes green on tag read
- 01 = Beep off, LED normally red, reader flashes green on tag read
- 02 = Beep on, LED normally red, reader flashes green on tag read
- 03 = Beep off, LED normally off, reader flashes green on tag read
- 04 = Beep off, LED normally red, host must flash red and/or green
- 05 = Beep off, LED normally red, host must flash green
- 06 = Beep on, LED normally off, host must flash red and/or green
- 07 = Beep off, LED normally off, host must flash red and/or green

2 iCLASS Security options (Factory or Field Configurable):

- 0 = Standard; protects access and biometric applications (Reads/Enrolls all iCLASS cards with unique keys diversified from HID master key)
- 1 = HID Elite; protects access and biometric applications (Reads/Enrolls only iCLASS cards with site-specific HID Elite key; consult factory for availability)
- C = Standard with Open Collector Tamper enabled
- D = HID Elite with Open Collector Tamper enabled

3 MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details.

- 0 = 32 bit
- 1 = 32 bit reverse (Same as 6055A and 6055BXX0011)
- 2 = 26 bit
- 3 = 34 bit
- 4 = 40 bit
- 5 = 37 bit
- 6 = 56 bit

4 Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration setting options:

- 00 = Buffer one key, no parity, 4 bit message
- 09 = Buffer one key, add compliment, 8 bit message (Dorado)
- 10 = Buffer six keys and add parity
- 11 = Buffer one key and add parity
- 14 = Buffer one to five keys (Standard 26 bit output)
- 19 = Buffer four keys and add parity
- 20 = Single Key buffering
- 23 = Buffer one to 11 keys

5 In addition to RKLB57 reader only (6180BKT), this part provides additional enrollment capabilities and multi-lingual support. Reader/Enroller is field configurable for one of the following behaviors: reader/enroller, reader-only or enroller-only, and field configurable for one of 10 languages (see datasheet for more information). This product replaces CP575 fingerprint template encoder (no longer available).

¹ Configuration Setting Options are as follows (Factory or Field Configurable):

- **00** = Beep on, LED normally red, reader flashes green on tag read
- **01** = Beep off, LED normally red, reader flashes green on tag read
- **02** = Beep on, LED normally off, reader flashes green on tag read
- **03** = Beep off, LED normally off, reader flashes green on tag read
- **04** = Beep on, LED normally red, host must flash green
- **05** = Beep off, LED normally red, host must flash green
- **06** = Beep on, LED normally off, host must flash red and/or green
- **07** = Beep off, LED normally off, host must flash red and/or green

² iCLASS Security Options (Factory or Field Configurable): See Application Note Number 28 for additional information on Key Management.

- **0** = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)
- **1** = Custom options (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)
- **C** = Standard with Open Collector Tamper enabled
- **D** = Custom with Open Collector Tamper enabled

³ MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the “iCLASS Reader Wiegand Output Configuration Guide” for more details. (SETTING NOT APPLICABLE WITH HID ELITE ORDERS. HID ELITE READERS DO NOT READ MIFARE CSN.)

- **0** = 32 bit
- **1** = 32 bit reverse (Same as 6055A and 6055BXX0011)
- **2** = 26 bit
- **3** = 34 bit
- **4** = 40 bit
- **5** = 37 bit
- **6** = 56 bit
- **Z** = CSN Suppressed

⁴ Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration setting options:

- **00** = Buffer one key, no parity, 4 bit message
- **01** = Buffer one key and add parity
- **02** = Buffer one key, add compliment, 8 bit message (Dorado)
- **03** = Buffer one key and add parity
- **04** = Buffer one to five keys (Standard 26 bit output)
- **05** = Buffer four keys and add parity
- **06** = Buffer one to five keys (Standard 26 bit output)
- **10** = Buffer six keys and add parity
- **11** = Buffer one key and add parity
- **14** = Buffer one to five keys (Standard 26 bit output)
- **19** = Buffer four keys and add parity
- **20** = Buffer one key and add parity
- **23** = Buffer one to 11 keys

⁵ Contact Factory for pricing, availability, and minimum order quantity.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

2 Consult Factory

3 ProxPro Reader with Keypad (Hardware Option K Version): data is outputted over shared Wiegand cable. Reader processes keystrokes.

4 ProxPro Reader with Keypad (Hardware Option S Version): (3 x 4 Matrix) requires additional 7 conductor keypad cable. Control panel processes keystrokes

5 ProxPro Configuration Setting options are as follows (factory programmed):

- 00 = Buffer one key, no parity, 4 bit message
- 09 = Buffer one key, add compliment, 8 bit message (Dorado)
- 10 = Buffer six keys and add parity
- 11 = Buffer one key and add parity
- 14 = Buffer one to five keys (Standard 26 bit output)
- 19 = Buffer four keys and add parity
- 20 = Single Key buffering
- 21 = Supervision Mode
- 23 = Buffer one to 11 keys

6 ProxPro reader Configuration Settings are selected by the customer via dip switch settings. 00 = LED normally red, reader flashes green on tag reads.

7 ProxPro Serial output reads cards with up to 37-bit formats, and outputs RS232, RS422, and RS485.

Optional Glass Mount Kit for ProxPro and ProxPro II Readers = 5455AGM00.

*Revision numbers and availability are subject to change without notice.

Notes:

1 Configuration Setting Options are as follows (factory programmed):

- 00 = Beep on, LED normally red, reader flashes green on tag read
- 01 = Beep off, LED normally red, reader flashes green on tag read
- 02 = Beep on, LED normally off, reader flashes green on tag read
- 03 = Beep off, LED normally off, reader flashes green on tag read
- 04 = Beep on, LED normally red, host must flash green
- 05 = Beep off, LED normally red, host must flash green
- 06 = Beep on, LED normally off, host must flash red and/or green
- 07 = Beep off, LED normally off, host must flash red and/or green

2 Consult Factory

To order specify the following:
## MaxiProx Proximity Reader - 5375

<table>
<thead>
<tr>
<th>Card Reader Description</th>
<th>Base Part No.</th>
<th>Current Rev. No.*</th>
<th>Color Options</th>
<th>Hardware Options</th>
<th>Configuration Setting Options¹</th>
<th>Custom²</th>
</tr>
</thead>
<tbody>
<tr>
<td>MaxiProx® Proximity Reader</td>
<td>5375</td>
<td>A</td>
<td>G = Charcoal Gray</td>
<td>N = None</td>
<td>00</td>
<td>XXXX Y</td>
</tr>
</tbody>
</table>

*Revision numbers and availability are subject to change without notice.

Notes:
¹ Configuration Setting 00 = LED normally red, reader flashes green on tag reads.
² The MaxiProx reader configuration settings are selected by the customer via internal dip switch settings.
³ Consult Factory

To order, specify the following:

<table>
<thead>
<tr>
<th>Card Reader Description</th>
<th>Base Part No.</th>
<th>Current Rev. No.*</th>
<th>Color Options</th>
<th>Hardware Options</th>
<th>Configuration Setting Options</th>
<th>Custom</th>
</tr>
</thead>
</table>
## EntryProx Proximity Reader - 4045

<table>
<thead>
<tr>
<th>Card Reader Description</th>
<th>Base Part No.</th>
<th>Current Rev. No.*</th>
<th>Color Options</th>
<th>Hardware Options</th>
<th>Configuration Setting Options</th>
<th>Custom²</th>
</tr>
</thead>
<tbody>
<tr>
<td>EntryProx™ Proximity Reader Stand-Alone Access Control Unit</td>
<td>4045</td>
<td>C</td>
<td>G = Charcoal Gray</td>
<td>N = None</td>
<td>U0</td>
<td>XXXX Y</td>
</tr>
<tr>
<td>EntryProx Proximity Reader Stand-Alone Access Control Unit</td>
<td>4045</td>
<td>C</td>
<td>G = Charcoal Gray</td>
<td>K = Key Kit (Includes 10 ProxKey® II Tags)³</td>
<td>U0</td>
<td>XXXX Y</td>
</tr>
<tr>
<td>EntryProx Proximity Reader Stand-Alone Access Control Unit</td>
<td>4045</td>
<td>C</td>
<td>G = Charcoal Gray</td>
<td>C = Card Kit (Includes 20 ProxCard II® Cards)³</td>
<td>U0</td>
<td>XXXX Y</td>
</tr>
</tbody>
</table>

*Revision numbers and availability are subject to change without notice.

**Notes:**
1. Configuration Setting U0 = LED normally red, reader flashes green on tag reads.
2. Consult Factory
3. Proximity cards and key tags included in kits will be programmed with HID’s 37-bit Wiegand format (H10302). HID tracks the issuance of this format and does not duplicate numbers. Numbers will be issued in random order.
4. Infrared Printer and Printer Paper can be used with previously purchased 4045B EntryProx Models, which are no longer available.

To order specify the following:

1 MiniProx Covers will only fit MiniProx readers with removable covers series (Model # 5365E or later), and will NOT fit older versions with electronics potted into the cover (Model #s 5365A, 5365B, nor 5365C).
2 ThinLine II Designer Covers will only fit Thinline II readers (Model # 5395C or later), and will NOT fit Thinline II readers (Model #s 5395A nor 5395B).
3 ProxPoint Plus Designer Covers will fit all ProxPoint Plus readers (Model # 6005B or later), and will NOT fit ProxPoint readers (Model # 6005A).
Indala Proximity Readers

Overview
Every part number consists of a base model number to indicate the type of product, and a letter or number to indicate each product option. Each product has a standard part number that includes default options, as indicated on the order guide. When an order is placed for a product, the base model number and all options must be specified. If you require any options that are different from the default options, you must also indicate those options at the time the order is placed. All part numbers must be complete to be accepted by HID’s order entry system.

All reader orders must have the following information:

- BASE MODEL NUMBER
- STYLE
- READ RANGE
- TYPE
- COLOR
- OUTPUT FORMAT (reader’s format or format number must also be given at time of order)

Advantage Series Reader - ASR 620

BASE NUMBER
FP = FlexPass (reader format required)

STYLE
1 = Wave
2 = Curve
3 = Arch
4 = Linear
5 = Keypad
0 = Core Electronics Module

READ RANGE
5 = 5 in. (13 cm.) - available in STYLES: Wave, Curve, Arch, Linear TYPES: Slim and Wall switch
2 = 12 in. (30 cm.) - available in STYLES: Wave, Arch TYPE: Midrange
0 = 4 in. (10 cm.) - available only in STYLE: Keypad; TYPE: Keypad

TYPE
1 = Slim - available in STYLES: Wave, Curve, Arch, Linear
2 = Wall switch - available in STYLES: Wave, Curve, Arch, Linear, MIFARE
3 = Midrange - available in STYLES: Wave, Arch
5 = Classic (previously known as Mag-Stripe) - available STYLE: Linear
6 = Membrane Keypad - available only in STYLE: Keypad
0 = Module only

COLOR
1 = Black - available in STYLES: Wave, Curve, Arch, Linear TYPES: Slim, Wall switch, Midrange, Classic
4 = Blue - available in STYLES: Wave TYPES: Slim, Wall switch, Midrange
5 = Grey - available in STYLES: Arch TYPES: Slim, Wall switch, Midrange
6 = White - available in STYLES: Arch TYPES: Slim, Wall switch, Midrange
7 = Beige - available in STYLES: Arch, Keypad TYPES: all
0 = N/A

OUTPUT FORMAT
Note: Aside from choosing below, specify reader’s format or format no. (e.g. 26-bit Wiegand or format no. 10022).
A = Standard Wiegand - available in all STYLES and TYPES
S = Serial - available in STYLES: Wave, Curve, Arch TYPE: Midrange
B = Buffered or 8-Bit Burst (must be specified) - available only in Keypad STYLE and TYPE (Membrane or Heavy Duty)
M = 3 X 4 Matrix

CABLE LENGTH
The default cable length for Indala modules is 18 inches (46 cm). No entry is needed for an 18 inch cable.
For Reader Cores an optional 10 ft (3 m) pigtail is available through the HID European, America and Asia Pacific offices. Requires a minimum 2,500 unit order quantity. Place /L in the 7th position for ordering the 10 ft (3 m) cable.
Note: Do not order Reader Packages with the 10 ft (3 m) cable. When ordering the 10 ft (3 m) cable, bezels must be ordered separately. Call Customer Service for assistance.

**Notes:**
- To ensure security of the format and cards, a Software License Agreement must be signed by the final user of the 3175BNN00, 3012AKN00, 3012ANS00, and be on file at HID prior to shipment.
- Developer's Resource CD includes: Serial Protocol Documentation and Developer's Test Program to assist in developing custom MIFARE software applications.
- Demo CD Includes: MIFARE Documentation and Sample Application Program.
HID MOBILE ACCESS

What Is HID Mobile Access?

HID Mobile Access complements your existing access control solution. Besides using cards or fobs, staff can now securely access the facility using their Android or iOS mobile device.

HID Mobile Access, powered by Seos, consists of the following components:

- HID Mobile Access Portal: A management portal that allows you to manage users and securely issue or revoke Mobile IDs to users’ handsets. The portal is available as a hosted service.
- HID Mobile Access Application: This app is available for Android and iOS devices, free of charge.
- Mobile IDs: The Mobile IDs with integrated Seos technology are for management of trusted identities. See details on ordering below.
- iCLASS SE mobile-enabled Readers. See details on ordering below.

Onboarding and Ordering

The following step are required to complete onboarding, to be able to order products for use with HID Mobile Access:

HID Channel Partner registers End Users to HID Mobile Access by submitting an onboarding form to HID Global Customer Service.

HID Global Customer Service confirms part numbers and Mobile Reference (MOB) to HID Channel Partner.

HID Channel Partner places PO for Mobile Access products and readers, and configurations cards are built using the End User’s Mobile Reference.

To get more information on how to register for HID Mobile Access please contact your HID Global Sales Representative or HID Global Customer Service.

Contact information is available at: http://www.hidglobal.com/customer-service.

CREDENTIALS

Understanding HID Credentials

What should I know about security keysets?
iCLASS SE readers and iCLASS Seos / iCLASS SE credentials offer two keyset security schemes, HID Elite and Standard.
The HID Elite Security Program supports a unique keyset on a per site/company basis.
The keyset governs a variety of keys, including:
- Media (credential) keys for iCLASS SE, SIO-encoded iCLASS, MIFARE Classic (SIO) and MIFARE DESFire EV1 (SIO) credentials
- SIO authenticity and privacy keys (media independent)
- Configuration programming keys (for programming reader configuration, also media independent)
When utilizing HID’s standard key set for the above keys, all standard keyed credentials work with all standard keyed readers. Additionally, any Standard Security configuration card configures a Standard Security reader (only accomplished during the first five (5) seconds after reader powers-up). Conversely, when utilizing the HID Elite program, only site/company specific HID Elite credentials and programming cards work with matching readers.
The Standard Security Program provides universal keysets that offer maximized compatibility by keying readers and cards with matching security for use in the general population. This allows for maximized compatibility because readers and cards are not keyed on a per site/company basis but rather all keyed the same. This offers the advantage to the integrator as a standard stock of readers and cards will interoperate for a variety of sites/companies, rather than needing different stocks of readers and cards for each individual site. iCLASS SE readers provide two Standard Security Keysets that offer compatibility with the following credentials:

</tbody>
</table>

How can I order HID Elite configured credentials?
- Direct customers of HID must be authorized to purchase components with HID Elite keys. If you are not authorized, you must have the key owner authorize you through the Authorization form. See [http://www.hidglobal.com/services/secure-identity/credential-programs/iCLASS-elite-and-se-elite](http://www.hidglobal.com/services/secure-identity/credential-programs/iCLASS-elite-and-se-elite).
- Ensure the HID Elite flag is set in the part number (of readers, credentials and programming cards).
- All Purchase Orders for HID Elite components must be ordered with the HID Elite reference number (starts with ICE or MOB).

How can I migrate from my current credential technology?
- **iCLASS Existing Sites:** When deploying credentials to an existing site with standard iCLASS credentials and readers the following steps provide a guideline to a recommended path:
  1. Purchasing iCLASS Seos + iCLASS cards along with iCLASS SE Readers - Standard profile with Maximum compatibility credential support (supporting iCLASS cards), as this provides full interoperability with HID’s latest credential and reader platform, as well as supporting installed iCLASS base.
  2. This provides options to upgrade security in the future without rip-and-replace of the newly purchased readers
  3. Once all readers on site are iCLASS SE the customer can begin ordering iCLASS Seos only cards.
  4. Once all cards in the population are iCLASS Seos, readers can be configured to support only iCLASS Seos cards.
- **125 kHz Existing Sites:** Deploying credentials to an existing 125 kHz site with HID Prox/Indala Proximity credentials and readers (HID, Indala, AWID, and EM4102), purchase multi-technology iCLASS Seos or iCLASS SE Credentials, along with multiCLASS SE Readers for full credential and reader interoperability, and a relaxed migration timeline.
What is the difference between iCLASS Seos, iCLASS SE and iCLASS credentials?

**iCLASS Seos credentials** deliver enhanced security, data confidentiality and stronger authentication for user data. Seos comprises a generic card edge (card command interface) to meet the growing demand for interoperability; a secure messaging protocol to protect data transmission. In addition, Seos provides an open software architecture that is portable to a range of mobile devices and microprocessors. The credential offers enhanced privacy protection by delivering data confidentiality and integrity between the smart card and the reader to prevent sensitive/personal data from being intercepted or cloned. iCLASS Seos credentials are only delivered with a single access control data payload, the SIO, and are not backwards compatible with iCLASS readers.

**iCLASS SE credentials** come with a single access control data payload, the SIO. iCLASS SE credentials are designed to work in an installation of iCLASS SE readers only and are not backwards compatible with iCLASS readers.

**iCLASS credentials** are offered either with or without an encoded SIO. For the SIO encoded option, this card will come with two access control data payloads: the SIO and iCLASS access control data payload. These credentials provide backward compatibility with currently deployed systems, maximizing compatibility. iCLASS credentials encoded with SIO should be purchased when the site needs legacy application support, or when the site plans to eventually migrate to SIO security. iCLASS credentials encoded with SIOs were previously marketed as iCLASS SR credentials.

**iCLASS credentials** are designed to work in an existing installation of standard iCLASS readers. iCLASS credentials are compatible with both iCLASS readers and iCLASS SE readers.*

Announcement Regarding Credentials Marking

As a part of our commitment to continuous enhancements of world-class products and solutions, HID Global is transitioning to the most innovative card marking technology available.

Effective immediately, HID Global is moving from ink jet card marking to the new laser engraving card marking technology for all Genuine HID® cards, fobs and authentication tokens. This state-of-the-art laser engraving technology will result in a more appealing look and feel and reduce the ecological footprint of card production.

All relevant orders in the United States and Canada are affected immediately.

Key benefits:

- Marking quality and durability of the cards will be enhanced and more consistent
- New engraving technology reflects HID Global’s commitment to sustainability by eliminating the use of solvents
- Improved Proof of Authenticity since engraved markings cannot be removed or modified.
- The enhanced design will be available at no additional charge. The laser-engraving surcharge for Genuine HID Proximity and Contactless Credentials will be removed in November.

Depending on the fulfillment center, customers may receive either inkjet or laser marked cards during the transition period of October 2014 - June 2016. All ID1 cards (Clamshell Cards included), key fobs (including Microtags, Keytags and Microprox) and authentication tokens will have the enhanced laser engraving design immediately.

Notes:

- The numbering scheme and part number will not change. Please contact your sales representative to see the new design and get sample cards.
- Due to the 3D nature of laser engraved markings, printing over these markings is not recommended as it may impact print quality.
- For all relevant Credentials ordered and/or shipped out of North America, the laser-etched version supersedes all ink jet card part numbers.
- For further details on the printing areas, please contact HID Global.

Please contact HID Customer Service or Sales Representative if you have additional questions regarding this notice.
iCLASS Seos Credentials

Note: See Understanding HID Credentials on page 42 for guidance.

iCLASS Seos Card - 500

Increased security and interoperability cards for installation supporting iCLASS SE platform. All iCLASS Seos cards are OTP enabled.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Special Instructions:**

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The Printed card number is placed in the bottom right-hand corner on the back of the card.
4. For Laser Engraved Printed numbers, consult factory for lead times and cost.
5. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
6. The ability to add a horizontal slot punch requires a different iCLASS antenna design. Users can expect a read range reduction of approximately 20% if they order option H for the Slot Punch.
7. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
8. The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
iCLASS SE Key - 325

The iCLASS SE contactless smart Key offers read/write capability while leveraging Security Identity Object for increased security. Attach to a key ring or badge clip for convenient use. The iCLASS SE key is not available with iCLASS programming.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

☐ 325 Base Model

iCLASS Memory Size and Allocation (Select one option)
☐ 0 - 2k Bits (256 Bytes) with 2 Application Areas
☐ 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
☐ 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

Secure Identity Object Programming (Select one option)
☐ P - Programmed with Security Identity Object (SIO)
☐ V - Unprogrammed, for use with iCLASS SE Encoder

Front Packaging
☐ N - iCLASS Key II - Black with blue insert. Includes HID Standard Artwork

Back Packaging
☐ N - None

Key Numbering
☐ M - Sequential Matching Encoded/Printed (Inkjetted)4
☐ N - No Printed Key Numbering
☐ S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)4
☐ R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)4
☐ A - Sequential Matching Encoded/Printed (Engraved)2
☐ B - Sequential Encoded/Sequential Non-Matching Printed (Engraved)2
☐ C - Random Encoded/Non-Matching Sequential Printed (Engraved)2

Additional Options3
☐ N - None

Enter your final card options from the above selections. Example: 3250PNNMN

Final Part Number 325     N N   N

iCLASS Key Programming Information

Format Number _____ (example: H10301) Bit Numbers _____ (example: 26 bit) Facility Code _____
Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____
HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____ City Code _____ OEM Code _____

Special Instructions:
1 The Printed key number is placed on the back of the key.
2 For Laser Engraved Printed numbers, consult factory for lead times and cost.
3 Key Ring sold separately (Part Number: 57-0001-02).
4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS SE Tag - 330

The iCLASS SE contactless smart Tag offers read/write capability while leveraging Security Identity Object for increased security. iCLASS SE enable existing credentials or non-metallic devices such as cell phones or PDAs by adhering the iCLASS Tag. The iCLASS SE Tag is not available with iCLASS programming.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

☐ 330 Base Model

iCLASS Memory Size and Allocation (Select one option)
☐ 0 - 2k Bits (256 Bytes) with 2 Application Areas
☐ 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
☐ 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

Secure Identity Object Programming (Select one option)
☐ P - Programmed with Secure Identity Object (SIO).
☐ V - Unprogrammed, for use with iCLASS SE Encoder

Front Packaging (Select one option)
☐ S - Gray with HID Standard Artwork
☐ K - Black with HID Standard Artwork
☐ C - Custom Artwork - Specify Custom Artwork Number²

Back Packaging
☐ S - Adhesive Backing

Tag Numbering¹(Select one option)
☐ M - Sequential Matching Encoded/Printed (Inkjetted)⁴
☐ N - No Printed Tag Numbering
☐ S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)⁴
☐ R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)⁴

Slot Punch
☐ N - None

Option - Custom Artwork¹
☐ ______________________ (Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

Enter your final Tag options from check boxes above. Example: 3302PSSNN

Final Part Number  330  S  N  -  (Options #)

iCLASS Tag Programming Information

Format Number _____ (example: H10301)  Bit Numbers _____ (example: 26 bit)  Facility Code _____

Encoded Card # Start ______  Stop _____  Printed Card # Start _____  Stop _____

HID Elite ICE Number (if applicable) - _____ (Custom Format)  Site Code _____  City Code _____  OEM Code _____

Special Instructions:

1 The Printed tag number is placed on the back of the tag.
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3 The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.
4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
iCLASS SE Clamshell Card - 335

Added security into installations that do not contain standard iCLASS readers, these cards are not available with iCLASS programming. Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

335 Base Model

- **imageiCLASS Memory Size and Allocation (Select one option)**
  - 0 - 2k Bits (256 Bytes) with 2 Application Areas
  - 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
  - 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

- **Secure Identity Object Programming (Select one option)**
  - P - Programmed with Security Identity Object (SIO)
  - V - Unprogrammed, for use with iCLASS SE Encoder

- **Front Packaging (Select one option)**
  - M - Plain White Vinyl with Matte Finish
  - G - Plain White with Gloss Finish
  - A - iCLASS Clamshell - Adhesive Front
  - C - Custom Artwork - Specify Custom Artwork Number

- **Back Packaging (Select one option)**
  - S - Base with Molded HID Logo
  - C - Custom Artwork - Specify Custom Artwork Number

- **Card Numbering (Select one option)**
  - M - Sequential Matching Encoded/Printed (Inkjetted)
  - N - No Printed Card Numbering
  - S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
  - R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

- **Slot Punch**
  - V - Vertical Slot Punch

- **Option - Custom Artwork**
  - (Specify Artwork Number - Refer to the Custom Artwork Forms for new Artwork)

Enter your final card options from check boxes above. Example: 3350PMSMV

| Final Part Number | 335 | | V | - | (Options #) |

**iCLASS Card Programming Information**

| Format Number | Bit Numbers | Encoded Card # | Printed Card # | HID Elite ICE Number (if applicable) | Special Instructions: |
|---------------|-------------|----------------|----------------|--------------------------------------|
| (example: H10301) | (example: 26 bit) | Start | Stop | Start | Stop | (Custom Format) | Site Code | City Code | OEM Code |

1 The part numbers for non-adhesive labels to be used with the iCLASS Clamshell with the adhesive front are 1324GGN31 without slot and 1324GGV31 with slot.

2 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.

3 The Printed card number is placed in the top left-hand corner on the back of the card. HID logo molded into base on back.

4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS SE + Other HF Card - 390 / 391

The SIO-Enabled iCLASS with MIFARE Classic or MIFARE DESFire EV1 contactless smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. This card offers maximized compatibility installations that contain iCLASS SE or MIFARE Classic / MIFARE DESFire EV1 credentials.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

<table>
<thead>
<tr>
<th>Base Model</th>

iCLASS SE + Other 13.56MHz + Prox Card - 395 / 396

The SIO-enabled card with MIFARE Classic or MIFARE DESFire EV1 contactless smart card as well as HID Proximity offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. This card offers maximized compatibility into installations that contain iCLASS SE or MIFARE Classic / MIFARE DESFire EV1 credentials.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### Base Model
- **395 Standard PVC**
- **396 Composite 40% Polyester / PVC**

#### iCLASS SE Memory Size and Allocation (Select one option)
- **0** - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE Classic 1K)
- **3** - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- **4** - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

#### 13.56 MHz Technology Card Programming (Select one option)
- **R** - SIO Programmed iCLASS & 2nd Technology. Specify Programming Information
- **P** - Programmed iCLASS with SIO only not 2nd Technology. Specify Programming Information.
- **A** - Configured, Non-Programmed iCLASS, SIO Programmed 2nd Technology. Specify Programming Information.

#### 2nd High Frequency (13.56 MHz) Technology (Select one option)
- **M** - MIFARE Classic 1K Bytes (only available with iCLASS 2k bits)
- **N** - MIFARE Classic 4K Bytes
- **K** - MIFARE DESFire EV1 8K Bytes

#### 125 kHz Technology Card Programming (Select one option)
- **P** - "HID Prox" Programmed 125 kHz Technology. Specify Programming Information
- **C** - "Indala/Casi Prox" Programmed 125 kHz Technology. Specify Programming Information
- **N** - Initialized 125 kHz Technology. Programming Information Not Required

#### Front Packaging (Select one option)
- **G** - Plain White with Gloss Finish
- **C** - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

#### Back Packaging (Select one option)
- **G** - Plain White with Gloss Finish
- **C** - Custom Artwork with Gloss Finish - Specify Custom Artwork Number
- **1** - Plain White with Gloss Finish with Magnetic Stripe
- **3** - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

#### iCLASS SE Card Numbering (Select one option)
- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)

#### Slot Punch
- **N** - No Slot Punch

#### 125 kHz Card Numbering (Select one option)
- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)

IMPORTANT - Dual High Frequency credentials do not allow a slot punch due to the antenna design. HID recommends using a badge holder to attach this card to a lanyard or badge clip.

- **N** - No Slot Punch

#### 2nd 13.56 MHz Card Numbering (Select one option)
- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)

#### 125 kHz Card Numbering (Select one option)
- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 The Printed card number is placed in the bottom right-hand corner for iCLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.
4 For Laser Engraved Printed numbers, consult factory for lead times and cost.
5 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
6 The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
iCLASS Credentials

iCLASS Card - 200 / 210 / 211

iCLASS cards can be ordered either with both SIO and iCLASS programming or iCLASS programming only.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model:  
- [ ] 200 Standard PVC  
- [ ] 210 Composite 40% Polyester / PVC*

iCLASS Memory Size and Allocation (Select one option)
- [ ] 0 - 2k Bits (256 Bytes) with 2 Application Areas
- [ ] 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- [ ] 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

iCLASS Programming (Select one option)
- [ ] HP - Programmed with Security Identity Object (SIO) and standard iCLASS Access Control Application (Recommended)
- [ ] P - Programmed with standard iCLASS Access Control Application
- [ ] C - Unprogrammed, for use with iCLASS SE Encoder

Front Packaging (Select one option)
- [ ] G - Plain White with Gloss Finish
- [ ] C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

Back Packaging (Select one option)
- [ ] G - Plain White with Gloss Finish
- [ ] C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number
- [ ] J - Plain White with Gloss Finish with Magnetic Stripe
- [ ] 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

Card Numbering (Select one option)
- [ ] M - Sequential Matching Encoded/Printed (Inkjetted)
- [ ] N - No Printed Card Numbering
- [ ] S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- [ ] R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- [ ] A - Sequential Matching Encoded/Printed (Laser Engraved)
- [ ] B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- [ ] C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

Slot Punch (Select one option)
- [ ] N - No slot punch, Printed Vertical Slot Indicators
- [ ] B - No Slot Punch, Printed Horizontal Slot Indicators
- [ ] V - Vertical Slot Punch
- [ ] H - Horizontal Slot Punch

Option - Custom Artwork

### iCLASS Key Programming Information

- **Format Number** (example: H10301) **Bit Numbers** (example: 26 bit) **Facility Code**
- **Encoded Card #** Start Stop **Printed Card #** Start Stop
- **HID Elite ICE Number** (if applicable) - **Custom Format** **Site Code** **City Code** **OEM Code**
- **PIN (2-12 digits):**  **Sequential: Start #**  **Random: Length**
- **Special Instructions:**

---

1 The Printed key number is placed on the back of the key.
2 For Laser Engraved Printed numbers, consult factory for lead times and cost.
3 Key Ring sold separately (Part Number: 57-0001-02).
4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS Tag - 206

The iCLASS contactless smart Tag can be ordered either with both SIO and iCLASS programming or iCLASS programming only. iCLASS enable existing credentials or non-metallic devices such as cell phones or PDAs by adhering the iCLASS Tag.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

☑ 206 Base Model

iCLASS Memory Size and Allocation (Select one option)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

iCLASS Programming information (Select one option)
- H - Programmed with Security Identity Object (SIO) and iCLASS encoding. Specify programming information. (Recommended)
- P - Programmed with iCLASS access control application only. Specify programming information.
- C - iCLASS Unprogrammed, for use with iCLASS SE Encoder. Programming Information Not Required.

Front Packaging (Select one option)
- S - Gray with HID Standard Artwork
- K - Black with HID Standard Artwork
- C - Custom Artwork - Specify Custom Artwork Number

Back Packaging
- S - Adhesive Backing

Tag Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Tag Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

Slot Punch
- N - None

Option - Custom Artwork
- Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork

Enter your final Tag options from check boxes above. Example: 2060HSSNN

| Final Part Number | 206 | S | N | - | (Options #) |

iCLASS Tag Programming Information

Format Number _____ (example: H10301) Bit Numbers _____ (example: 26 bit) Facility Code ______

Encoded Card # Start ______ Stop ______ Printed Card # Start ______ Stop ______

HID Elite ICE Number (if applicable) - ______ (Custom Format) Site Code ______ City Code ______ OEM Code ______

PIN (2-12 digits): □ Sequential: Start # ______ □ Random: Length ______.

Special Instructions: ______

1 The Printed tag number is placed on the back of the tag.
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3 The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.
4 Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
iCLASS Clamshell Card - 208

Can be ordered either with both SIO and iCLASS programming or iCLASS programming only.
Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

208 Base Model

iCLASS Memory Size and Allocation
- 0 - 2k Bits (256 Bytes) with 2 Application Areas

iCLASS Programming (Select one option)
- HP - Programmed with Security Identity Object (SIO) and standard iCLASS Access Control Application. Programming information required. (Recommended)
- P - Programmed with standard iCLASS Access Control Application only. Programming information required.
- C - iCLASS Unprogrammed, for use with iCLASS SE Encoder. Programming Information Not Required.

Front Packaging (Select one option)
- M - Plain White Vinyl with Matte Finish
- G - Plain White with Gloss Finish
- A - iCLASS Clamshell - Adhesive Front
- C - Custom Artwork - Specify Custom Artwork Number

Back Packaging (Select one option)
- S - Base with Molded HID Logo
- C - Custom Artwork - Specify Custom Artwork Number

Card Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

Slot Punch
- V - Vertical Slot Punch

Option - Custom Artwork
- Specify Artwork Number — Refer to the Custom Artwork Forms for new Artwork

Enter your final card options from check boxes above. Example: 2080HPGSNV

Final Part Number | 208 | V - | (Options #)

iCLASS Card Programming Information

Format Number _____ (example: H10301) Bit Numbers _____ (example: 26 bit) Facility Code _____
Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____
HID Elite ICE Number (if applicable) - Custom Format Site Code _____ City Code _____ OEM Code _____
PIN (2-12 digits) : Sequential: Start # _____ Random: Length ______
Special Instructions: ______

1 Secure Identity Object (SIO) Programming is not mandatory but highly recommended. If SIO programming is not selected the letter H should be left out from Final Part Number, for example: 2080PGSNV
2 The part numbers for non-adhesive labels to be used with the iCLASS Clamshell with the adhesive front are 1324GGN31 without slot and 1324GGV31 with slot.
3 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS + Other HF Card - 232 / 242

iCLASS with MIFARE Classic or MIFARE DESFire EV1 contactless smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. For MIFARE Classic: This credential is only delivered with MIFARE Classic UID 4 Bytes long only (32 Bit). It is not available with 7 bytes UID for MIFARE Classic, only for MIFARE DESFire EV1.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### Base Model
- 232 Standard PVC
- 242 Composite 40% Polyester / PVC

### iCLASS Memory Size and Allocation (Select one option)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE Classic 1K)
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

### Card Programming (Select one option)
- J - Programmed with SIO Identity Object (SIO) iCLASS and 2\(^{nd}\) technology (Recommended)
- H - Programmed with Security Identity Object (SIO) for iCLASS only
- I - Programmed with SIO Identity Object (SIO) for 2\(^{nd}\) technology only
- B - Programmed iCLASS & 2\(^{nd}\) Technology. Specify Programming Information –
- P - Programmed iCLASS only not 2\(^{nd}\) Technology. Specify Programming Information.
- C - Unprogrammed iCLASS, for use with iCLASS SE Encoder, Non-programmed 2\(^{nd}\) Technology. Programming Information Not Required.
- A - Unprogrammed iCLASS, for use with iCLASS SE Encoder, Programmed 2\(^{nd}\) Technology.

### 2\(^{nd}\) High Frequency Technology (Select one option)
- M - MIFARE Classic 1K Bytes (only available with iCLASS 2k bits)
- N - MIFARE Classic 4K Bytes
- K - MIFARE DESFire EV1 8K Bytes

### Front Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

### Back Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

### iCLASS Card Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- A - Sequential Encoded/Printed (Laser Engraved)
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

### Slot Punch
- IMPORTANT - Dual High Frequency credentials do not allow a slot punch due to the antenna design. HID recommends using a badge holder to attach this card to a lanyard or badge clip.

### Option - Custom Artwork
- (Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from the above selections. Example: 2320HNGGNNN

---

12345 = Card ID Number
YYYYYYYY-YY = Sales Order Number

**Special Instructions:**

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The Printed card number is placed in the bottom right-hand corner for iCLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.
4. For Laser Engraved Printed numbers, consult factory for lead times and cost.
5. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
6. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
7. The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
iCLASS + Other 13.56 MHz (except LEGIC) + Prox Card - 252 / 262

The iCLASS with MIFARE Classic or MIFARE DESFire EV1 contactless smart card as well as HID Proximity offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. For MIFARE Classic: This credential is only delivered with MIFARE Classic UID on 4 Bytes long only (32 Bit). It is not available with 7 bytes UID for MIFARE Classic, only for MIFARE DESFire EV1.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model
- 252 Standard PVC
- 262 Composite 40% Polyester / PVC

iCLASS Memory Size and Allocation (Select one option)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE Classic 1K)
- 3 - 32k Bits (4K Bytes) Application areas 16k/16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16k/1

iCLASS / 2nd 13.56MHz Programming
- J - Programmed with SIO Identity Object (SIO) for iCLASS and 2nd technology programmed with SIO (Recommended).
- H - Programmed with Security Identity Object (SIO) for CLASS only.
- I - Programmed with SIO Identity Object only (SIO) for 2nd technology only.
- K - Programmed with Security Identity Object (SIO) for iCLASS and 2nd technology programmed (non SIO).
- B - Programmed iCLASS & 2nd Technology. Specify Programming Information.
- C - Unprogrammed iCLASS, for use with iCLASS SE Encoder. Non-programmed 2nd Technology. Programming Information Not Required.
- A - Unprogrammed iCLASS, for use with iCLASS SE Encoder, Programmed 2nd Technology. Specify Programming Information.

Other 13.56 MHz Technology (Select one option)
- M - MIFARE Classic 1K Bytes (only available with iCLASS 2k bits)
- N - MIFARE Classic 4K Bytes
- K - MIFARE DESFire EV1 8K Bytes

125 kHz Technology Card Programming (Select one option)
- P - "HID Prox" Programmed 125 kHz Technology. Specify Programming Information.
- C - "Indala/Casi Prox" Programmed 125 kHz Technology. Specify Programming Information.
- N - Initialized 125 kHz Technology. Programming Information Not Required.

Front Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

Back Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

iCLASS Card Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- A - Sequential Encoded/Printed (Laser Engraved)

Slot Punch
IMPORTANT - Dual High Frequency credentials do not allow a slot punch due to the antenna design. HID recommends using a badge holder to attach this card to a lanyard or badge clip.
- N - No Slot Punch

2nd 13.56 MHz Card Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- A - Sequential Matching Encoded/Printed (Laser Engraved)

125 kHz Card Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)

UHF Credentials

**UHF Card - 600**
The SIO Enabled UHF (Ultra High Frequency: 860-960 MHz) contactless smart card is designed for long read range (parking, gate, healthcare…) while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element. **Direct to Card printing on these cards is not recommended.**

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### Base Model
- **600** Composite 40% Polyester / PVC *

### Secure Identity Object Programming
- T - UHF Programmed with Secure Identity Object.

### Front Packaging (Select one option)

Format Number ______ (example: H10301) Bit Numbers ______ (example: 26 bit) Facility Code ______

Encoded Card # Start ______ Stop ______ Printed Card # Start ______ Stop ______

HID Elite ICE Number (if applicable) - ______ (Custom Format) Site Code ______ City Code ______ OEM Code ______

Special Instructions: ______

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small “HID logo” and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 The Printed card number is placed in the bottom right-hand corner on the back of the card.
4 Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.
5 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
6 For Laser Engraved Printed numbers, consult factory for lead times and cost.
* The composite construction is recommended for all cards that will have an over-laminate applied.
ProxPass® II Vehicle Identification Tag - 1351

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____
HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____ City Code _____ OEM Code _____

Special Instructions:_____

¹ For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
² The Printed tag number is placed on the back of the tag.
³ The MicroProx Tag is not for use on cards that use full insertion or tractor feed type readers.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the MicroProx Tag will work in every situation. Functional and non-functional MicroProx Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

MicroProx Placement
# ProxCard Plus Card - 168 / 169

## Instructions

1. Select one option from each category (1-5) and mark the appropriate box.
2. Complete the Programming Information and Company Information Sections.
4. HID Corporation will determine the correct part number based on the options you specify, and fax you the part number and specification sheet.
5. Place an order for the ProxCard® Plus card with the part number provided by HID.

### Card Thickness: 0.047“ ± 0.004” - Check with your printer manufacturer to verify card printability
- Magnetic Stripe applications: Verify reader slot width.

**Notes:**
- Some dye sublimation printers cannot accommodate pre-slot punched labels; consult with the printer manufacturer prior to ordering.
- Labels are packaged in multiples of 100 pieces. Minimum order quantity is 100 pieces. Orders will be accepted in multiples of 100 pieces per label Model.
- Make sure to adjust your dye sublimation printer setting to the proper PVC label thickness and dimension.
Indala 125kHz Credential

Every part number consists of a base model number to indicate the type of product, and a letter or number to indicate each product option. Each Indala product has a standard part number that includes default options, as indicated on the order guide. When an order is placed for a product, the base model number and all options must be specified. If you require any options that are different from the default options, you must also indicate those options at the time the order is placed. All part numbers must be complete to be accepted by HID’s order entry system.

All card orders must have the following information:

- **BASE MODEL NUMBER** - Specifies card or type
- **PROGRAMMING** - Specifies if card is factory or field programmed (format or format number, facility code, and ID number range must be given at time of order)
- **FRONT or FLAT SIDE GRAPHICS** - Specifies standard or custom artwork, and smart chip placement
- **BACK or EMBOSSED SIDE GRAPHICS** - Specifies standard or custom artwork, and smart chip placement
- **MARKING POSITION** - Specifies location of card marking.

**Note:** Card marking is surface printed and, therefore is not to be considered permanent. In certain cases, Laser etching may be used instead of inkjet marking. Laser etching is permanent marking but is not used on all products.

- **SLOT PUNCH** - Specifies slot location if available
- **CARD OPTIONS** - Applies to FlexCard® (Base Model FPCRD/CXCRD) only
- **MAGNETIC STRIPE OPTION** - Specifies if card is to have a magstripe and which type (ISO Imageable Cards only)
- **CUSTOM FILE NUMBER** - Specifies the artwork number to be used
### FPISO - FlexPass Imageable Card

**Standard Part No.:** FPISO-SSSCNA-0000  
**Description:** 125 kHz, white glossy finish front, white glossy finish with Indala logo back, marking on standard location, no slot punch, no magstripe, no artwork

#### BASE MODEL NUMBERS
- **FPISO**: FlexISO® Proximity Card  
- **FPWGD**: FlexISO Proximity and Wiegand Combination Card  
- **FPIXT**: FlexISO XT Composite Proximity Card

#### PROGRAMMING
- **S** = Standard, Programmed, Low Frequency 125 kHz - exact coding standard, with no gaps or over-runs
- **N** = Not Programmed, Low Frequency 125 kHz (Blank/Programmable)

#### FRONT GRAPHICS
- **S** = Standard white glossy finish, suitable for video imaging  
- **C** = Custom (Artwork on file or new)

#### BACK GRAPHICS
- **S** = Standard white glossy finish with Indala logo, card marking (Sales Order & matching internal ID number), suitable for dye sublimation imaging in most areas  
- **C** = Custom (Artwork on file or new)

#### MARKING POSITION
- **Note:** Standard Marking is Label Code E153, which is Sales Order number & matching 5 digit internal ID number, is used unless otherwise specified.  
- **C** = Position 3/Standard Location (Back Side/Lower Right Corner)  
- **Note:** Inkjet marking is surface printed and, therefore is not to be considered permanent. In some cases Laser etching will replace inkjet marking. Laser etching is permanent in most applications.

#### SLOT PUNCH
- **N** = None  
- **V** = Vertical (portrait orientation) - Unavailable for FPWGD  
- **H** = Horizontal (landscape orientation)

#### MAGNETIC STRIPE OPTION
- **A** = No Magstripe  
- **B** = Standard Magstripe (3-track, high coercivity, 4000 oersted)  
- Other Magstripe options are available as special orders. Call Customer Service for special order minimums and lead times

#### CUSTOM FILE NUMBER (4 Characters - Factory Assigned)
- **0000** = No Artwork (Call your Customer Service Representative for new artwork)
FPCRD - FlexCard Standard Card

Standard Part No.: FPCRD-SSSMW-0000
Description: 125 kHz, printed Indala logo on front, embossed Indala logo on back, card marking on flat side (lower right corner with slot to the right), white color (not printable), no artwork. Vertical slot punch only.

- **1** - Plain White with Gloss Finish with Magnetic Stripe
- **2** - Standard HID MIFARE Artwork with Magnetic Stripe
- **3** - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

**Card Numbering (Select one option)**

- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **U** - UID (CSN) HEX card numbering only (Inkjetted)
- **V** - UID (CSN) Decimal card numbering only (Inkjetted)
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)
- **B** - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- **C** - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)
- **Z** - Reversed UID (CSN) Decimal card numbering only (Laser Engraved)

**Slot Punch (Select one option)**

- **N** - No slot punch, Printed Vertical Slot Indicators
- **V** - Vertical Slot Punch
- **H** - Horizontal Slot Punch

**Option - Custom Artwork (Specify Artwork Number - Refer to the Custom Artwork forms for new artwork)**

Enter your final card options from check boxes above. Example: 3400PGGNN

| Final Part Number |  |  |  |  | (Options #) |
13.56 MHz Card Programming Information

Format Number _____ (example: H10301)  Bit Numbers _____ (example: 26 bit) Facility Code _____

Encoded Card #  Start _____  Stop _____  Printed Card #  Start _____  Stop _____

HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____  City Code _____  OEM Code _____

Special Instructions: _____

For Contact Smart Chip selection, refer to Logical Access How to Order Guide. Standard configuration does not include a contact smart chip module.

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.

2 Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.

3 The Printed card number is placed in the bottom right-hand corner on the back of the card on Proximity Format Programming only.

4 For Laser Engraved Printed numbers, consult factory for lead times and cost. When printed, by default the number is encoded MSB (most significant byte) -> LSB (least significant byte).

5 Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.

6 Includes a permanent Unique MIFARE 32 Bit Serial number. When printed the number is encoded MSB (most significant byte) -> LSB (least significant byte).

7 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

* The composite construction is recommended for all cards with over-laminate applied.
MIFARE Classic + Prox card - 350 / 355 / 1431 / 1441 / 1437 / 1447

Encompasses the industry’s broadest range of open standard contactless smart card products. Provides the memory structure and capacity to store multiple applications on a single credential with the addition of Proximity technology for easier migration. All MIFARE Classic + Prox cards can be ordered with or without SIO encoding.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

13.56 MHz Card Programming Information

Format Number _____ (example: H10301)  Bit Numbers _____ (example: 26 bit) Facility Code _____

Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____

HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____ City Code _____ OEM Code _____

Special Instructions: _____

† The Printed tag number is placed on the back of the tag.

‡ For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.

† The Tag is not for use on cards that use full insertion or tractor feed type readers.

□ Includes a permanent Unique MIFARE 32 Bit Serial number.

* Up to 1.14in (29mm) read range in free air.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the Tag will work in every situation. Functional and non-functional Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

* = Actual read range performance affected by mounting location, environment and the tags tuned resonant frequency.
**MIFARE DESFire EV1 Card - 370 / 375**

Based on open global standards for security, and is interoperable with existing MIFARE DESFire EV1 infrastructures. All MIFARE DESFire EV1 cards can be order either with or without SIO encoding.

*Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.*

### Card with SIO encoding

- □ 3700 Standard PVC
- □ 3750 Composite 40% Polyester/PVC*

### MIFARE DESFire EV1 Memory Size

- □ C - 8K Bytes MIFARE DESFire EV1

### Programming

- □ P - Programmed with Security Identity Object (SIO)

Special Instructions:

- For Contact Smart Chip selection, refer to Logical Access How to Order Guide. Standard configuration does not include a contact smart chip module.

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.

2. Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.

3. The Printed card number is placed in the bottom right-hand corner on the back of the card on Proximity Format Programming only. Permanent Unique MIFARE 56 Bit serial # cannot be printed on cards.

4. For Laser Engraved Printed numbers, consult factory for lead times and cost. When printed, by default the number is encoded MSB (most significant byte) -> LSB (least significant byte).

5. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

6. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.

Consult with the printer manufacturer prior to ordering.

* The composite construction is recommended for all cards with over-laminate applied.
MIFARE DESFire EV1 + Prox Card - 380 / 385 / 1451 / 1457

Based on open global standards for security, and is interoperable with existing MIFARE DESFire® infrastructures with the addition of Proximity technology for easier migration. All MIFARE DESFire EV1 cards can be ordered either with or without SIO encoding.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Card with SIO encoding + Prox (Recommended)**
- 3800 Standard PVC
- 3850 Composite 40% Polyester/PVC

**MIFARE DESFire EV1 Memory Size**
- C - 8K Bytes DESFire EV1

**Programming (Select one option)**
- P - Programmed with Security Identity Object (SIO) for MIFARE DESFire EV1, Prox non-programmed
- R - Both interfaces programmed (MIFARE DESFire EV1 with Security Identity Object (SIO), Prox programmed with HID format)

**Front Packaging (Select one option)**
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

**Back Packaging (Select one option)**
- G - Plain White with Gloss Finish
- 1 - Plain White with Gloss Finish with Magnetic Stripe
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

**13.56 MHz DESFire Card Numbering**
- M - Sequential Matching Encoded/Printed (Inkjetted)5
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)6
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)6
- A - Sequential Matching Encoded/Printed (Laser Engraved)4
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)4
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)4

**Slot Punch**
- N - No Slot Punch

**125 KHz Card Numbering**
- M - Sequential Matching Encoded/Printed (Inkjetted)6
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)6
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)6
- A - Sequential Matching Encoded/Printed (Laser Engraved)6
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)6
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)6

**Card without SIO encoding + Prox**
- 1451 Standard PVC
- 1457 Composite 40% Polyester/PVC

*HITAG-based cards are not available with composite

**MIFARE DESFire EV1 Memory Size**
- C - 8K Bytes DESFire EV1

**Programming (Select one option)**
- L - Programmed (125KHz only). Specify programming information
- N - Non-Programmed (125KHz & 13.56MHz). Programming information not required.
- S - Custom programming. (13.56 MHz only), Prox Configured Specify Programming Information.
- R - Custom programming, (125KHz and Custom 13.56 MHz), Specify Programming Information.
- F - Non-Programmed (HITAG1 & 13.56 MHz). Programming Information Not Required.
- G - Custom Programmed, (13.56 MHz only), HITAG1 Configured only. Specify Programming Information for MIFARE DESFire EV1.

**13.56 MHz DESFire Card Numbering**
- M - Sequential Matching Encoded/Printed (Inkjetted)5
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)5
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)5
- A - Sequential Matching Encoded/Printed (Laser Engraved)4
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)4
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)4

**125 KHz Card Numbering**
- M - Sequential Matching Encoded/Printed (Inkjetted)6
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)6
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)6
- A - Sequential Matching Encoded/Printed (Laser Engraved)6
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)6
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)6

**Note:** 380 credential may vary.

**Special Instructions:**

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small "HID logo" and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The Printed card number is placed in the bottom left-hand corner (125kHz) and in the bottom right-hand corner (13.56 MHz) on the back of the card on Proximity Programming only. Permanent unique MIFARE DESFire 56 Bit serial # cannot be printed on cards.
4. For Laser Engraved Printed numbers, consult factory for lead times and cost.
5. The composite construction is recommended for all cards with over-laminate applied.
### MIFARE Classic + MIFARE DESFire EV1 Card - 282

The MIFARE Classic + MIFARE DESFire EV1 contactless card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

#### Base Model

- **282 Composite 40% Polyester / PVC**

#### MIFARE Classic High Frequency Technology

- **N** - MIFARE Classic 4K Bytes

#### Card Programming (Select one option)

- **B** - Programmed MIFARE Classic and MIFARE DESFire EV1 Technology. Specify Programming Information.
- **P** - MIFARE Classic Programmed only, not MIFARE DESFire EV1 Technology. Specify Programming Information.
- **N** - Non-Programmed MIFARE Classic and MIFARE DESFire EV1.

#### MIFARE DESFire EV1 High Frequency Technology

- **K** - MIFARE DESFire EV1 8K Bytes

#### Front Packaging (Select one option)

- **G** - Plain White with Gloss Finish
- **C** - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

#### Back Packaging (Select one option)

- **G** - Plain White with Gloss Finish
- **C** - Custom Artwork with Gloss Finish - Specify Custom Artwork Number
- **1** - Plain White with Gloss Finish with Magnetic Stripe
- **3** - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

#### MIFARE Classic High Frequency Card Numbering (Select one option)

- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)
- **B** - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)

#### Slot Punch

**IMPORTANT** - Dual High Frequency credentials do not allow a slot punch due to the antenna design. HID recommends using a badge holder to attach this card to a lanyard or badge clip.

- **N** - No Slot Punch

### MIFARE DESFire EV1 High Frequency Technology Card Numbering (Select one option)

- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)
- **B** - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- **C** - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)
- **U** - UID (CSN) HEX card numbering only (Inkjetted)
- **V** - UID (CSN) Decimal card numbering only (Inkjetted)
Option - Custom Artwork

☐ Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork

Enter your final card options from the above selections. Example: 282NBKGGNNN

Special Instructions: _____

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, or custom artwork, will still have a small “HID logo” and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 The Printed card number is placed in the bottom right-hand corner for MIFARE 13.56 MHz and in the bottom center for DESFire on the back of the card.
4 For Laser Engraved Printed numbers, consult factory for lead times and cost.
* The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
CREDENTIAL PROGRAMMERS

Understanding HID Credential programmers

HID Global offers two credential encoders enabling field programming of access credentials for use with HID Global’s world class access control reader portfolio. HID Global offers credential programming for technologies from 125 kHz to 13.56 MHz, including HID Prox, iCLASS, iCLASS SE and iCLASS Seos. This How to Order Guide provides part numbers and ordering instructions for HID Global’s Credential Encoders. We currently offer the following two credential Encoding solutions:

- The iCLASS SE Encoder, capable of encoding a wide range of credential technologies, including iCLASS Seos, iCLASS SE, iCLASS, HID Prox, MIFARE Classic and MIFARE DESFire EV1 from single encoder.
- The ProxSmith® Programmer, used to encode Indala Prox Technology Credentials.

Credential Encoder Ordering Basics

The two current Encoding solutions are available with different modes of ordering. The iCLASS SE Encoder is available for sale without a renewable lease agreement since it utilizes a credential credit process to encode cards. The HID ProxSmith credential Encoder is leased directly to the Encoder user. All Encoder leases have an initial lease period of twenty-four (24) months. Thereafter, the lease period continues for successive 24-month renewal periods.

To order an encoder, use the subsequent pages to:

- Determine which of the two encoding solutions is best suited to your needs
- Determine if you need to lease, renew an existing lease or purchase the encoding product
- Determine the correct Encoder part number by matching the technology and application
- Fill out the applicable Encoder lease/sales request (if applicable)
- Fill out the appropriate Credential Credit and format requests (in the case of the iCLASS SE Encoder)

If at any time you require assistance, contact HID Global Sales at www.hidglobal.com/customer-service
iCLASS SE Encoder Summary

The iCLASS SE Encoder Platform for encoding contactless credentials is:

- **Dynamic** - Support for a wide range of credential technologies, including iCLASS Seos, iCLASS SE, and iCLASS, HID Prox, MIFARE Classic, and MIFARE DESFire EV1 from single encoder.
- **Flexible** - Manage custom keys locally or leverage HID standard and Elite keys.
- **Convenient** - On-site programming of card stock speeds up the delivery time to obtain and issue cards.
- **Seamless** - Encode multi-tech credentials in a single pass, saving time and resources.

HID Global’s iCLASS SE Encoder is an ideal solution for organizations to encode credentials and configure readers. Highly versatile, the encoder can locally manage HID Global standard Keys, Elite Keys or securely define and manage custom keys. The dynamic iCLASS SE Encoder has the capability to encode and manage a wide variety of credential technologies, interoperable with iCLASS SE readers. The solution allows users to upgrade existing card populations for use with higher security iCLASS SE Platform readers. That same flexibility also supports new credential technologies as they arise.

The iCLASS SE Encoder is available either as a desktop device as the CP1000D, or as an in-line encoder within a FARGO card printer. The in-line encoder enables organizations to graphically and electronically personalize smart cards in one seamless process, saving time and energy. This How to Order Guide will provide details for ordering credential credits, formats, and key for both the desktop and in-line encoder. To find the part number for an in-line encoder inside of a FARGO card printer, see the FARGO card printer How To Order Guide.

iCLASS SE Encoder - How Does it Work?

The iCLASS SE Encoder solution is made up of following components:

- **Hardware** - Encoder is available in either a desktop or in-line form factor
- **Software** - The encoder solution is compatible with two editions of Asure ID:
  - **Asure ID CP1000 Edition** - This edition is included with the purchase of a desktop encoder (CP1000D) and is suitable for standalone encoding. The solution enables data to be manually entered or to have it automatically increment after each encoded card.
  - **Asure ID Exchange Edition** - This edition is purchased separately and in addition to supporting the desktop encoder is the only edition which supports the in-line encoder. This solution can also connect to external databases in real-time when reading/encoding contactless cards.
- **Credential credits** - The encoder utilizes credential credits to enable the encoding of contactless cards. The solution will decrement a credential credit each time a card has been encoded. Each credential technology and security combination will utilize a specific credential credit type (i.e. iCLASS Seos card secured with an Elite key). Credential credit part numbers are allocated for Genuine HID or Third Party Credentials. The iCLASS SE Encoder is able to determine the source of the credential during the encoding cycle and will decrement the appropriate counter accordingly.
- **Formats** - Utilizes pre-defined format templates, eliminating the need to understand access control formatting and card numbering schemes. HID formats can be ordered using this HTOG but approval may be needed for proprietary formats.
- **Keysets** - Supports HID Elite, Standard, or Custom keys. Standard and HID Elite keys can be ordered using this HTOG but approval will be needed for HID Elite keys.
The following items are included with each desktop iCLASS SE Encoder:

1 - CP1000D Desktop Encoder
- 1 - Installation Guide
- 1 - HID USB Flash Drive
  - Asure ID CP1000 Edition Desktop Application
  - Supporting Technical Documents
  - Encoder Configuration Package (*.ise file) which includes the H10301 format, media key sets, and reader configuration key sets
- Variety of sample cards and credential credits (see table below)

iCLASS SE Encoder Order Form

We recommend using the iCLASS SE Encoder HTOG Supplement to place an initial iCLASS SE Encoder order or when placing an order for additional Credential Credits, Key Sets, or Formats. However, the same information from the supplement can be derived from this HTOG.

Do you need to purchase an iCLASS SE Encoder?  
** (Yes / No)

** If you are replacing a legacy programmer (i.e. CP400 or Prox Programmer) please provide a screen shot of what you are currently programming today**

1. If you are ordering Credential Credits, Keys, or Formats for an existing iCLASS SE Encoder please identify the Encoder Serial Number (i.e. CPXXXX). The Serial Number can be found on the bottom of the desktop encoder or on the printer product label if installed within a FARGO card printer.

_________________

2. What email address should HID send the secure file with the Credential Credits, Format, or Key Sets?

__________________

3. To order additional Credential Credits please review the “iCLASS SE Encoder Credential Credit” section and enter additional Credential Credits to the order in the following table:

<table>
<thead>
<tr>
<th>Counter Ref Number (from section below)</th>
<th>Quantity</th>
<th>HID Elite1 ICE Number (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRDT</td>
<td>-</td>
<td></td>
</tr>
<tr>
<td>CRDT</td>
<td>-</td>
<td></td>
</tr>
<tr>
<td>CRDT</td>
<td>-</td>
<td></td>
</tr>
</tbody>
</table>

1 HID Elite was previously known as iCLASS Elite®. Contact customer services for information on the authorization process.

Note: MOQ for all Credential Credits is 100. Maximum of 10,000 of each Credential Credit can be ordered at one time.

4. To order additional Key Sets please review the “iCLASS SE Encoder - Key Sets” section and enter the final iCLASS Encoder Keyset part numbers below:

<table>
<thead>
<tr>
<th>Technology Ref. Number (from section below)</th>
<th>Security Ref. Number (from section below)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CKEYMED</td>
<td>-</td>
</tr>
<tr>
<td>CKEYCFG</td>
<td>-</td>
</tr>
<tr>
<td>CKEYSIO</td>
<td>-</td>
</tr>
</tbody>
</table>

Note: If you are unfamiliar with smart card key sets, please contact your sales manager prior to ordering.

5. The iCLASS SE Encoder comes preconfigured with the basic HID Open 26 Bit Wiegand format (H10301), but can also be loaded with additional formats to provide extended support of credential requirements. To order additional Open non-tracked Proprietary1 and Open Tracked2 formats use the following table.

<table>
<thead>
<tr>
<th>Part Number</th>
<th>Format Number</th>
<th>Facility Code3 (If applicable)</th>
<th>Start Number2 (If applicable)</th>
<th>End Number3 (If applicable)</th>
<th>Quantity3 (If applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>FRMT-J1</td>
<td>FRMT-J1</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Corporate/University 1000 Format Credits

Corporate 1000® and University 1000® formats are available for use on the iCLASS SE Encoder. These formats must be ordered separately from other formats to ensure uniqueness of numbers used in both the iCLASS SE Encoder and within the HID Manufacturing Facilities. Order the Corporate or University 1000 number ranges using the indicated base part number and by completing the form below:

FRMT- J2 (Corporate/University 1000)

<table>
<thead>
<tr>
<th>Quantity</th>
<th>Format Number</th>
<th>Start Number</th>
<th>End Number</th>
</tr>
</thead>
</table>

1 Authorization is required. If you are not authorized to use the format, contact customer services for information on the authorization process.

2 H10304 facility codes are automatically registered to the first user of that facility code. If you are not authorized to use the requested facility code, contact customer service for information on the authorization process. Alternatively state a facility code value of "new" to be automatically assigned and registered with an unused facility code.

3 Facility Code, Start Number, End Number and quantity do not apply to Open non-tracked formats but do apply to proprietary and Open-tracked formats

iCLASS SE Encoder - Credential Credits

The iCLASS SE Encoder utilizes credential credits to enable the encoding of contactless credentials. Each credential technology and security combination will utilize a specific credential credit. Also note that credential credit part numbers are allocated for Genuine HID or Third Party Credentials, the iCLASS SE Encoder is able to determine the source of the credential during the encoding cycle and will decrement the appropriate counter accordingly.

Base Part Number CRDT-xx (Select xx from the tables below.)

iCLASS and iCLASS Seos Technology Credential Credits

Used to encode Genuine HID Standard iCLASS 2K, 16K, or 32K and credentials or Genuine HID/Third Party Seos credentials.

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Technology</th>
<th>Standard</th>
<th>HID Elite</th>
<th>SIO</th>
<th>HID Elite, SIO</th>
<th>Custom Data</th>
</tr>
</thead>
<tbody>
<tr>
<td>Genuine HID</td>
<td>iCLASS</td>
<td>A0</td>
<td>A1</td>
<td>A3</td>
<td>A4</td>
<td>A5</td>
</tr>
<tr>
<td>Genuine HID</td>
<td>Seos</td>
<td>-</td>
<td>-</td>
<td>D3</td>
<td>D4</td>
<td>D5</td>
</tr>
<tr>
<td>Third Party</td>
<td>Seos</td>

<td>H3</td>
<td>H4</td>
<td>-</td>
</tr>
<tr>
<td>Configuration</td>
<td>Seos</td>
<td>-</td>
<td>-</td>
<td>J0</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1 Authorization is required by the end user or owner of the HID Elite (formerly iCLASS Elite) keys before these can be released. Contact customer services for information on the authorization process.

Examples:

Genuine HID iCLASS Credential with Standard Encoding - CRDT-A0
Genuine HID iCLASS Credential with SIO Encoding - CRDT-A3

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Compatible with</th>
</tr>
</thead>
<tbody>
<tr>
<td>A0</td>
<td>iCLASS Rev A, B, C &amp; iCLASS SE interpreter type “T” with keyset “0”</td>
</tr>
<tr>
<td>A1</td>
<td>iCLASS Rev A, B, C &amp; iCLASS SE interpreter type “T” and matching Elite ICE keyset</td>
</tr>
<tr>
<td>A3</td>
<td>iCLASS SE readers only interpreter type “T” or “N” with keyset “0”</td>
</tr>
<tr>
<td>A4</td>
<td>iCLASS SE readers only interpreter type “T” or “N” with matching Elite ICE keyset</td>

<td>iCLASS SE readers</td>
</tr>
</tbody>
</table>
### MIFARE Classic Technology Credential Credits

Use to encode Genuine HID or third party MIFARE Classic 1K or 4K credentials.

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Technology</th>
<th>Standard</th>
<th>SIO</th>
<th>HID Elite$^1$, SIO</th>
<th>Custom Data</th>
</tr>
</thead>
<tbody>
<tr>

<td>MIFARE Classic</td>
<td>F0</td>
<td>F3</td>
<td>F4</td>
<td>F5</td>
</tr>
<tr>
<td>Configuration Cards</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>J0</td>
</tr>
</tbody>
</table>

**Example:**
Third Party MIFARE Classic Credential with HID Elite and SIO Encoding - **CRDT-F4**

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Reader Compatibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>B0, F0</td>
<td>HID 6055B, FlexSmart® 6071 / 6072 and Smart ID 8030DSHM &amp; 8031DSHM (HID MIFARE Only)</td>
</tr>
<tr>
<td>B3, F3</td>
<td>iCLASS SE readers only (interpreter type “T” or “N”) with keyset “2”</td>
</tr>
<tr>
<td>B4, F4</td>
<td>iCLASS SE readers only (interpreter type “T” or “N”) with matching HID Elite ICE keyset</td>
</tr>
<tr>
<td>B5, F5</td>
<td>iCLASS SE Migration readers only with matching custom key and mapper profile</td>
</tr>
</tbody>
</table>

$^1$ Authorization is required by the end user or owner of the HID Elite (formerly iCLASS Elite) keys before these can be released. Contact customer service for information on the authorization process.

### MIFARE DESFire EV1 Technology Credential Credits

Use to encode Genuine HID or third party MIFARE DESFire EV1 credentials.

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Technology</th>
<th>SIO</th>
<th>HID Elite$^1$, SIO</th>
<th>Custom Data</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Third Party</td>
<td>MIFARE DESFire EV1</td>
<td>G3</td>
<td>G4</td>
<td>G5</td>
</tr>
<tr>
<td>Configuration Cards</td>
<td></td>
<td></td>
<td></td>
<td>J0</td>
</tr>
</tbody>
</table>

**Example:**
Third Party MIFARE DESFire EV1 Credential with SIO Encoding - **CRDT-G3**

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Reader Compatibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>C3, G3</td>
<td>iCLASS SE readers only (interpreter type “T” or “N”) with keyset “2” or matching custom key</td>
</tr>
<tr>
<td>C4, G4</td>
<td>iCLASS SE readers only (interpreter type “T” or “N”) with matching HID Elite ICE keyset</td>
</tr>
<tr>
<td>C5, G5</td>
<td>iCLASS SE Migration readers only with matching custom key and mapper profile</td>
</tr>
</tbody>
</table>

$^1$ Authorization is required by the end user or owner of the HID Elite (formerly iCLASS Elite) keys before these can be released. Contact customer service for information on the authorization process.
HID Prox Technology Credential Credits

</tbody>
</table>

iCLASS SE Encoder - Keysets
Key Management is a complex subject that requires some understanding of the various technologies and how smart card applications are managed. For example, encoding data on an iCLASS or MIFARE Classic card requires, at a minimum, a single authentication key to gain access to the application area or sector. The application data may have additional security enhancements requiring additional keys. The HID Application for example, requires two DES keys, one key for authentication to the app area and another key for encryption of the application data, while the Secure Identity Object requires AES keys for encryption and signing the credential. Each technology will differ in terms of the keys that need to be created and managed. The iCLASS SE Encoder includes utilities for managing individual keys as well as grouping those keys into Keys sets for ease of deployment.

To ensure your iCLASS SE Encoder is equipped with the correct keys it is necessary to order Keysets appropriately. There are three classes of keysets available which are explained below.

**Media Keyset**
Media keysets provide all the cryptographic keys necessary to set up and encode cards. The keys delivered with each part number will vary depending on the needs of the technology. For instance using the table below the part number CKEYMED-ICL-0 will deliver the iCLASS media Keyset with Standard or HID Elite keys for accessing the HID application area, the encryption key for the PACS data, and the key for accessing the SE application area. If you are using HID Elite Credentials, the part number will be CKEYMED-ICL-1.

Part number CKEYMED-MIF-n will deliver Key A and Key B for accessing the HID application on a MIFARE Classic card as well as transport keys for the MAD (MIFARE Application Directory).

Part number CKEYMED-DES-n delivers keys for accessing the HID application on a MIFARE DESFire EV1 card including the PICC master key, the application master key and the application read and write keys.

**Reader Configuration Keyset**
The Reader configuration keyset provides the privacy and authentication keys necessary to create configuration cards. Typically, configuration cards are needed to push new keys and/or configuration data to the reader. In order to utilize this solution, programmable configuration card are needed to be ordered.

Part numbers for these cards are 0501500295-READER - used for reader configuration, and 0501500295-ELITE - used for HID Elite key preparation.
SIO Keyset
The SIO Keyset provides the privacy and authentication keys for HID’s Secure Identity Objects. Because SIOs are independent of card technology, their keys are ordered separately.
As a default, the iCLASS SE Encoder is loaded with the following Keysets as standard:

- **iCLASS Media Keyset**
  - Standard (CKEYMED-ICL-0 & CKEYMED-Seos)

- **MIFARE Keysets**
  - MIFARE Classic & MIFARE DESFire EV1
  - Standard (KEYMED-MIF-0 & CKEYMED-DES-0)

- **Reader Configuration Keyset**
  - Standard (CKEYCFG-0)

- **SIO Keyset**
  - Standard (CKEYSIO-0)

<table>
<thead>
<tr>
<th>Description</th>
<th>Base Part Number</th>
<th>Technology</th>
<th>Security</th>
</tr>
</thead>
<tbody>
<tr>
<td>iCLASS Media Keyset</td>
<td>CKEYMED</td>
<td>ICL - iCLASS MIF - MIFARE Classic DES - MIFARE DESFire EV1 SEOS - Seos</td>
<td>0 - Standard 1 - HID Elite</td>
</tr>
<tr>
<td>Reader Configuration Keyset</td>
<td>CKEYCFG</td>
<td>-</td>
<td>0 - Standard 1 - HID Elite</td>
</tr>
<tr>
<td>SIO Keyset</td>
<td>CKEYSIO</td>
<td>-</td>
<td>0 - Standard 1 - HID Elite</td>
</tr>
</tbody>
</table>

**Supplementary Cards**
To order cards or tags for use with the iCLASS SE Encoder, please see the Credentials section of this How To Order Guide. Unprogrammed cards and tags are available for most technologies, and can be ordered separately from the kit for use with your iCLASS SE Encoder.
ProxSmith Encoder

Part Number - New Lease

Using the following table, determine the Encoder part number to order a new Encoder. If you are renewing an Encoder lease, see the ProxSmith Encoder Part Number - Renewing Lease form below.

Select the Encoder part number by placing an X in the Order column and provide the required Encoder format information in the tables below.

<table>
<thead>
<tr>
<th>Encoder Name or Model</th>
<th>Brand or Technology</th>
<th>Use</th>
<th>Part Number</th>
<th>Order (Check box)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ProxSmith</td>
<td>Indala Prox</td>
<td>Encode Indala Prox access credentials for use with Indala Prox and multiCLASS Indala Prox Readers.</td>
<td>AFP-1000</td>
<td>☐</td>
</tr>
</tbody>
</table>

ProxSmith Encoder Format Information - New Lease/Sale

For all ProxSmith Encoders fill out the following format information:

Specify the following:

A- Format Number #1

- Facility Code Range, or specific Facility Code
- Card Number Range (Start and Stop)

B- Format Number #2 (If required)

- Facility Code Range, or specific Facility Code
- Card Number Range (Start and Stop)

ProxSmith Encoder Part Number - Renewing Lease

Determine the Encoder part number to order when renewing an Encoder lease. This is done bi-annually, starting two (2) years after the initial lease of the Encoder. Select the Encoder part number by placing an X in the Order column, then fill out applicable Encoder request form.

<table>
<thead>
<tr>
<th>Encoder Model</th>
<th>Brand or Technology</th>
<th>Part Number</th>
<th>Order (Place X for Ordered Encoder)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ProxSmith</td>
<td>Indala Prox</td>
<td>MC-AFP-1000-RENEW</td>
<td>☐</td>
</tr>
</tbody>
</table>
