Understanding HID Global Readers

What should I know about security keysets?

iCLASS SE® readers and iCLASS Seos®/iCLASS SE credentials offer two keyset security schemes, HID Elite™ and Standard.

The **HID Elite Security Program** supports a unique keyset on a per site/company basis. The keyset governs a variety of keys, including:

- Media (credential) keys for iCLASS SE, SIO-encoded iCLASS, MIFARE Classic® (SIO®) and MIFARE DESFire EV1® (SIO) credentials
- SIO authenticity and privacy keys (media independent)
- Configuration programming keys (for programming reader configuration, also media independent)

When utilizing HID’s standard key set for the above keys, all standard keyed credentials work with all standard keyed readers. Additionally, any Standard Security configuration card configures a Standard Security reader (only accomplished during the first five (5) seconds after reader powers-up). Conversely, when utilizing the HID Elite program, only site/company specific HID Elite credentials and programming cards work with matching readers.

The **Standard Security Program** provides universal keysets that offer maximized compatibility by keying readers and cards with matching security for use in the general population. This allows for maximized compatibility because readers and cards are not keyed on a per site/company basis but rather all keyed the same. This offers the advantage to the integrator as a standard stock of readers and cards will interoperate for a variety of sites/companies, rather than needing different stocks of readers and cards for each individual site. iCLASS SE readers provide two Standard Security Keysets that offer compatibility with the following credentials:

How can I order HID Elite configured readers?

- Direct customers of HID must be authorized to purchase components with HID Elite keys. If you are not authorized, you must have the key owner authorize you through the Authorization form. See [http://www.hidglobal.com/services/secure-identity/credential-programs/iClass-elite-and-se-elite](http://www.hidglobal.com/services/secure-identity/credential-programs/iClass-elite-and-se-elite).
- Ensure the HID Elite flag is set in the part number (of readers, credentials and programming cards).
- All Purchase Orders for HID Elite components must be ordered with the HID Elite reference number (starts with ICE or MOB).

How can I check the status of my order?

- To check order status, go to: [https://orderstatus.hidglobal.com/WebOrderStatus/](https://orderstatus.hidglobal.com/WebOrderStatus/)
Selecting the Right Reader

In order to make sure our customers benefit from the latest and most secure technology, based on their needs and current situation, HID Global offers a reader product guidance. Follow the suggested route below based on your current credential population, to see what reader solution is recommended by HID Global.

START

Credentials already issued/deployed?

NO

YES

iCLASS Seos and/or HID Prox cards only?

NO

YES

Magnetic stripe cards?

NO

YES

FIPS 201 standard cards (PIV, CIV, CAC, TWIC etc.)?

NO

YES

HID Global recommends: iCLASS SE - Seos Profile readers
Simplest configuration as well as best-in-class security and privacy protection.

HID Global recommends: iCLASS SE Magnetic Stripe readers
Backwards compatible with magnetic stripe cards, future capable to support newer credential technologies.

HID Global recommends: pivCLASS readers
Support for FIPS 201 standard cards (PIV, CIV, CAC, TWIC etc.).

HID Global recommends: iCLASS SE - Standard Profile readers
Broad compatibility with legacy and new credential technologies, including iCLASS Seos, iCLASS SE, iCLASS and Indala Prox.
iCLASS SE Readers

Note: See Selecting the Right Reader on page 6 for guidance.

iCLASS SE Reader - Seos Profile with Bluetooth Option

Application: Designed to instill confidence with best-in-class security and privacy protection.

Technologies Supported: iCLASS Seos, HID Prox, and HID Mobile Access® Mobile IDs via NFC and/or Bluetooth Smart.

1. Select one option from each of the following sections to construct part number:

Reader Model (Select one model)

- 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
- 910 - Model R15 - Designed for door applications requiring a mullion style mounting.
- 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
- 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting and keypad input.

125 KHz Credential Support (Select one option)

- N - No 125 KHz support
- P - Support for HID Prox

13.56 MHz and Bluetooth credential support (Select one option)

- S - Supports iCLASS Seos cards, and Mobile IDs via NFC
- B - Supports iCLASS Seos cards, and Mobile IDs via NFC and Bluetooth Smart.

Controller Communication

- N - Wiegand

Wiring Connection (Select one option)

- N - Pigtail
- T - Terminal strip

Hardware Revision

- E - Revision E

Color

- K - Black

Keyset (Select one option)

- 2 - Standard and Mobile-Ready - supports iCLASS Seos credentials with standard keys. Prepared to support HID Mobile Access, but lacks the personalized configuration to read an organization’s specific Mobile IDs. This configuration can be ordered at any time but will require field activation after the organization has completed registration for HID Mobile Access.

- E - HID Elite and Mobile-Enabled - supports iCLASS Seos credentials and Mobile IDs. Fully activated and personalized to support an organization's specific Mobile IDs. These readers can only be ordered after the organization has completed registration for either HID Elite or HID Mobile Access. If HID Elite reference (ICE) is given at time of order, only iCLASS Seos credentials with HID Elite keys are supported. If Mobile Reference (MOB) is given at time of order, only iCLASS Seos credentials with standard keys are supported.

Configuration Settings

- 0000 - Standard configuration. All iCLASS SE Readers - Seos Profile ship with the following standard configuration:
  - LED normally red, LED flashes green and beeps on card read
  - Keypad output is 4-bit (if keypad reader)

Non-standard configuration can be applied at time of installation using the configuration card accessories listed on next page.
2. Enter the numbers/letters from the selections above into the table below.
The resulting “Final Part Number” is used when ordering reader.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Note:** The above configuration cards are only intended for use with iCLASS SE Reader - Seos profile.
iCLASS SE Reader - Standard Profile with Bluetooth
Application: Designed to ensure compatibility with legacy credentials and capability to support the future.
Technologies Supported: Wide variety of contactless credentials including HID Mobile Access Mobile IDs via NFC and/or Bluetooth Smart.

1. Select one option from each of the following sections:

Reader Model (Select one model)
- 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
- 910 - Model R15 - Designed for door applications requiring a mullion style mounting.
- 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
- 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting and keypad input.

125 KHz Credential Support (Select one option)
- N - No 125 KHz support
- P - Support for HID Prox, AWID and EM4102 (32 bits)

13.56 MHz and Bluetooth Credential Support
- M - Support for HID Mobile Access Mobile IDs via NFC and Bluetooth Smart - reader equipped with Bluetooth Smart module. Also supports iCLASS Seos, iCLASS SE, iCLASS SR, iCLASS, MIFARE Classic (SIO), MIFARE DESFire EV1 (SIO) and ISO 14443 UID.

Controller Communication (Select one option)
- N - Wiegand
- C - Clock & Data
- P - OSDP

Wiring Connection (Select one option)
- N - Pigtail
- T - Terminal strip

Hardware Revision
- E - Revision E

Color
- K - Black

Keyset (Select one option)
- M - Mobile-Ready: Prepared to support HID Mobile Access, but lacks the personalized configuration to read an organization’s specific Mobile IDs. This configuration can be ordered at any time but will require field activation after the organization has completed registration for HID Mobile Access.
- E - Mobile-Enabled: Fully activated and personalized to support an organization’s specific Mobile IDs. These readers can only be ordered after the organization has completed registration for either HID Elite or HID Mobile Access. If HID Elite reference (ICE) is given at time of order, only iCLASS Seos credentials with HID Elite keys are supported. If Mobile Reference (MOB) is given at time of order, only iCLASS Seos credentials with standard keys are supported.
Configuration Setting (Select one option)

Standard configuration: All iCLASS SE Readers - Standard Profile with Bluetooth Smart ship with the following features

- Controller Communication = N - Wiegand, or P - OSDP
- LED normally red, LED flashes green and beeps on card read
- Keypad output is 4-bit (if keypad reader)

This configuration is represented by the following standard configuration setting extensions listed.

<table>
<thead>
<tr>
<th>Communication</th>

</tbody>
</table>

3. Place an order.

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: [http://www.hidglobal.com/customer-service](http://www.hidglobal.com/customer-service)

Need credentials? Credentials supported by this reader model includes (depending on options chosen above):

- Mobile IDs
- iCLASS Seos
- iCLASS
- MIFARE DESFire EV1
- MIFARE Classic
iCLASS SE Reader - Standard Profile

Application: Designed to ensure compatibility with legacy credentials and capability to support the future.

Technologies Supported: Wide variety of contactless credentials including HID Mobile Access Mobile IDs via NFC.

1. Select one option from each of the following sections:

   **Reader Model (Select one model)**

   - [ ] 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
   - [ ] 910 - Model R15 - Designed for door applications requiring a mullion style mounting.
   - [ ] 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
   - [ ] 95A - Décor model - Designed for door applications requiring low profile EU square wall switch mounting.
   - [ ] 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting. Supports keypad input.
   - [ ] 929 - Model RKL400 - Designed for door applications requiring LCD display. – Coming soon, contact your HID Sales Representative
   - [ ] 940 - Model R90 - Designed for vehicle access applications requiring extended read range.

   - [ ] T - Terminal strip

   **Hardware Revision**

   - [ ] E - Revision E

---

1 Not available on model 940.
2 Consult your regional technical support representative for specific configurations.
**Color (Select one option)**
- K - Black
- W - White. Only available on 95A model.
- G - Gray. Only available on 95A model.

**Keyset (Select one option)**
- 0 - Standard v1 - Supports credentials with default HID keys, including iCLASS and iCLASS SR.
- 2 - Standard v2 - Supports credentials with default HID keys, not including iCLASS and iCLASS SR.
- E - HID Elite - Supports credentials with HID Elite keys, including iCLASS and iCLASS SR, and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

**Configuration Setting**
- 0000 - Standard configuration (not available on 929):
  - 125 kHz Credential Support = N – None or P – Supports HID Prox, AWID and EM4102 (32 bits)
  - 13.56MHz Credential Support = T - Maximum Compatibility
  - Controller Communication = N - Wiegand
  - Keyset = 0 - Standard v1 or E - HID Elite
  - LED normally red, LED flashes green and beeps on card read
  - Keypad output is 4-bit (if keypad reader)

- xxxx - Non-Standard configuration: ANY other options selected above requires a Non-Standard 4 digit extension. To order non-standard configuration options, use the Select tab on the iCLASS SE Configuration spreadsheet at the following link: [www.hidglobal.com/node/19914](http://www.hidglobal.com/node/19914). Your HID Global Support or Sales representative can help you determine your final configuration.

2. Enter the numbers/letters from the selections above into the following table:
   The resulting “Final Part Number” is used when ordering reader.

<table>
<thead>
<tr>

3. Place an order.
To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: [www.hidglobal.com/customer-service](http://www.hidglobal.com/customer-service)

Need credentials? Credentials supported by this reader model include the following, depending on options chosen above:
- **Mobile IDs**
- **iCLASS Seos**
- **iCLASS**
- **iCLASS SE**
- **MIFARE DESFire EV1**
- **MIFARE Classic**
iCLASS SE Biometric Reader - Wiegand or OSDP

Application: Designed for door applications requiring multi-factor authentication including biometric.
Technologies Supported: iCLASS® Seos® 8kB and iCLASS® 16kb-32kb credentials

1. Select one option from each section below:

Reader Model (Select one model)
- 928 - Model RKLB40 - Designed for door applications requiring multi-factor authentication including biometric. Featuring an LCD display, biometric sensor and keypad.

125 KHz Credential Support
- N - No 125 KHz support

13.56 MHz credential support (Select one option)
- S - Supports biometric template on iCLASS Seos credentials
- F - Supports biometric template on iCLASS Seos, iCLASS SR and iCLASS credentials

Controller Communication (Select one option)
- N - Wiegand
- C - Clock & Data
- P - OSDP – Coming soon, contact your HID Sales Representative

Controller Connection
- T - Terminal strip

Hardware Revision
- E - Revision E

Color
- K - Black

iCLASS Support/Keyset (Select one option)
- 0 - Standard v1 – Supports iCLASS Seos, iCLASS SR and iCLASS credentials with default HID keys.
- 2 - Standard v2 - Supports iCLASS Seos credentials with default HID keys.
- E - HID Elite - Supports iCLASS Seos, iCLASS SR and iCLASS credentials with HID Elite keys. Key reference (ICE or MOB) required at time of order.

Configuration Setting
Standard configuration iCLASS SE Biometric ship with the following features:
- Controller Communication = N - Wiegand or P – OSDP
- 13.56 MHz Credential Support = S - iCLASS Seos or F - iCLASS Seos, iCLASS SR and iCLASS
- LED normally red, LED flashes green and beeps on card read
- Controller PIN verification with Keypad output 4-bit (local PIN verification is a non-standard configuration)

These configuration options are represented by the following standard configuration setting extensions listed.

<table>
<thead>
<tr>
<th>Controller Communication</th>
<th>13.56 MHz Credential Support</th>
<th>Extension</th>
</tr>
</thead>
<tbody>
<tr>
<td>N - Wiegand</td>
<td>S - iCLASS Seos</td>

iCLASS SE Reader - Magnetic Stripe

Application: Designed to ensure compatibility with legacy credentials and capability to support the future.

Technologies Supported: Magnetic stripe cards and a wide variety of contactless credentials including HID Mobile Access Mobile IDs via NFC.

---

1. Select one option from each of the following sections:

   **Reader Model (Select one model)**

   - [ ] 922 - Model RM40 - Designed for door applications requiring standard wall switch mounting.
   - [ ] 925 - Model RMK40 - Designed for door applications requiring standard wall switch mounting. Supports keypad input.

   **125 KHz Credential Support (Select one option)**

   - [ ] N - No 125 KHz support
   - [ ] P - Support for HID Prox, AWID and EM4102 (32 bit)

   **13.56 MHz Credential Support (Select one option)**

   - [ ] T - Maximum compatibility
   - [ ] N - High security Weigand
   - [ ] W - Custom programming*

3. Place an order.
To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: www.hidglobal.com/customer-service.

Need credentials? Credentials supported by this reader model include (depending on options chosen above):
- Mobile IDs
- iCLASS Seos
- iCLASS SE
- iCLASS
- HID Prox
- MIFARE DESFire EV1
- MIFARE Classic
pivCLASS Reader - FIPS 201 Strong Authentication

Application: Designed for applications that leverage the pivCLASS® Authentication Module (PAM) to validate FIPS 201 credential certificates for the highest level of security.

Technologies Supported: FIPS 201 credentials such as PIV, CIV, TWIC, CAC, and FRAC, and a wide variety of other contactless credentials.

1. Select one option from each section below:

Reader Model (Select one model)

- 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
- 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
- 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting. Supports keypad input.
- 923 - Model RKCL40 - Designed for door applications requiring standard wall switch mounting. Featuring a contact slot, LCD display, and keypad.
- 924 - Model RKCLB40 - Designed for door applications requiring standard wall switch mounting. Featuring a contact slot, LCD display, biometric sensor, and keypad.

125 KHz Credential Support (Select one option)

- N - No 125 KHz support
- P - Support for HID Prox, AWID and EM4102 (32 bit) (not available on model RKCLB40)

13.56 MHz credential support (Select one option)

- H - Contactless. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. This option is only available for models R10, R40 and RK40.
- P - Contactless + Contact. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. FIPS 201 type cards can be read using either the contact or contactless card interface (RKCL40). This option is only available for models RKCL40, and RKCLB40.

Controller Communication (Select one option)

- R - RS485 FDX. Full duplex is required when connecting a pivCLASS reader to a PAM.
- P - RS485 HDX OSDP. Half duplex connection requires a connection with an OSDP-compliant strong authentication controller infrastructure. Only available with RKCL40.

Controller Connection (Select one option)

- N - Pigtail
- T - Terminal strip

Hardware Revision

- E - Revision E

Color

- K - Black

Keyset (Select one option)

- 0 - Standard v2 - Reads credentials with default HID keys including standard iCLASS and/or iCLASS SR.
- E - HID Elite - Reads credentials with HID Elite keys, including iCLASS and iCLASS SR, and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

Configuration Setting (Select one option)

Configuration setting extension for these reader models depends on the model and 125KHz support chosen above, select from list below:

<table>
<thead>
<tr>
<th>Reader Model</th>
<th>125KHz Support</th>
<th>Extension</th>
</tr>
</thead>
<tbody>
<tr>
<td>R10/R40</td>
<td>N - No</td>
<td>032Y</td>
</tr>

3. **Place an order.**

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: [www.hidglobal.com/customer-service](http://www.hidglobal.com/customer-service).

Need credentials? Credentials supported by this reader model includes (depending on options chosen above):

- Mobile IDs
- iCLASS Seos
- iCLASS SE
- iCLASS
- HID Prox
- MIFARE DESFire EV1
- MIFARE Classic
pivCLASS Reader - Wiegand or OSDP

Application: Designed to support FIPS 201 credentials and communicate to traditional intelligent controller using Wiegand or OSDP protocol

Technologies Supported: FIPS 201 credentials such as PIV, CIV, TWIC, CAC, and FRAC and a wide variety of contactless credentials

1. Select one option from each section below:

Reader Model (Select one model)

- 900 - Model R10 - Designed for door applications requiring a small footprint card reader.
- 920 - Model R40 - Designed for door applications requiring standard wall switch mounting.
- 921 - Model RK40 - Designed for door applications requiring standard wall switch mounting.
- 923 - RKCL40 - Combination, contact plus contactless reader with keypad and LCD.

125 KHz Credential Support (Select one option)

- N - No 125 KHz support
- P - Support for HID Prox, AWID and EM4102 (32 bit)

13.56 MHz credential support (Select one option)

- H - Contactless. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. This option is only available for models R10, R40 and RK40.
- P - Contactless + Contact. Supports PKI-Based FIPS 201 Credentials including PIV, PIV-I, CIV, CAC, TWIC and FRAC. FIPS 201 typecards can be read using either the contact or contactless card interface. This option is only available for model RKCL40.

Controller Communication (Select one option)

- R - Wiegand; Configurable to support RS-485 full duplex for communication with pivCLASS Authentication Module (PAM)
- P - Wiegand or OSDP via RS-485 half duplex; selectable through configuration. Not available for model with RKCL40.

Controller Connection (Select one option)

- N - Pigtail
- T - Terminal strip

Hardware Revision
- E - Revision E

Color
- K - Black

iCLASS Support/Keyset (Select one option)

- 0 - Standard v1 - Reads credentials with default HID keys including standard iCLASS and/or iCLASS SR.
- E - HID Elite - Reads credentials with HID Elite keys, including iCLASS and iCLASS SR, and/or Mobile IDs. Key reference (ICE or MOB) required at time of order.

Configuration Setting

Obtaining individual pivCLASS reader configuration settings requires the use of the online Configuration Guide.

2. Enter the numbers/letters from the selections above into the table below.

The resulting “Final Part Number” is used when ordering reader.

<table>
<thead>
<tr>
<th>Reader Model</th>
<th>125 KHz</th>
<th>13.56 MHz</th>
<th>Communication</th>

</tbody>
</table>

3. Place an order.

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: [http://www.hidglobal.com/customer-service](http://www.hidglobal.com/customer-service)

Need credentials? This reader could support (depending on options chosen above) the following credentials:

- iCLASS Seos
- iCLASS
- HID Prox
- MIFARE DESFire EV1
- MIFARE Classic
iCLASS SE U90 - UHF Long Range Reader

Application: Designed for vehicle access control installations which require long range authentication and high throughput

Technologies Supported: Ultra High Frequency (UHF) EPC GEN 2

1. Select one option from each section below to construct part number:

Reader Model (Select one model)

RDRSEU90 - Model U90 - Contactless Smart Card Long Range Reader: Surface or Pole Mount.

Antenna Code (Select one option, see table below)

<table>

</table>

3. Place an order.

To place an order for this product, authorized channel partners may submit a purchase order to HID Global Customer Service. Contact information is available at: http://www.hidglobal.com/customer-service.

Need credentials? This reader supports the following credentials:

- UHF cards
- UHF + iCLASS cards
**iCLASS SE Reader Accessories**

**Programming Cards**

Use these cards for customer reader configuration. Readers may be reconfigured to a target configuration by applying the correct target configuration. Use the following link to access the iCLASS SE Configuration Worksheet [www.hidglobal.com/node/19914](http://www.hidglobal.com/node/19914) to determine the exact configuration required. Apply changes to the reader security using programming cards. Contact HID Technical Support ([www.hidglobal.com/support](http://www.hidglobal.com/support)) to ensure selecting the proper settings.

</tr>
</tbody>
</table>

\(^1\) **Configuration Settings**

All standard readers ship with the following features - 13.56MHz interpreter “T” enabled, Wiegand “N” enabled, and Standard-1 “0” security keys enabled. ANY other option selected requires a specific configuration EXTENSION. To order non-standard configuration options, use the following link to access the iCLASS SE Configuration Worksheet [https://www.hidglobal.com/node/19914](https://www.hidglobal.com/node/19914). Your HID Global Support or Sales representative can help you determine your final configuration. Standard configuration includes: LED normally Red + Reader beeps / flashes LED green on card read + Intelligent Power Management = Off + Keypad Output is 4-bit (if keypad reader)

**Note:** Reader configuration cards change settings in an additive fashion. Configuration card settings only overwrite old settings for the options selected. Reader settings that have not been selected for the configuration retain their original values. To reset reader settings to factory defaults, use a factory default configuration card first, then apply the new configuration with the provided reader configuration card.

\(^2\) **Keys**

Specify HID Elite “E” or Standard-1/Standard-2 “0” based upon keys ALREADY LOADED in the reader that needs to be configured.

\(^3\) **HID Elite Upgrade and Downgrade Cards**

Reader admin keys and reader credential keys must both be changed to upgrade or downgrade to or from Elite. A separate card is required for reader admin keys and reader credential keys. A Reader Configuration Card with specific configuration extension SEC9X-0/E-XXXX or SEC9X-0/E-XXX(0, 1, 2, 3) is also required to modify configuration options other than Elite keys, for example modification of 125 kHz or 13.56 MHz interpreters.

\(^4\) **Keys**

Specify HID Elite “E” based upon HID Elite keys TO BE LOADED in the reader that needs to be configured.
## Accessories

The following provides accessories that can be ordered separately for your iCLASS SE and multiCLASS SE readers.

*Revision numbers and availability are subject to change without notice. Consult factory for availability.

¹ All the following communication modules allow host driven communication using the iCLASS Serial Protocol. All the following communication modules (except USB) allow for card ID reporting instantiated by the reader. For multi-drop functionality, see iCLASS OSDP Readers. All Reader/Writers are terminal strip readers. RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

² Configuration Setting Options are as follows (Factory or Field Configurable):

- 00 = Beep on, LED normally red, reader flashes green on tag read
- 01 = Beep on, LED normally red, reader flashes green on tag read
- 02 = Beep on, LED normally red, reader flashes green on tag read
- 03 = Beep off, LED normally off, reader flashes green on tag read
- 04 = Beep off, LED normally off, reader flashes green on tag read
- 05 = Beep off, LED normally off, reader flashes green on tag read
- 06 = Beep on, LED normally off, host must flash red and/or green
- 07 = Beep off, LED normally off, host must flash red and/or green

³ MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details. (SETTING NOT APPLICABLE WITH HID ELITE ORDERS. HID ELITE READERS DO NOT READ MIFARE CSN.)

- 0 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)
- 1 = HID Elite Key (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)
- C = Standard with Open Collector Tamper enabled
- D = Custom with Open Collector Tamper enabled

- Z = CSN Suppressed

⁶ Contact Factory for pricing, availability, and minimum order quantity.

²Consult Factory

³ProxPro Reader with Keypad (Hardware Option K Version): data is outputted over shared Wiegand cable. Reader processes keystrokes.

⁴ProxPro Reader with Keypad (Hardware Option S Version): (3 x 4 Matrix) requires additional 7 conductor keypad cable. Control panel processes keystrokes

⁵ProxPro Configuration Setting options are as follows (factory programmed):
- 00 = Buffer one key, no parity, 4 bit message
- 09 = Buffer one key, add compliment, 8 bit message (Dorado)
- 10 = Buffer six keys and add parity
- 11 = Buffer one key and add parity
- 14 = Buffer one to five keys (Standard 26 bit output)
- 19 = Buffer four keys and add parity
- 20 = Single Key buffering
- 21 = Supervision Mode
- 23 = Buffer one to 11 keys

⁶ProxPro reader Configuration Settings are selected by the customer via dip switch settings. 00 = LED normally red, reader flashes green on tag reads.

⁷ProxPro Serial output reads cards with up to 37-bit formats, and outputs RS232, RS422, and RS485.

¹ MiniProx Covers will only fit MiniProx readers with removable covers series (Model # 5365E or later), and will NOT fit older versions with electronics potted into the cover (Model #s 5365A, 5365B, nor 5365C).

² Thinline II Designer Covers will only fit Thinline II readers (Model # S395C or later), and will NOT fit Thinline II readers (Model #s S395A nor S395B).

³ ProxPoint Plus Designer Covers will fit all ProxPoint Plus readers (Model # 6005B or later), and will NOT fit ProxPoint readers (Model # 6005A).
Indala Proximity Readers

Overview

Every part number consists of a base model number to indicate the type of product, and a letter or number to indicate each product option. Each product has a standard part number that includes default options, as indicated on the order guide. When an order is placed for a product, the base model number and all options must be specified. If you require any options that are different from the default options, you must also indicate those options at the time the order is placed. All part numbers must be complete to be accepted by HID’s order entry system.

All reader orders must have the following information:

- BASE MODEL NUMBER
- STYLE
- READ RANGE
- TYPE
- COLOR
- OUTPUT FORMAT (reader’s format or format number must also be given at time of order)

**Notes:**

- To ensure security of the format and cards, a Software License Agreement must be signed by the final user of the 3175BN00, 3012AKN00, 3012ANS00, and be on file at HID prior to shipment.
- Developer's Resource CD includes: Serial Protocol Documentation and Developer's Test Program to assist in developing custom MIFARE software applications.
- Demo CD includes: MIFARE Documentation and Sample Application Program.
HID MOBILE ACCESS

What Is HID Mobile Access?

HID Mobile Access complements any access control solution by enabling building occupants to securely access the facility using Android and iOS mobile devices. HID Mobile Access, powered by Seos, consists of the following components:

- **HID Secure Identity Services Portal**: A cloud-hosted management portal that allows administrators to manage users, devices, and securely issue/revoke Mobile IDs.
- **HID Mobile Access App**: Easily downloaded on Google Play and Apple App Store and proven compatibility with the most popular mobile phones, tablets, and wearables.
- **Mobile IDs**: Powered by Seos credential technology, Mobile IDs are the virtual equivalent of the traditional contactless smart card.
- **iCLASS SE and multiCLASS SE Readers**: These flexible readers can be configured to securely authenticate with an organization’s Mobile ID’s via Bluetooth Smart and/or NFC communication standards.

Creating HID Mobile Access User Account

In order to use HID Mobile Access, an account in the Mobile Access Portal is required. Once an end-user account has been created, the organization will be able to order products from its Access Control Provider and issue Mobile IDs to its building occupants.

To set up an end-user account please go to [https://managedservices.hidglobal.com/faces/maUserOnBoardingStart](https://managedservices.hidglobal.com/faces/maUserOnBoardingStart)

After user account creation, the administrator will be given organization-specific identifiers required for ordering and for secure portal access:

<table>
<thead>
<tr>
<th>Reference</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mobile Keyset (MOB or ICE)</td>
<td>Mobile Keyset is a reference number for a set of cryptographic keys loaded into a reader. Mobile IDs, Mobile Key cards, and Mobile Admin cards will securely authenticate only with readers programmed with a matching keyset. An organization is assigned a Mobile Keyset upon registration into either the HID Elite™ (ICE) or HID Mobile Access (MOB) programs. The correct Mobile Keyset must be supplied when ordering mobile-enabled readers, Mobile IDs, Mobile Key cards, and Mobile Admin cards.</td>
</tr>
<tr>
<td>Organization ID</td>
<td>Organization ID is a reference number for a unique account within the Secure Identity Services portal. It is assigned at the conclusion of account registration. The correct Organization ID must be supplied when ordering Mobile IDs and Mobile Admin cards.</td>
</tr>
</tbody>
</table>

CREDENTIALS

Understanding HID Credentials

What should I know about security keysets?
iCLASS SE readers and iCLASS Seos / iCLASS SE credentials offer two keyset security schemes, HID Elite and Standard.

The HID Elite Security Program supports a unique keyset on a per site/company basis.

The keyset governs a variety of keys, including:

- Media (credential) keys for iCLASS SE, SIO-encoded iCLASS, MIFARE Classic (SIO) and MIFARE DESFire EV1 (SIO) credentials
- SIO authenticity and privacy keys (media independent)
- Configuration programming keys (for programming reader configuration, also media independent)

When utilizing HID’s standard key set for the above keys, all standard keyed credentials work with all standard keyed readers. Additionally, any Standard Security configuration card configures a Standard Security reader (only accomplished during the first five (5) seconds after reader powers-up). Conversely, when utilizing the HID Elite program, only site/company specific HID Elite credentials and programming cards work with matching readers.

The Standard Security Program provides universal keysets that offer maximized compatibility by keying readers and cards with matching security for use in the general population. This allows for maximized compatibility because readers and cards are not keyed on a per site/company basis but rather all keyed the same. This offers the advantage to the integrator as a standard stock of readers and cards will interoperate for a variety of sites/companies, rather than needing different stocks of readers and cards for each individual site. iCLASS SE readers provide two Standard Security Keysets that offer compatibility with the following credentials:

<table>

</tbody>
</table>

How can I order HID Elite configured credentials?

- Direct customers of HID must be authorized to purchase components with HID Elite keys. If you are not authorized, you must have the key owner authorize you through the Authorization form. See [http://www.hidglobal.com/services/secure-identity/credential-programs/iclass-elite-and-se-elite](http://www.hidglobal.com/services/secure-identity/credential-programs/iclass-elite-and-se-elite).
- Ensure the HID Elite flag is set in the part number (of readers, credentials and programming cards).
- All Purchase Orders for HID Elite components must be ordered with the HID Elite reference number (starts with ICE or MOB).

How can I migrate from my current credential technology?

- **iCLASS Existing Sites:** When deploying credentials to an existing site with standard iCLASS credentials and readers the following steps provide a guideline to a recommended path:
  1. Purchasing iCLASS Seos + iCLASS cards along with iCLASS SE Readers - Standard profile with Maximum compatibility credential support (supporting iCLASS cards), as this provides full interoperability with HID’s latest credential and reader platform, as well as supporting installed iCLASS base.
  2. This provides options to upgrade security in the future without rip-and-replace of the newly purchased readers
  3. Once all readers on site are iCLASS SE the customer can begin ordering iCLASS Seos only cards.
  4. Once all cards in the population are iCLASS Seos, readers can be configured to support only iCLASS Seos cards.

- **125 kHz Existing Sites:** Deploying credentials to an existing 125 kHz site with HID Prox/Indala Proximity credentials and readers (HID, Indala, AWID, and EM4102), purchase multi-technology iCLASS Seos or iCLASS SE Credentials, along with multiCLASS SE Readers for full credential and reader interoperability, and a relaxed migration timeline.
What is the difference between iCLASS Seos, iCLASS SE and iCLASS credentials?

**iCLASS Seos credentials** deliver enhanced security, data confidentiality and stronger authentication for user data. Seos comprises a generic card edge (card command interface) to meet the growing demand for interoperability; a secure messaging protocol to protect data transmission. In addition, Seos provides an open software architecture that is portable to a range of mobile devices and microprocessors. The credential offers enhanced privacy protection by delivering data confidentiality and integrity between the smart card and the reader to prevent sensitive/personal data from being intercepted or cloned. iCLASS Seos credentials are only delivered with a single access control data payload, the SIO, and are not backwards compatible with iCLASS readers.

**iCLASS SE credentials** come with a single access control data payload, the SIO. iCLASS SE credentials are designed to work in an installation of iCLASS SE readers only and are not backwards compatible with iCLASS readers.

**iCLASS credentials** are offered either with or without an encoded SIO. For the SIO encoded option, this card will come with two access control data payloads: the SIO and iCLASS access control data payload. These credentials provide backward compatibility with currently deployed systems, maximizing compatibility. iCLASS credentials encoded with SIO should be purchased when the site needs legacy application support, or when the site plans to eventually migrate to SIO security. iCLASS credentials encoded with SIOs were previously marketed as iCLASS SR credentials.

**iCLASS credentials** are designed to work in an existing installation of standard iCLASS readers. iCLASS credentials are compatible with both iCLASS readers and iCLASS SE readers.*

*Reader support depends on reader model and configuration selected.

Can I configure my Credential product online?

Yes, HID Global is now offering the HID Global Product Configurator. This online tool will guide customers and partners toward the most suitable product for their needs. This initial launch supports most PACS credential part numbers. Other products lines, such as with iCLASS SE readers, will be added later. There are two main features available with this tool:

- **Find by part number** - allows customers to enter an existing part number to see the specification of this credential.
- **Build a credential** - helps customers construct a complete part number, including keyset and formatting information; everything needed to place an order. Customers will be able to download a PDF with all specifications of the credential they build to allow for a smooth ordering process.

HID Global Product Configurator: [https://www.hidglobal.com/configure](https://www.hidglobal.com/configure)
Credentials Marking

For information on Card Identification Markings, please see the "Card Identification Markings Application note", available for download at https://www.hidglobal.com/node/23025

Credential Marking Technology

As a part of our commitment to continuous enhancements of world-class products and solutions, HID Global is transitioning to the most innovative card marking technology available.

HID Global is moving from ink jet card marking to the new laser engraving card marking technology for all Genuine HID® cards, fobs and authentication tokens. This state-of-the-art laser engraving technology will result in a more appealing look and feel and reduce the ecological footprint of card production.

Key benefits:

- Marking quality and durability of the cards will be enhanced and more consistent
- New engraving technology reflects HID Global’s commitment to sustainability by eliminating the use of solvents
- Improved Proof of Authenticity since engraved markings cannot be removed or modified.
- The enhanced design will be available at no additional charge.

Depending on the fulfillment center, customers may receive either inkjet or laser marked credentials during this transition period.

Notes:

- The numbering scheme and part number for existing part numbers will not change. Please contact your sales representative to see the new design and get sample cards.
- Due to the 3D nature of laser engraved markings, printing over these markings is not recommended as it may impact print quality.
- For further details on the printing areas, please contact HID Global.

Please contact HID Customer Service or Sales Representative if you have additional questions regarding this notice.
iCLASS Seos Credentials

Note: See Understanding HID Credentials on page 39 for guidance.

iCLASS Seos Card - 500

Increased security and interoperability cards for installation supporting iCLASS SE platform. All iCLASS Seos 8K cards are OTP enabled.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model

500 Composite 40% Polyester / PVC*

iCLASS Seos Memory Size and Allocation (Select one option)
- 5 - 16K Bytes
- 6 - 8K Bytes*

Secure Identity Object® Programming (Select one option)
- P - Programmed with Security Identity Object (SIO)
- V - Unprogrammed, for use with iCLASS SE Encoder

Front Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number1

Back Packaging (Select one option)
- G - Plain White with Gloss Finish2
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number1

Card Numbering3 (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)5
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)5
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)5
- A - Sequential Matching Encoded/Printed (Laser Engraved)
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

Slot Punch4 (Select one option)
- N - No Slot Punch

Packing (Optional)
- T - Packs of 10 (shrink wrap) in standard box

Option - Custom Artwork2

(Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from check boxes above. Example: 5005PGGNNT

Final Part Number 500           N   -                 (Options #)

iCLASS Seos Card Programming Information

Format Number _____ (example: H10301)  Bit Numbers _____ (example: 26 bit) Facility Code _____

Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____

HID Elite ICE Number (If applicable) - _______ (Custom Format) Site Code _____  City Code _____  OEM Code _____

Special Instructions: _______

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner.
3 The printed card number is placed in the bottom right-hand corner on the back of the card.
4 Cards are not available with any slot punch option.
5 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
6 Available with 7 byte static UID for ISO14443A UID migration and interoperability. This feature reduces privacy and is not recommended. Contact your local sales or pre-sales representative for details.
Readers and Credentials How to Order Guide, PLT-02630, B.0

iCLASS Seos + iCLASS Card - 522

Migration solution from iCLASS to Seos in iCLASS SE platform. All iCLASS Seos 8K cards are OTP enabled. Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**
- 522 Composite 40% Polyester / PVC*

### iCLASS Seos and Memory Size and Allocation
- 6 - 8K Bytes

### iCLASS Memory Size and Allocation (Select one option)
- 0 - iCLASS 2k Bits (256 Bytes) with 2 Application Areas
- 3 – iCLASS 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 – iCLASS 32k Bits (4K Bytes) Application areas 16k/16+16k/1

### iCLASS Seos Programming (Select one option)
- P - Programmed with Security Identity Object (SIO)
- V - Unprogrammed, for use with iCLASS SE Encoder (Must be combined with C option below)

### iCLASS Programming (Select one option)
- S - Programmed with Security Identity Object (SIO) and with standard iCLASS Access Control Application (recommended)
- P - Programmed with Security Identity Object (SIO)
- H - Programmed with standard iCLASS Access Control Application
- C - Unprogrammed, for use with iCLASS SE Encoder (Must be combined with V option above)

### Front Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

### Back Packaging (Select one option)
- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number
- 1 - Plain White with Gloss Finish with Magnetic Stripe
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

### iCLASS Seos Card Numbering (Select one option)
- N - No Printed Card Numbering
- A - Sequential Matching Encoded/Printed (Laser Engraved)
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

### iCLASS Card Numbering (Select one option)
- N - No Printed Card Numbering
- A - Sequential Matching Encoded/Printed (Laser Engraved)
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

### Slot Punch
- N - No Slot Punch

### Option - Custom Artwork
- (Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

**Enter your final card options from check boxes above. Example: 52263PSGGAAN**

| Final Part Number | 522 | 6 | N | - | (Options #) |

4. For Laser Engraved Printed numbers, consult factory for lead times and cost.
5. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
6. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS SE Key - 325

The iCLASS SE contactless smart Key offers read/write capability while leveraging Security Identity Object for increased security. Attach to a key ring or badge clip for convenient use. The iCLASS SE key is not available with iCLASS programming.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

325 Base Model

**iCLASS Memory Size and Allocation (Select one option)**
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2 + 16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16 + 16k/1

**Secure Identity Object Programming (Select one option)**
- P - Programmed with Security identity Object (SIO)
- V - Unprogrammed, for use with iCLASS SE Encoder

**Front Packaging**
- N - iCLASS Key II - Black with blue insert. Includes HID Standard Artwork

**Back Packaging**
- N - None

**Key Numbering**
- M - Sequential Matching Encoded/Printed (Inkjetted)\(^4\)
- N - No Printed Key Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)\(^4\)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)\(^4\)
- A - Sequential Matching Encoded/Printed (Engraved)\(^2\)
- B - Sequential Encoded/Sequential Non-Matching Printed (Engraved)\(^2\)
- C - Random Encoded/Non-Matching Sequential Printed (Engraved)\(^2\)

**Additional Options**\(^3\)
- N - None

Enter your final card options from the above selections. Example: 3250PNNMN

<table>
<thead>
<tr>
<th>Final Part Number</th>
<th>325</th>
<th>N</th>
<th>N</th>
</tr>
</thead>
</table>

**iCLASS Key Programming Information**

Format Number ______ (example: H10301)  Bit Numbers ______ (example: 26 bit)  Facility Code ______

Encoded Card #  Start _____  Stop _____  Printed Card #  Start _____  Stop _____

HID Elite ICE Number (if applicable) - ______ (Custom Format)  Site Code _____  City Code _____  OEM Code _____

Special Instructions:

1 The Printed key number is placed on the back of the key.
2 For Laser Engraved Printed numbers, consult factory for lead times and cost.
3 Key Ring sold separately (Part Number: 57-0001-02).
4 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS SE Tag - 330

The iCLASS SE contactless smart Tag offers read/write capability while leveraging Security Identity Object for increased security. iCLASS SE enable existing credentials or non-metallic devices such as cell phones or PDAs by adhering the iCLASS Tag. The iCLASS SE Tag is not available with iCLASS programming.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### 330 Base Model

### iCLASS Memory Size and Allocation (Select one option)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

### Secure Identity Object Programming (Select one option)
- P - Programmed with Secure Identity Object (SIO)
- V - Unprogrammed, for use with iCLASS SE Encoder

### Front Packaging (Select one option)
- K - Black with HID Standard Artwork
- C - Custom Artwork - Specify Custom Artwork Number

### Back Packaging
- S - Adhesive Backing

### Tag Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Tag Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

### Slot Punch
- N - None

### Option - Custom Artwork
- Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork

Enter your final Tag options from check boxes above. Example: 3302PSSSN

</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>HID Elite ICE Number</th>
<th>Site Code</th>
<th>City Code</th>
<th>OEM Code</th>
</tr>
</thead>
</table>

| Special Instructions: |

1. The Printed tag number is placed on the back of the tag.
2. For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3. The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.
4. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
iCLASS SE Clamshell Card - 335

Added security into installations that do not contain standard iCLASS readers, these cards are not available with iCLASS programming.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

³ Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS SE + Other HF Card - 391

The SIO-Enabled iCLASS with MIFARE Classic or MIFARE DESFire EV1 contactless smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. This card offers maximized compatibility installations that contain iCLASS SE or MIFARE Classic / MIFARE DESFire EV1 credentials.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Special Instructions:**

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The Printed card number is placed in the bottom right-hand corner for iCLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.
4. For Laser Engraved Printed numbers, consult factory for lead times and cost.
5. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
6. The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
iCLASS Credentials

iCLASS Card - 200 / 210

iCLASS cards can be ordered either with both SIO and iCLASS programming or iCLASS programming only. Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model:**
- [ ] 200 Standard PVC
- [ ] 210 Composite 40% Polyester / PVC*

**iCLASS Memory Size and Allocation (Select one option)**
- [ ] 0 - 2k Bits (256 Bytes) with 2 Application Areas
- [ ] 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- [ ] 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

**iCLASS Programming (Select one option)**
- [ ] P - Programmed with standard iCLASS Access Control Application
- [ ] C - Unprogrammed, for use with iCLASS SE Encoder

**Front Packaging (Select one option)**
- [ ] G - Plain White with Gloss Finish
- [ ] C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

**Back Packaging (Select one option)**
- [ ] G - Plain White with Gloss Finish
- [ ] C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

**Card Numbering (Select one option)**
- [ ] M - Sequential Matching Encoded/Printed (Inkjetted)
- [ ] N - No Printed Card Numbering
- [ ] S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- [ ] R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- [ ] A - Sequential Matching Encoded/Printed (Laser Engraved)
- [ ] B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- [ ] C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

**Slot Punch (Select one option)**
- [ ] N - No slot punch, This card can be slotted vertically, Printed Vertical Slot Indicators
- [ ] B - No Slot Punch, This card can be slotted horizontally, Printer Horizontal Slot Indicators
- [ ] V - Vertical Slot Punch
- [ ] H - Horizontal Slot Punch

**Option - Custom Artwork**
- [ ] ____________ (Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from check boxes above. Example: 2000HPGGNN

**Final Part Number**
- [ ] ____________ (Options #)

**iCLASS Card Programming Information**

Format Number ______ (example: H10301)  Bit Numbers ______ (example: 26 bit)  Facility Code ______

Encoded Card # Start ______ Stop ______  Printed Card # Start ______ Stop ______

HID Elite ICE Number (if applicable) - ______ (Custom Format)  Site Code ______ City Code ______ OEM Code ______

PIN (2-12 digits):  [ ] Sequential: Start #: ________  [ ] Random: Length ________

Special Instructions: ______

1 Secure Identity Object (SIO) Programming is not mandatory but highly recommended. If SIO programming is not selected the letter H should be left out from Final Part Number, for example: 2000PGGNN
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
3 Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
4 The Printed card number is placed in the bottom right-hand corner on the back of the card.
5 For Laser Engraved Printed numbers, consult factory for lead times and cost.
6 Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
7 The ability to add a horizontal slot punch requires a different iCLASS antenna design. Users can expect a read range reduction of approximately 20% if they order option H for the Slot Punch.
8 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
9 The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
iCLASS + Prox card - 212

iCLASS + Prox cards can be ordered either with both SIO and iCLASS programming or iCLASS programming only, a composite fee applies to this card.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

Base Model  

212 Composite 40% Polyester / PVC

iCLASS Memory Size and Allocation (Select one option)

- 2k Bits (256 Bytes) with 2 Application Areas
- 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4-32k Bits (4K Bytes) Application areas 16k/16+16k/1

Programming (Select one option)

- HP - Programmed with Security Identity Object (SIO), and standard iCLASS Access control application, 125 KHz Unprogrammed.
- HB - Programmed with Security Identity Object (SIO), and standard iCLASS Access control application, programmed, Specify Programming Information.
- P - Programmed with standard iCLASS Access Control Application, 125 KHz Unprogrammed.
- B - Programmed 125 kHz Proximity and iCLASS. Specify Programming Information.
- C - iCLASS Unprogrammed, for use with iCLASS SE Encoder, Prox technology blank.
- A - iCLASS Unprogrammed, for use with iCLASS SE Encoder, Prox technology programmed. Specify Programming Information.
- K - iCLASS Programmed, HITAG1 blank. Specify Programming Information.
- M - iCLASS Programmed, HITAG2 blank. Specify Programming Information.
- R - iCLASS configured field programmable, HITAG1 blank.
- I - iCLASS configured field programmable, HITAG2 blank.

Front Packaging (Select one option)

HID Elite ICE Number (if applicable) - ______ (Custom Format) Site Code _____ City Code _____ OEM Code _____

PIN (2-12 digits):  □ Sequential: Start # _______  □ Random: Length _______.

Special Instructions: ______

1. Secure Identity Object (SIO) Programming is not mandatory but highly recommended. If SIO programming is not selected the letter H should be left out from Final Part Number, for example: 2020PGGNNN
2. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
3. Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
4. The printed card number is placed in the bottom right-hand corner for iCLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.
5. For Laser Engraved Printed numbers, consult factory for lead times and cost.
6. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.
7. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

* The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
iCLASS Key - 205

The iCLASS Key can be ordered either with both SIO and iCLASS programming or iCLASS programming only. Attach to a key ring or badge clip for convenient use.

*Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.*

### Base Model

- **205 Base Model**

### iCLASS Memory Size and Allocation (Select one option)

- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

### Programming (Select one option)

- **H** - Programmed with Security Identity Object (SIO) and iCLASS encoding (Recommended). Specify programming information.
- **P** - Programmed iCLASS only. Specify programming information.
- **C** - iCLASS Unprogrammed, for use with iCLASS SE Encoder. Programming Information Not Required

### Front Packaging

- **N** - iCLASS Key II - Black with blue insert. Includes HID Standard Artwork

### Back Packaging

- **N** - None

### Key Numbering (Select one option)

- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Key Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Engraved)
- **B** - Sequential Encoded/Sequential Non-Matching Printed (Engraved)
- **C** - Random Encoded/Non-Matching Sequential Printed (Engraved)

### Additional Options

- **N** - None

Enter your final card options from the above selections. Example: 2050HNNNM

### ICLASS Key Programming Information

<table>

</tr>
</tbody>
</table>

Special Instructions:

1. The Printed key number is placed on the back of the key.
2. For Laser Engraved Printed numbers, consult factory for lead times and cost.
3. Key Ring sold separately (Part Number: 57-0001-02).
4. Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS Tag - 206

The iCLASS contactless smart Tag can be ordered either with both SIO and iCLASS programming or iCLASS programming only. iCLASS enable existing credentials or non-metallic devices such as cell phones or PDAs by adhering the iCLASS Tag.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

206 Base Model

iCLASS Memory Size and Allocation (Select one option)
- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

iCLASS Programming information (Select one option)
- H - Programmed with Security Identity Object (SIO) and iCLASS encoding. Specify programming information. (Recommended)
- P - Programmed with iCLASS access control application only. Specify programming information.
- C - iCLASS Unprogrammed, for use with iCLASS SE Encoder. Programming Information Not Required.

Front Packaging (Select one option)
- K - Black with HID Standard Artwork
- C - Custom Artwork - Specify Custom Artwork Number

Back Packaging
- S - Adhesive Backing

Tag Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Tag Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

Slot Punch
- N - None

Option - Custom Artwork
(Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

Enter your final Tag options from check boxes above. Example: 2060HSSNN

| Final Part Number | 206 | S | N | - | (Options #) |

iCLASS Tag Programming Information

Format Number _____ (example: H10301) Bit Numbers _____ (example: 26 bit) Facility Code _____

Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____

HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____ City Code _____ OEM Code _____

PIN (2-12 digits): □ Sequential: Start # _______ □ Random: Length _______.

Special Instructions: ___

1 The Printed tag number is placed on the back of the tag.
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3 The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.
4 Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
iCLASS Clamshell Card - 208

Can be ordered either with both SIO and iCLASS programming or iCLASS programming only.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

- 208 Base Model

iCLASS Memory Size and Allocation
☑️ 0 - 2k Bits (256 Bytes) with 2 Application Areas

iCLASS Programming (Select one option)
☐ HP - Programmed with Security Identity Object (SIO) and standard iCLASS Access Control Application. Programming information required. (Recommended)
☐ P - Programmed with standard iCLASS Access Control Application only. Programming information required.
☐ C - iCLASS Unprogrammed, for use with iCLASS SE Encoder. Programming Information Not Required.

Front Packaging (Select one option)
☐ M - Plain White Vinyl with Matte Finish
☐ G - Plain White with Gloss Finish
☐ C - Custom Artwork - Specify Custom Artwork Number

Back Packaging (Select one option)
☐ S - Base with Molded HID Logo
☐ C - Custom Artwork - Specify Custom Artwork Number

Card Numbering (Select one option)
☐ M - Sequential Matching Encoded/Printed (Inkjetted)
☐ N - No Printed Card Numbering
☐ S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
☐ R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

Slot Punch
☑️ V - Vertical Slot Punch

Option - Custom Artwork

HID Elite ICE Number (if applicable) - (Custom Format) Site Code _____ City Code _____ OEM Code _____

PIN (2-12 digits): ☐ Sequential: Start # _________ ☐ Random: Length _________

Special Instructions: _________

1 Secure Identity Object (SIO) Programming is not mandatory but highly recommended. If SIO programming is not selected the letter H should be left out from Final Part Number, for example: 2080PGSNV
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
3 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
iCLASS + Other HF Card - 242

iCLASS with MIFARE Classic or MIFARE DESFire EV1 contactless smart card offers multiple High Frequency technologies to simplify card issuance for diverse systems or migration projects. For MIFARE Classic: This credential is only delivered with MIFARE Classic UID 4 Bytes long only (32 Bit). It is not available with 7 bytes UID for MIFARE Classic, only for MIFARE DESFire EV1.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**

| 242 Composite 40% Polyester / PVC |

**iCLASS Memory Size and Allocation (Select one option)**

- 0 - 2k Bits (256 Bytes) with 2 Application Areas (only available with MIFARE Classic 1K)
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

**Card Programming (Select one option)**

- J - Programmed with SIO Identity Object (SIO) iCLASS and 2nd technology (Recommended)
- H - Programmed with Security Identity Object (SIO) for iCLASS only
- I - Programmed with SIO Identity Object (SIO) for 2nd technology only
- B - Programmed iCLASS & 2nd Technology. Specify Programming Information.
- P - Programmed iCLASS only not 2nd Technology. Specify Programming Information.
- C - Unprogrammed iCLASS, for use with iCLASS SE Encoder, Non-programmed 2nd Technology. Programming Information Not Required.
- A - Unprogrammed iCLASS, for use with iCLASS SE Encoder, Programmed 2nd Technology. Specify Programming Information

**2nd High Frequency Technology (Select one option)**

- M - MIFARE Classic 1K Bytes (only available with iCLASS 2k bits)
- N - MIFARE Classic 4K Bytes
- K - MIFARE DESFire EV1 8K Bytes

**Front Packaging (Select one option)**

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number1

**Back Packaging (Select one option)**

- G - Plain White with Gloss Finish2
- C - Custom Artwork with Gloss Finish - Specify Custom Artwork Number2

**iCLASS Card Numbering3 (Select one option)**

- M - Sequential Matching Encoded/Printed (Inkjetted)6
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)6
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)6
- A - Sequential Matching Encoded/Printed (Laser Engraved)4
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)4
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)4

**Slot Punch**

IMPORTANT - Dual High Frequency credentials do not allow a slot punch due to the antenna design. HID recommends using a badge holder to attach this card to a lanyard or badge clip.

- N - No Slot Punch

**2nd High Frequency Technology Card Numbering3 (Select one option)**

- M - Sequential Matching Encoded/Printed (Inkjetted)6
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)6
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)6
- A - Sequential Matching Encoded/Printed (Laser Engraved)4
- B - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)4
- C - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)4

**Option - Custom Artwork1**

(Specify Artwork Number - Refer to the Custom Artwork Forms for new artwork)

Enter your final card options from the above selections. Example: 2420HNGGNNN

For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.

Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand on the back of the card.

The printed card number is placed in the bottom right-hand corner for ICLASS 13.56 MHz and in the bottom center for 125 kHz Proximity on the back of the card.

For Laser Engraved Printed numbers, consult factory for lead times and cost.

Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.

* The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
UHF Credentials

UHF Card - 600

The SIO Enabled UHF (Ultra High Frequency: 860-960 MHz) contactless smart card is designed for long read range (parking, gate, healthcare...) while leveraging your investment in existing access control systems. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element. Direct to Card printing on these cards is not recommended.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

5 Number of bits should remain below 120 bits.
6 The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
HID Proximity Credentials

ProxCard II Card - 1326

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

1326 Base Model

Programming (Select one option)
- L - Programmed, Low Frequency (125 kHz) HID. Specify Programming Information.
- N - Non-Programmed, Low Frequency (125 kHz). Programming Information Not Required.

Front Packaging (Select one option)
- S - ProxCard II Artwork - Vinyl with Matte Finish
- M - Plain White Vinyl with Matte Finish
- G - Plain White PVC with Gloss Finish
- C - Custom Artwork - Specify Custom Artwork Number

Back Packaging (Select one option)
- S - Base with Molded HID Logo
- C - Custom Artwork - Specify Custom Artwork Number

Card Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)

Slot Punch
- V - Vertical Slot Punch

Option - Custom Artwork
- Specify Artwork Number - Refer to the Custom Artwork Forms for new Artwork

Enter your final card options from check boxes above. Example: 1326LSSMV

125 kHz Card Programming Information

Format Number _____ (example: H10301) Bit Numbers _____ (example: 26 bit) Facility Code ______
Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____
HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____ City Code _____ OEM Code _____
Special Instructions: _____

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 The Printed card number is placed in the top left-hand corner on the back of the card. HID logo molded into base on back.
# DuoProx® II Card - 1336 / 1536

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

| Base Model | ☐ 1336 Standard PVC | ☐ 1536 Composite 40% Polyester / PVC *
|------------|---------------------|---------------------|

## 125 KHz Programming (Select one option)

- L - Programmed. Specify Programming Information.
- N - Unprogrammed, for use with iCLASS SE Encoder. Programming Information Not Required.

## Front Packaging (Select one option)

- G - Plain White PVC w/ Gloss Finish
- C - Custom Artwork w/ Gloss Finish - Specify Custom Artwork Number

## Back Packaging (Select one option)

- G - Plain White PVC w/ Gloss Finish
- S - Standard DuoProx II Artwork Gloss Finish
- C - Custom Artwork w/ Gloss Finish - Specify Custom Artwork Number

## Card Numbering (Select one option)

- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- A - Sequential Matching Encoded/Printed (Engraved)
- B - Sequential Encoded/Sequential Non-Matching Printed (Engraved)
- C - Random Encoded/Non-Matching Sequential Printed (Engraved)

## Slot Punch (Select one option)

- N - No slot punch, Printed Vertical and Horizontal Slot Indicators
- V - Vertical Slot Punch, Printed Horizontal Slot Indicators
- H - Horizontal Slot Punch, Printed Vertical Slot Indicators

## Option - Custom Artwork

- Specify Artwork Number - Refer to the Custom Artwork Forms for new Artwork

Special Instructions:

1. For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2. Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small “HID logo” and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3. The Printed card number is placed in the bottom right-hand corner on the back of the card.
4. Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.
5. For Laser Engraved Printed numbers, consult factory for lead times and cost.
6. Programmed as a sequential 12 digit number.
* The composite construction is recommended for all cards that will have an over-laminate applied.
ProxKey III Keyfob - 1346

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

☑ 1346 Base Model

Programming (Select one option)
- L - Programmed, Low Frequency (125 kHz). Specify Programming Information.
- N - Non-Programmed, Low Frequency (125 kHz). Programming Information Not Required.

Front Packaging
- N - ProxKey III - Black with grey insert. Includes HID Standard Artwork
- C - ProxKey III - Custom Artwork - Specify Custom Artwork Number

Back Packaging
☑ S - Standard

Keyfob Numbering (Select one option)
- M - Sequential Matching Encoded/Printed (Inkjetted)
- N - No Printed Card Numbering
- S - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- R - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- A - Sequential Matching Encoded/Printed (Engraved)
- B - Sequential Encoded/Sequential Non-Matching Printed (Engraved)
- C - Random Encoded/Non-Matching Sequential Printed (Engraved)

Additional Options
☑ N - No Option

Enter your final ProxKey options from check boxes above. Example: 1346LNSMN

</table>

| HID Elite ICE Number (if applicable) | (Custom Format) Site Code | City Code | OEM Code |

**Special Instructions:**
- 1 For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
- 2 The Printed tag number is placed on the back of the tag.
- 3 The MicroProx Tag is not for use on cards that use full insertion or tractor feed type readers.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the MicroProx Tag will work in every situation. Functional and non-functional MicroProx Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

**MicroProx Placement**
- Contact Smart Chip
- Magnetic Swipe card

</tbody>
</table>

**Notes:**
- Some dye sublimation printers cannot accommodate pre-slot punched labels; consult with the printer manufacturer prior to ordering.
- Labels are packaged in multiples of 100 pieces. Minimum order quantity is 100 pieces. Orders will be accepted in multiples of 100 pieces per label Model.
- Make sure to adjust your dye sublimation printer setting to the proper PVC label thickness and dimension.
Indala 125kHz Credential

Every part number consists of a base model number to indicate the type of product, and a letter or number to indicate each product option. Each Indala product has a standard part number that includes default options, as indicated on the order guide. When an order is placed for a product, the base model number and all options must be specified. If you require any options that are different from the default options, you must also indicate those options at the time the order is placed. All part numbers must be complete to be accepted by HID’s order entry system.

All card orders must have the following information:

- **BASE MODEL NUMBER** - Specifies card or type
- **PROGRAMMING** - Specifies if card is factory or field programmed (format or format number, facility code, and ID number range must be given at time of order)
- **FRONT or FLAT SIDE GRAPHICS** - Specifies standard or custom artwork, and smart chip placement
- **BACK or EMBOSSED SIDE GRAPHICS** - Specifies standard or custom artwork, and smart chip placement
- **MARKING POSITION** - Specifies location of card marking.

**Note:** Card marking is surface printed and, therefore is not to be considered permanent. In certain cases Laser etching may be used instead of inkjet marking. Laser etching is permanent marking but is not used on all products.

- **SLOT PUNCH** - Specifies slot location if available
- **CARD OPTIONS** - Applies to FlexCard® (Base Model FPCRD/CXCRD) only
- **MAGNETIC STRIPE OPTION** - Specifies if card is to have a magstripe and which type (ISO Imageable Cards only)
- **CUSTOM FILE NUMBER** - Specifies the artwork number to be used

Encoded Card #  Start Stop Printed Card #  Start Stop

HID Elite ICE Number (if applicable) - (Custom Format) Site Code City Code OEM Code

Special Instructions:

- For Contact Smart Chip selection, refer to Logical Access How to Order Guide. Standard configuration does not include a contact smart chip module.

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 The Printed card number is placed in the bottom right-hand corner on the back of the card on Proximity Format Programming only.
4 For Laser Engraved Printed numbers, consult factory for lead times and cost. When printed, the number is encoded MSB (most significant byte) -> LSB (least significant byte).
5 Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.
6 Includes a permanent Unique MIFARE 32 Bit Serial number. When printed, the number is encoded MSB (most significant byte) -> LSB (least significant byte).
7 Please note that cards shipped within North America are always laser-engraved. Inkjetted option is not available for these cards.
8 The composite construction is recommended for all cards with over-laminate applied.
MIFARE Classic + Prox card - 350 / 355 / 1431 / 1441 / 1437 / 1447

Encompasses the industry’s broadest range of open standard contactless smart card products. Provides the memory structure and capacity to store multiple applications on a single credential with the addition of Proximity technology for easier migration. All MIFARE Classic + Prox cards can be ordered with or without SIO encoding.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### MIFARE Classic + Prox card with SIO encoding (Recommended)
- **3500 (1K) Standard PVC**
- **3506 (4K) Standard PVC**
- **3550 (1K) Composite 40% Polyester/PVC**
- **3556 (4K) Composite 40% Polyester/PVC**

### Programming (Select one option)
- **P** - Programmed with Security Identity Object (SIO) for MIFARE
- **R** - Both interfaces programmed (MIFARE with Security Identity Object (SIO), Prox programmed with HID format)
- **V** - Unprogrammed SIO, for use with iCLASS SE Encoder, Prox un-programmed

### Front Packaging (Select one option)
- **G** - Plain White with Gloss Finish
- **C** - Custom Artwork with Gloss Finish - Specify Custom Artwork Number

### Back Packaging (Select one option)
- **G** - Plain White with Gloss Finish
- **1** - Plain White with Gloss Finish with Magnetic Stripe
- **C** - Custom Artwork with Gloss Finish - Specify Custom Artwork Number
- **3** - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number

### 13.56 MHz MIFARE Card Numbering (Select one option)
- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **U** - UID (CSN) HEX card numbering only (Inkjetted)
- **V** - UID (CSN) Decimal card numbering only (Inkjetted)
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)
- **B** - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- **C** - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)
- **Z** - Reversed UID (CSN) Decimal card numbering only (Laser Engraved)

### Slot Punch (Select one option)
- **N** - No slot punch. This card can be slotted vertically, Printed Vertical Slot Indicators
- **V** - Vertical Slot Punch

### 125 kHz Proximity Card Numbering (Select one option)
- **M** - Sequential Matching Encoded/Printed (Inkjetted)
- **N** - No Printed Card Numbering
- **S** - Sequential Encoded/Sequential Non-Matching Printed (Inkjetted)
- **R** - Random Encoded/Non-Matching Sequential Printed (Inkjetted)
- **A** - Sequential Matching Encoded/Printed (Laser Engraved)
- **B** - Sequential Encoded/Sequential Non-Matching Printed (Laser Engraved)
- **C** - Random Encoded/Non-Matching Sequential Printed (Laser Engraved)

### Option - Custom Artwork (Specify Artwork Number - Refer to the Custom Artwork forms for new artwork)

13.56 MHz Card Programming Information

Format Number _____ (example: H10301) Bit Numbers _____ (example: 26 bit) Facility Code _____

Encoded Card # Start _____ Stop _____ Printed Card # Start _____ Stop _____

HID Elite ICE Number (if applicable) - _____ (Custom Format) Site Code _____ City Code _____ OEM Code _____

Special Instructions: ______

1 The Printed tag number is placed on the back of the tag.
2 For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.
3 The Tag is not for use on cards that use full insertion or tractor feed type readers.
4 Includes a permanent Unique MIFARE 32 Bit Serial number.
5 Up to 1.14in (29mm) read range in free air.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the Tag will work in every situation. Functional and non-functional Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

* = Actual read range performance affected by mounting location, environment and the tags tuned resonant frequency.
MIFARE DESFire EV1 Card - 370 / 375 / 1450 / 1456

Based on open global standards for security, and is interoperable with existing MIFARE DESFire EV1 infrastructures. All MIFARE DESFire EV1 cards can be order either with or without SIO encoding.

Ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

HID Elite ICE Number (if applicable) - ___________ (Custom Format) Site Code City Code OEM Code
Special Instructions: _____

1 For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.
2 Cards ordered with plain white front and back packaging, or custom artwork, will still have a small “HID logo” and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
3 The Printed card number is placed in the bottom right-hand corner for MIFARE 13.56 MHz and in the bottom center for DESFire on the back of the card.
4 For Laser Engraved Printed numbers, consult factory for lead-times and cost.
5 The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
CREDENTIAL PROGRAMMERS

Understanding HID Credential programmers

HID Global offers two credential encoders enabling field programming of access credentials for use with HID Global’s world class access control reader portfolio. HID Global offers credential programming for technologies from 125 kHz to 13.56 MHz, including HID Prox, iCLASS, iCLASS SE and iCLASS Seos. This How to Order Guide provides part numbers and ordering instructions for HID Global’s Credential Encoders. We currently offer the following credential Encoding solution:

- The iCLASS SE Encoder, capable of encoding a wide range of credential technologies, including iCLASS Seos, iCLASS SE, iCLASS, HID Prox, MIFARE Classic and MIFARE DESFire EV1 from single encoder.

Credential Encoder Ordering Basics

The iCLASS SE Encoder is available for sale without a renewable lease agreement since it utilizes a credential credit process to encode cards.

To order an encoder, use the subsequent pages to

- Determine the correct Encoder part number by matching the technology and application
- Fill out the applicable Encoder lease/sales request (if applicable)
- Fill out the appropriate Credential Credit and format requests

If at any time you require assistance, contact HID Global Sales at www.hidglobal.com/customer-service
iCLASS SE Encoder Summary

The iCLASS SE Encoder Platform for encoding contactless credentials is:

- **Dynamic** - Support for a wide range of credential technologies, including iCLASS Seos, iCLASS SE, and iCLASS, HID Prox, MIFARE Classic, and MIFARE DESFire EV1 from single encoder.
- **Flexible** - Manage custom keys locally or leverage HID standard and Elite keys.
- **Convenient** - On-site programming of card stock speeds up the delivery time to obtain and issue cards.
- **Seamless** - Encode multi-tech credentials in a single pass, saving time and resources.

HID Global’s iCLASS SE Encoder is an ideal solution for organizations to encode credentials and configure readers. Highly versatile, the encoder can locally manage HID Global standard Keys, Elite Keys or securely define and manage custom keys. The dynamic iCLASS SE Encoder has the capability to encode and manage a wide variety of credential technologies, interoperable with iCLASS SE readers. The solution allows users to upgrade existing card populations for use with higher security iCLASS SE Platform readers. That same flexibility also supports new credential technologies as they arise.

The iCLASS SE Encoder is available either as a desktop device as the CP1000D, or as an in-line encoder within a FARGO card printer. The in-line encoder enables organizations to graphically and electronically personalize smart cards in one seamless process, saving time and energy. This How to Order Guide will provide details for ordering credential credits, formats, and key for both the desktop and in-line encoder. To find the part number for an in-line encoder inside of a FARGO card printer, see the FARGO card printer How To Order Guide.

iCLASS SE Encoder - How Does it Work?

The iCLASS SE Encoder solution is made up of following components:

- **Hardware** - Encoder is available in either a desktop or in-line form factor
- **Software** - The encoder solution is compatible with two editions of Asure ID:
  - **Asure ID CP1000 Edition** - This edition is included with the purchase of a desktop encoder (CP1000D) and is suitable for standalone encoding. The solution enables data to be manually entered or to have it automatically increment after each encoded card.
  - **Asure ID Exchange Edition** - This edition is purchased separately and in addition to supporting the desktop encoder is the only edition which supports the in-line encoder. This solution can also connect to external databases in real-time when reading/encoding contactless cards.
- **Credential Credits** - The encoder utilizes credential credits to enable the encoding of contactless cards. The solution will decrement a credential credit each time a card has been encoded. Each credential technology and security combination will utilize a specific credential credit type (i.e. iCLASS Seos card secured with an Elite key). Credential credit part numbers are allocated for Genuine HID or Third Party Credentials. The iCLASS SE Encoder is able to determine the source of the credential during the encoding cycle and will decrement the appropriate counter accordingly.
- **Formats** - Utilizes pre-defined format templates, eliminating the need to understand access control formatting and card numbering schemes. HID formats can be ordered using this HTOG but approval may be needed for proprietary formats.
- **Keysets** - Supports HID Elite, Standard, or Custom keys. Standard and HID Elite keys can be ordered using this HTOG but approval will be needed for HID Elite keys.
The following items are included with each Desktop iCLASS SE Encoder:

1 - CP1000D Desktop Encoder
- 1 - Installation Guide
- 1 - HID USB Flash Drive
  - Asure ID CP1000 Edition Desktop Application
  - Supporting Technical Documents
  - Encoder Configuration Package (*.ise file) which includes the H10301 format, media key sets, and reader configuration key sets
- Variety of sample cards and credential credits (see table below)

iCLASS SE Encoder Order Form

We recommend using the iCLASS SE Encoder HTOG Supplement to place an initial iCLASS SE Encoder order or when placing an order for additional Credential Credits, Key Sets, or Formats. However, the same information from the supplement can be derived from this HTOG.

Do you need to purchase an iCLASS SE Encoder?  
(Yes / No)

** If you are replacing a legacy programmer (i.e. CP400 or Prox Programmer) please provide a screen shot of what you are currently programming today**.

1. If you are ordering Credential Credits, Keys, or Formats for an existing iCLASS SE Encoder please identify the Encoder Serial Number (i.e. CPXXXX). The Serial Number can be found on the bottom of the desktop encoder or on the printer product label if installed within a FARGO card printer.

__________________________________________________________________________

2. What email address should HID send the secure file with the Credential Credits, Format, or Key Sets?

__________________________________________________________________________

3. To order additional Credential Credits please review the “iCLASS SE Encoder Credential Credit” section and enter additional Credential Credits to the order in the following table:

<table>
<thead>
<tr>
<th>Final Part Number</th>
<th>Counter Ref Number (from section below)</th>
<th>Quantity</th>
<th>HID Elite¹ ICE Number (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRDT</td>
<td>-</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CRDT</td>
<td>-</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CRDT</td>
<td>-</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

¹ HID Elite was previously known as iCLASS Elite®. Contact customer services for information on the authorization process.

**Note:** MOQ for all Credential Credits is 100. Maximum of 10,000 of each Credential Credit can be ordered at one time.

4. To order additional Key Sets please review the “iCLASS SE Encoder - Key Sets” section and enter the final iCLASS Encoder Keyset part numbers below:

<table>
<thead>
<tr>
<th>Final Part Number</th>
<th>Technology Ref. Number (from section below)</th>
<th>Security Ref. Number (from section below)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CKEYMED</td>
<td>-</td>
<td>-</td>
</tr>
<tr>
<td>CKEYCFG</td>
<td>-</td>
<td>-</td>
</tr>
<tr>
<td>CKEYSIO</td>
<td>-</td>
<td>-</td>
</tr>
</tbody>
</table>

**Note:** If you are unfamiliar with smart card key sets, please contact your sales manager prior to ordering.

5. The iCLASS SE Encoder comes preconfigured with the basic HID Open 26 Bit Wiegand format (H10301), but can also be loaded with additional formats to provide extended support of credential requirements. To order additional Open non-tracked Proprietary¹ and Open Tracked² formats use the following table.

<table>
<thead>
<tr>
<th>Part Number</th>
<th>Format Number</th>
<th>Facility Code³ (If applicable)</th>
<th>Start Number³ (If applicable)</th>
<th>End Number³ (If applicable)</th>
<th>Quantity³ (If applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>FRMT-J1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>FRMT-J1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Corporate/University 1000 Format Credits
Corporate 1000® and University 1000® formats are available for use on the iCLASS SE Encoder. These formats must be ordered separately from other formats to ensure uniqueness of numbers used in both the iCLASS SE Encoder and within the HID Manufacturing Facilities. Order the Corporate or University 1000 number ranges using the indicated base part number and by completing the form below:

FRMT- J2 (Corporate/University 1000)¹

<table>
<thead>
<tr>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Format Number</td>
</tr>
<tr>
<td>Start Number</td>
</tr>
<tr>
<td>End Number</td>
</tr>
</tbody>
</table>

¹ Authorization is required. If you are not authorized to use the format, contact customer services for information on the authorization process.

Corporate 1000® and University 1000® formats are available for use on the iCLASS SE Encoder. These formats must be ordered separately from other formats to ensure uniqueness of numbers used in both the iCLASS SE Encoder and within the HID Manufacturing Facilities. Order the Corporate or University 1000 number ranges using the indicated base part number and by completing the form below:

FRMT- J2 (Corporate/University 1000)

<table>
<thead>
<tr>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Format Number</td>
</tr>
<tr>
<td>Start Number</td>
</tr>
<tr>
<td>End Number</td>
</tr>
</tbody>
</table>

¹ Authorization is required. If you are not authorized to use the format, contact customer services for information on the authorization process.

h10304 facility codes are automatically registered to the first user of that facility code. If you are not authorized to use the requested facility code, contact customer service for information on the authorization process. Alternatively state a facility code value of “new” to be automatically assigned and registered with an unused facility code.

Facility Code, Start Number, End Number and quantity do not apply to open non-tracked formats but do apply to proprietary and Open-tracked formats.

iCLASS SE Encoder - Credential Credits
The iCLASS SE Encoder utilizes credential credits to enable the encoding of contactless credentials. Each credential technology and security combination will utilize a specific credential credit. Also note that credential credit part numbers are allocated for Genuine HID or Third Party Credentials, the iCLASS SE Encoder is able to determine the source of the credential during the encoding cycle and will decrement the appropriate counter accordingly.

- Base Part Number CRDT-xx (Select xx from the tables below)

iCLASS and iCLASS Seos Technology Credential Credits
Used to encode Genuine HID Standard iCLASS 2K, 16K, or 32K and credentials or Genuine HID/Third Party Seos credentials.

<table>
<thead>
<tr>
<th>Credential Type</th>
<th>Technology</th>

iCLASS SE Encoder - Keysets

Key Management is a complex subject that requires some understanding of the various technologies and how smart card applications are managed. For example, encoding data on an iCLASS or MIFARE Classic card requires, at a minimum, a single authentication key to gain access to the application area or sector. The application data may have additional security enhancements requiring additional keys. The HID Application for example, requires two DES keys, one key for authentication to the app area and another key for encryption of the application data, while the Secure Identity Object requires AES keys for encryption and signing the credential. Each technology will differ in terms of the keys that need to be created and managed. The iCLASS SE Encoder includes utilities for managing individual keys as well as grouping those keys into Keys sets for ease of deployment.

To ensure your iCLASS SE Encoder is equipped with the correct keys it is necessary to order Keysets appropriately. There are three classes of keysets available which are explained below.

Media Keyset

Media keysets provide all the cryptographic keys necessary to set up and encode cards. The keys delivered with each part number will vary depending on the needs of the technology. For instance using the table below the part number CKEYMED-ICL-0 will deliver the iCLASS media Keyset with Standard or HID Elite keys for accessing the HID application area, the encryption key for the PACS data, and the key for accessing the SE application area. If you are using HID Elite Credentials, the part number will be CKEYMED-ICL-1.

Part number CKEYMED-MIF-n will deliver Key A and Key B for accessing the HID application on a MIFARE Classic card as well as transport keys for the MAD (MIFARE Application Directory).

Part number CKEYMED-DES-n delivers keys for accessing the HID application on a MIFARE DESFire EV1 card including the PICC master key, the application master key and the application read and write keys.

Reader Configuration Keyset

The Reader configuration keyset provides the privacy and authentication keys necessary to create configuration cards. Typically, configuration cards are needed to push new keys and/or configuration data to the reader. In order to utilize this solution, programmable configuration card are needed to be ordered.

Part numbers for these cards are 0501500295-READER - used for reader configuration, and 0501500295-ELITE - used for HID Elite key preparation.
SIO Keyset

The SIO Keyset provides the privacy and authentication keys for HID's Secure Identity Objects. Because SIOs are independent of card technology, their keys are ordered separately.

As a default, the iCLASS SE Encoder is loaded with the following Keysets as standard:

- iCLASS Media Keyset
  - iCLASS and Seos
  - Standard (CKEYMED-ICL-0 & CKEYMED-Seos-0)

- MIFARE Keysets
  - MIFARE Classic & MIFARE DESFire EV1
  - Standard (KEYMED-MIF-0 & CKEYMED-DES-0)

- Reader Configuration Keyset
  - Standard (CKEYCFG-0)

- SIO Keyset
  - Standard (CKEYSIO-0)

<table>
<thead>
<tr>

</tbody>
</table>

Supplementary Cards

To order cards or tags for use with the iCLASS SE Encoder, please see the Credentials section of this How To Order Guide. Unprogrammed cards and tags are available for most technologies, and can be ordered separately from the kit for use with your iCLASS SE Encoder.
