

Establishing Trust in Online Identities

Strong Authentication for Remote Access and Beyond

The HID Global Identity Assurance portfolio enables customers to prove and establish trust in a person's identity when accessing resources on the network. HID Global is relied on by more agencies, including the U.S. Department of Defense, than any other provider, and has issued more than 100 million credentials to enterprise, government and commerce customers.

Vision

HID Global leads the market with Identity Assurance solutions that can adapt to customer needs at all levels of assurance, usability requirements, and budgets.

Built on open standards, HID Global Identity Assurance solutions are uniquely scalable to deliver compliance and security, while protecting customer investments for the future.

ActivID® Credential Management System Appliance

4TRESS™ Authentication Appliance

Primary Markets

HID Global enables customers to prove and trust the identities accessing resources on the network with a comprehensive portfolio of identity authentication and credential management solutions. This holistic approach drives customer solutions, expert services and product development in three key, but very different markets: Enterprise, Government and Online Banking.

Identity Assurance Solutions Overview:

- **Versatile Authentication.** Enables corporations, banks and governments to authenticate employees and customers seeking access to online resources.
- **Credential Management.** Issue and manage the credentials used by customers and employees to authenticate themselves.
- **Authentication Devices.** Physical devices such as smart cards, USB keys and tokens that hold the credentials. Also, mobile card readers.
- **Security Clients.** Desktop software that enables employees to use credentials to login/authenticate, or sign and encrypt data.
- **Validation.** Complete solution that allows for the secure, scalable and reliable validation of digital certificates using both traditional as well as distributed OCSP.
- **Access Control.** Readers and controllers that enable smart cards to be used for physical access.

Services

HID Global is committed to reducing an organization’s risks, going beyond delivering comprehensive strong authentication and credential management solutions to deliver a variety of services, from pre-sales and solution design to training and ongoing support. HID Global ensures the success of customer deployments by offering a complete service program.

Enterprise Solutions

- Protect valuable corporate assets by layering strong authentication throughout the enterprise. HID Global:
- Delivers a “universal” access solution, where users can simply, yet strongly authenticate to their desktop, network, applications and physical resources with a single smart card.
 - Gives organizations the ability to protect valuable assets, safeguard customer data and meet compliance requirements.

Government Solutions

Secure assets, reduce the cost of government operations, improve constituent services and meet compliance requirements. HID Global:

- Provides smart card and smart chip solutions that comply with government standards and mandates, (including PIV, FIPS 201, HSPD-12).
- Offers a versatile authentication solution for eGovernment initiatives to securely provide online services to improve constituent services and convenience, and reduce the cost of government operations.
- Delivers new innovations including solutions for PIV-enabled email from smartphones and FIPS 201-compliant building access.
- Enables government organizations to safeguard information, meet compliance requirements, improve constituent services and reduce the overall cost of government operations.

Online Banking Solutions

Enable a secure, confident and convenient online banking experience.

HID Global:

- Provides a versatile authentication solution for online banking and other service channels to safeguard customer data, protect their brand and reduce fraud.
- Enables a secure, confident and convenient online banking experience for retail, business and private banking customers.
